

ViewPoint™ 6 for Women's Health

The smallest things
make the biggest difference.

An ounce makes a difference.

In fetal development, small margins in weight and length can dramatically change a diagnosis. That's why precise and comprehensive reporting of ultrasound exam results is so critical.

Improved communication makes a difference.

ViewPoint 6's precise and comprehensive reporting and image management capabilities for Women's Health help to improve, and streamline communication between healthcare professionals and patients.

The features you trust also make a difference.

We worked closely with customers and medical societies, including AIUM to ensure that ViewPoint 6 offers you both better patient care, and greater efficiency.

Comprehensive data transfers from ultrasound systems, applying Quick Report templates, or using placeholders gives you the ability to conveniently create professional reports in less time.

ViewPoint 6 also gives you the ability to review images, clips, and volumes from a study, in one place. The integrated 4DView* functionality, in turn, provides precise and detailed multi-dimensional views of your ultrasound data.

Maximized efficiency.

Digitized workflow solutions, from the start of the exam to archiving.

Accurate ultrasound reporting and image management.

Complete integration:

- ✓ ViewPoint 6 fully integrates into your IT infrastructure.
- ✓ This allows for the more efficient flow of patient information.
- ✓ Benefit from over 30 years of experience interfacing in IT environments.
- ✓ Our team of knowledgeable IT professionals are available to support you to find a workflow solution tailored to your individual requirements.

Accessibility makes a difference. ViewPoint 6 WebConnect*.

ViewPoint 6 WebConnect gives clinicians the ability to review, build, and finalize ultrasound exam documentation at anytime from anywhere within your clinic or hospital network. This brand-new, browser-based experience does not require any additional installation.
