

Learn from

the Masters

With hands-on, in-person training, GE Healthcare offers on-going learning opportunities for technologists and radiologists – so you can maximize your potential.

Like it or not, you'll never know all there is to know about MR. No one will. But by sharing information, we can maximize the amount we learn – not to mention the speed. That's why GE Healthcare is pleased to offer Masters Courses – where you can interact with MR thought leaders and learn insightful

information that you can put to immediate use. These courses have been in high demand and new courses are being investigated. Interested in signing up? Visit www.gehealthcare.com/usen/mr/education/index.html. Or call 262 521 6420. But hurry, space is limited! ■

For Physicians

Physics and Clinical Applications with William G. Bradley, MD

San Diego, CA
April 27-May 1, 2009
July 6-10, 2009
