## Web-Based Scheduling Module

Product Sheet

### Overview

This multi-modality productivity tool gives networked users the time-saving convenience of remotely scheduling procedures and monitoring their progress via the Web, in addition to helping busy cath labs better manage resources. The Web-Based Scheduling Module can function as a dynamic electronic whiteboard, providing timely patient updates automatically, while addressing HIPAA concerns for patient privacy.

### Features and Benefits

- Multi-modality capabilities facilitate streamlined workflow throughout the healthcare enterprise.
- Fast and accessible procedure queries, from any order entry system, provides the up-to-date information you need, when you need it.
- Flexible configuration capabilities permit customized privacy and display settings, facilitating adherence to individual hospital's privacy policies.
- Unique scheduling features allow you to enter patient into procedure waiting list without having a reserved time slot, enhancing workflow efficiencies.

### Requirements

- Centricity<sup>®</sup> Cardiology Data Management System Administrative Server; or
- Centricity Cardiology Data Management System Application Server and Interface Server
- Web-Based Scheduling Module
