

GE Healthcare Technologies

GE Design Certified MR Cassette® "Mini Clinic"

Open, HD, HDx 1.5T & 3.0T

SPEED in delivering a building for MR imaging services; **SIMPLICITY** in sitework, building installation, and building removal; **SINGLE SOURCE** services in providing a fully installed MR system delivered in a modular building for "plug & play" use; **COST CONTAINMENT** in project planning expenses and site construction expenditures; **COMPLIANCE** with Federal, State, local and Health Department codes; an **INSTITUTIONAL CODE** module for hospital inpatient use; GE tested superior **IMAGING QUALITY** in a *relocatable* or *movable* modular building; and, a **GUARANTEED RESIDUAL VALUE** through a building buyback program* describes the unique **VALUE ADDED** features of the GE Design Certified Modular Building Program.

The USA Trademarked Cassette buildings are the only Underwriters Laboratories, Inc., (UL)® classified material component and UL classified component design modular structures on the market. GE Cassette buildings are the only fully *relocatable* modular buildings available on the market.

Begin your architectural planning process today for your permanent building. Take delivery of your own MR system in 12 weeks in a GE Cassette building. Simply "transplant" your MR system and redeploy or return the Cassette building. How more "lean" and cost effective can it be to bringing tomorrow's MR technology to your patients today!
