

GE-Nemoto Dual-Shot Injector

Brought to you exclusively by GE Healthcare

GE Healthcare has partnered with Nemoto, a world leader in injection system technologies, to bring you this innovative CT injection system. Sold exclusively by GE Healthcare, the GE-Nemoto Dual-Shot CT injector is a new addition to the family of GE Accessories & Supplies products for your CT scanner suite.

Ease of use

- Intuitive anatomical protocol selection compliments the GE CT scanner protocol setup
- Minimal button presses required to select, modify or create protocols
- Easy syringe loading and unloading – no injector command required
- Easy-to-see, simple and efficient LCD touch-screen interface
- Winner of **Good Design Award**

Innovation

- Unique plunger-style syringe allows user to fill syringes outside of the injector, improving patient setup. Automatic refill in injector is also an option.
- Cardiac protocols with dilution (simultaneous saline and contrast), multi-phases and saline flush
- Compact flash card for protocol saving, quick retrieval, sharing and easy updates

Consumables

- Prepackaged consumable kits with everything needed for an exam
- Single and dual syringe kits for contrast only and saline exams with J-tube or spike filling option and Y-tubing
- GE will work with you to select the appropriate products, create a blanket purchase order and schedule regular deliveries of any configuration and quantity of products that you require

Safety features

- Used in the demanding markets of Japan, Asia and Europe
- Real-time pressure monitoring, graphically monitors needle tip pressure and injection parameters, as well as a needle placement test to help ensure safe injection
- The injector self-tests at the power-up and during the entire injection protocol. In case of error detection, the system halts, an error message is displayed and a buzzer can be heard.

Service

- Backed by GE Healthcare's world-class service team, providing installation, service and applications training as part of CT scanner training
- Advanced design doesn't require after-sales calibration or annual Preventive Maintenance (PM). However, GE can include PM in your service contract if your facility or governing authority requires it.

Upgradeable

- Unique flash memory card design allows for software changes and upgrades

"One-Stop-Shop"

- The GE-Nemoto Dual-Shot CT injector comes from the leader in healthcare technologies and service. Now you can order all critical CT accessories– from the CT scanner to the consumables – from one source, allowing you to focus on your customers.

Product	Description
E8004N	GE-Nemoto Dual-Shot CT Injector Pedestal Mounted
E8004NA	GE-Nemoto Dual-Shot CT Injector Ceiling Mounted (short post – floor to mounting plate less than 9') <i>note: Requires E8004NG mounting plate</i>
E8004NB	GE-Nemoto Dual Syringe Pack: 200ml & 100ml Syringe, Spike and Y-Tube
E8004NC	GE-Nemoto Dual Syringe Pack: 200ml & 100ml Syringe with J-Tube & Y-Tube (20/box)
E8004ND	GE-Nemoto Single Syringe Pack: 100ml Syringe with Spike & 60" Coiled Tubing (50/box)
E8004NE	GE-Nemoto Single Syringe Pack: 100ml Syringe with J-Tube & 60" Coiled Tubing (50/box)
E8004NJ	GE-Nemoto Dual-Shot CT Injector Ceiling Mounted (long post – floor to mounting plate greater than 9') <i>note: Requires E8004NG mounting plate</i>
E8004NW	Nemoto Pedestal Injector 1yr. Extended Warranty
E8004NY	Nemoto Ceiling Injector 1yr. Extended Warranty

One year warranty included with purchase
