In PeriOperative care where high quality information has to be available when needed, clinicians can rely on Centricity Anaesthesia for providing that information fast and easy to optimise the quality, safety and performance of patient care.

Your documentation tool for PeriOperative care.

Centricity Anaesthesia is optimised for a high performance PeriOperative environment and it is an easy to use solution for producing electronic care records of the PeriOperative care areas.

The solution provides high quality integration with automated data collection from medical devices and seamless integration with hospital information systems helping clinicians to see the patient data more clearly and accurately.

The user interface is designed to save time and increase data completeness with an optimised touch-screen, pre-configured cases and standardized care protocols including configurable default values and task lists. These standardized care protocols are helping clinicians to make better decisions at the point of care.

Because of different needs in different PeriOperative care areas the implementation and modification of the Centricity Anaesthesia applications have been designed to be extremely flexible with unique application-configuration tools.

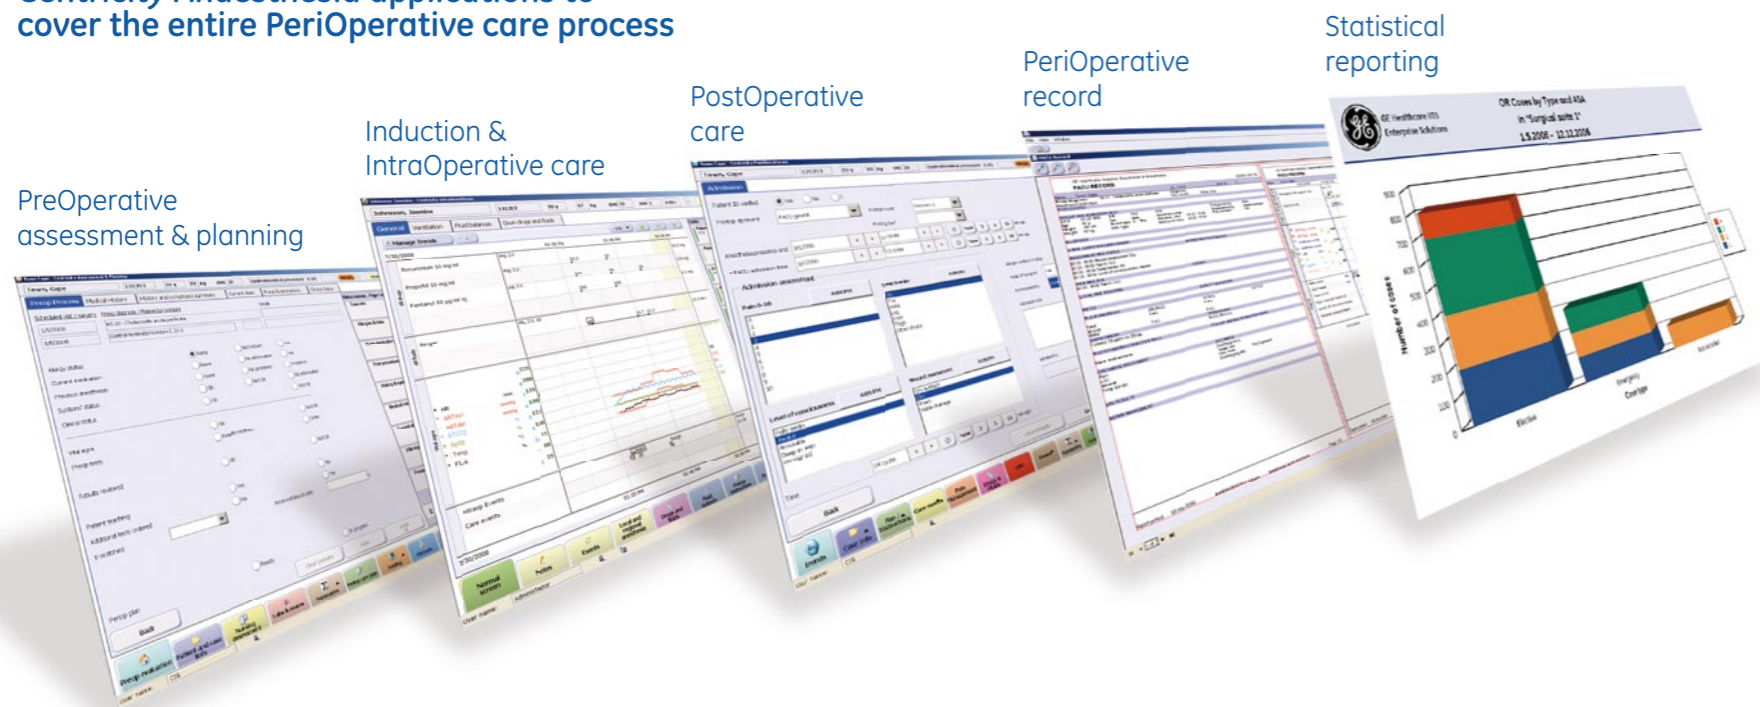

Analyse clinical performance

Centricity Anaesthesia provides an instant access to patient care documentation like PeriOperative records and statistical reports for improving care quality and process efficiency. Configurable PeriOperative print outs can be created and converted automatically to be part of EPR systems for completing Electronic Patient Record. For making statistics easy to use for everyone in their daily practice Centricity Anaesthesia provides a set of predefined reports with an industry standard reporting tool. With this reporting tool it is fast and easy to modify existing reporting templates or create a new report. These reports can also be published automatically for sharing information where needed.

Benefits for OR Management and clinicians

- Improves quality and helps to reduce human errors:
 - Standardised care protocols
 - Rule based checks for information
 - More accurate care information
 - High quality PeriOperative records
 - Complete statistical reports
- Improves efficiency and saves costs:
 - More precise care decisions
 - Reduced documentation time
 - Improves throughput
- Release time for patient care:
 - Fast assessment of patient status
 - Automated data capture from devices
 - Automated data sharing with other information management systems
 - Simplified basic documentation
 - Fast and easy to use documentation with touch screen
 - Easy to find patient care related documentation
 - Automated calculations and scorings

Centricity Anaesthesia applications to cover the entire PeriOperative care process

Benefits for IT department

- Standard IT infrastructure with industry standard tools
- High user and patient data security
- Sophisticated system and device integrations with Best in KLAS® integration engine
- Easy to use configuration tool (what you see is what you get)
- Advanced maintenance tools
- Reference data import/export
- Flexible yearly maintenance programme
