TiP-TV® Training in Partnership: **Online Programming** continuing education

Lower Extremity Arterial Duplex Evaluation - Available February

It is estimated that peripheral arterial disease (PAD) affects approximately 8 to 12 million individuals in the United States (U.S.). This program explores duplex examination of the lower extremity arteries, as prescribed by the "Professional Performance Guidelines" of the Society for Vascular Ultrasound (SVU).

Hands On - Available May

Ultrasound is an art as much as a science. This program presents the art of diagnostic ultrasound, as masters in the field demonstrate practical techniques for imaging sometimes difficult anatomy.

Aorto-iliac Duplex Ultrasound - Available October

Duplex ultrasound is often used to determine the extent and severity of atherosclerotic disease. In this program, top practitioners in the field discuss and illustrate effective and efficient techniques to accomplish this vascular exam.

Unless otherwise noted, the online courses listed in this section will be ASRT-approved as Category A programs by the first online date. You must submit the required information by the deadline date to obtain continuing education credit.

The Target Audience is Ultrasound technologists. Other technologists and medical personnel may also benefit.

Online Courses - Ultrasound

- 3D/4D Ultrasound of the Fetal Heart
- Advanced Cardiovascular Imaging
- Advanced Concepts in Ultrasound Physics
- Avoiding OB Errors
- Brain Attack
- Breast Pathology Correlation
- Breast Ultrasound/Mammography Correlation - Registry Review
- Cardiovascular Imaging
- Current Concepts in Vascular Imaging
- DVT - The Silent Killer
- Emergency Ultrasound
- Examining Cerebrovascular Circulation
- Fetal Echocardiography - An Introduction
- Fetal Echocardiography Update
- The First Trimester OB Study
- The First Trimester OB Study Episode II
- Imaging the Gravid Cervix - Helpful Hints
- Lower Extremity Arterial Segmental Physiologic Evaluation
- Men's Health
- Musculoskeletal (MSK) Ultrasound
- The Pancreas Challenge
- Pediatric Scanning
- Physics Revisited
- Renal and Mesenteric Artery Evaluation
- Saline Infusion Sonohysterography
- Scanning the Arterial Bypass
- Transesophageal Echocardiography (TEE)
- Ultrasound Determination of Carotid Stenosis
- Ultrasound - Past, Present, and Future
- Upper Extremity Arterial Duplex Evaluation
- Upper Extremity Venous Duplex Evaluation
- Vascular Ultrasound - A Comparison with Other Modalities
- Venous Examination
- Volume Imaging Techniques

Earn Continuing Education (CE) Credit Online

Diagnostic Imaging Professionals can earn continuing education credit through the Healthcare Learning System (HLS) web site for viewing online courses. A tutorial is available online to help you create an account and log in. Please direct your staff to: hls.gehealthcare.com.
