## DINAMAP Adds Value to Centricity Physician Office

**Upload vital signs efficiently and accurately with DINAMAP ProCare**

Manually entering vital signs into your Centricity® Physician Office Electronic Medical Record (EMR) Encounter form takes valuable time away from patient care and increases the potential for error. Now caregivers can automate the data entry process by using Centricity Physician Office EMR (formerly Logician®) in conjunction with DINAMAP® ProCare patient monitors to save time, reduce errors and increase efficiency.

- Reduce time – Automatically capturing and uploading vital signs from the patient monitor to the Encounter form can reduce acquisition and data entry time by as much as 40 percent.
- Reduce errors – Data entry errors can be virtually eliminated, giving you confidence that vital signs are captured and correctly assigned to the patient's chart.
- Increase efficiency – Uploading vital signs information automatically and electronically eliminates the need for paper and streamlines the charting process.

### The value of DINAMAP

DINAMAP ProCare is easy to use. Its single-button features eliminate extensive training and pull-out help cards are always available. With a 25-year track record of delivering exceptionally accurate blood pressure readings, DINAMAP provides the reliability you demand.

DINAMAP offers blood pressure, pulse oximetry and fast temperature all in one monitor. Choose from gold standard Masimo®, and Nellcor® SpO<sub>2</sub> to assist with patient conditions such as asthma and RSV, and IVAC® Turbo•Temp™ for speedy, accurate oral temperature readings in fewer than seven seconds.

Accurate vital signs are vital to quality patient care. Connecting DINAMAP ProCare with Centricity Physician Office EMR allows caregivers to spend more time with patients while maximizing the benefits of the electronic medical record.
