

Centricity Perioperative Anesthesia Professional Fee Management

Improving charge capture and compliance documentation

Centricity® Perioperative Anesthesia now automatically extracts required anesthesia billing indicators through the simple act of charting. Produce your billing ticket electronically, and deliver more accurate and efficient reports to your office staff. Whether you code at the bedside, or pass this responsibility to the coding office, Centricity Perioperative Anesthesia offers comprehensive resources, speed and accuracy. A standardized billing interface moves critical data to third party billing software with just one click. Electronically tie together the clinical and business aspects of your practice today and improve your group's charge capture and compliance documentation.

To ensure maximum reimbursement, proper documentation is essential. The system can be uniquely configured to support documentation requirements associated with billing regulations and national quality initiatives. Data entry errors created during the billing process can be reduced, which can lead to fewer rejections and incomplete claims. The simplified process also helps free up your staff by helping them work more efficiently.

Streamlined coding and billing

The coding and billing process is simplified and accelerated through documentation of elements such as:

- Medical direction
- Date/time stamped attestation notes
- MAC
- Base units
- Time units for billing of accurate times
- Physical status
- Anesthesia procedures — non-time based
- Coding modifiers

Reduced risks and improved reimbursement opportunities

The system streamlines your billing process to help mitigate risks and improve reimbursement opportunities through:

- Regulatory documentation requirements, mandate and monitor
- Coding and billing based strictly on medical records
- Integrated billing reports that extract essential elements
- Anesthesia billing information integrated with external systems through an HL-7 interface
- Management of Physician Quality Reporting Initiative (PQRI)
- Standard file imports — ASA Crosswalk, Surgical Procedures, ICD-9, Modifiers and QC
- Timely management of the billing process
- Multiple security levels that support billing department roles
