Centricity Cardiology

Physician Reporting Module

Overview

The Centricity® Cardiology Physician Reporting Module improves physician workflow by enabling the user to quickly complete a cath report in less than five minutes. Seamless integration of data gathered at the point of care increases diagnostic confidence in report generation and helps to facilitate accurate billing.

Features and Benefits

- Ability to acquire information, review procedures and analyze images and data from a single workstation streamlines clinician workflow and helps physicians to generate faster, more comprehensive reports.
- Point-of-care documentation populates 95% of report, resulting in more consistent data for detailed final reports.
- Automatic, electronic routing of physician reports allows fast and efficient distribution of final, confirmed reports to multiple locations simultaneously via fax, e-mail or network printer.
- Improved service to referring physicians by instantly generating a customized physician follow-up letter upon report confirmation.
- Once the physician signs the report electronically, the document is distributed, electronic charge sheets are automatically completed with codes, and automatically correlated with physician reports.
- Physician reporting modules are also available for Nuclear and Echo physicians.

Requirements

- Centricity Cardiology HL7 Interface Package
- Centricity Cardiology Data Management System Application and Interface Servers
- Physician Reporting Modules (Cath, Echo, Nuclear)
