

Centricity Cardiology

Interactive Administrative Reporting

Product Sheet

Overview

Web-based interactive statistical reporting allows you to quickly and easily create reports, query procedures and obtain information on supplies and inventory. The resulting reports can then be prepared in a variety of formats including interactive point-and-click reporting, giving you the flexibility of having the information you need, in the way you need to see it.

Features and Benefits

- Automated administrative report scheduling helps you improve your operating mechanisms by securely delivering the right reports to the right audience in a timely manner.
- Advanced users can utilize the Crystal Reports application to generate complex administrative reports.
- Capturing statistical information at the point of care as a part of case documentation eliminates redundant data entry and reduces chance of errors.
- Data on lesions, procedures and supplies is associated to the correct physician when multiple physicians are involved to help ensure integrity of information.

Requirements

- Centricity® Cardiology Data Management System Administrative Server; or
- Centricity Cardiology Data Management System Application Server and Interface Server

imagination at work

For more than 100 years, scientists and industry leaders have relied on General Electric for technology, services and productivity solutions.
