

# Mac-Lab IT powered by Centricity

## Billing/Charge Capture Module

### Product Sheet

### Overview

Centricity® Cardiology Charge Capture Module helps to ensure billing accuracy by enabling electronic flow of patient data from admission to discharge. Through procedure documentation, supply tracking and corresponding modifiers, Charge Capture Module improves the integrity of the billing data and helps you avoid inaccurate or missed charges.

### Features and Benefits

- Electronic import of hospital charge codes helps to minimize errors by eliminating redundant data entry.
- Simultaneous tracking and supply documentation using Mac-Lab® IT barcode scanners increases productivity while decreasing the potential for errors by reducing redundant data entry and time spent managing inventory.
- Mac-Lab IT Case and Intervention Events associate the procedure and supplies to the correct physician when multiple physicians are involved, helping to maintain billing data integrity.
- When used with the Centricity Cardiology Physician Reporting Module, the Charge Capture Module seamlessly correlates the physician report with the clinical report, for improved workflow synchronization and higher billing accuracy.
- The ability to confirm procedures, add diagnostic codes (ICD-9) and procedure modifiers helps to reduce missed charges and provide more accurate medical records.
- By dynamically tracking charges, Charge Capture Module allows you to efficiently check on the status for reimbursement submission and easily re-submit any rejected charges.

### Requirements

- Centricity Cardiology Data Management System Interface Application Server or Centricity Cardiology Administrative Server
- Billing/Charge Capture Module
- Optional: Centricity Cardiology Physician Reporting Module
