RE: End of Parts Availability for CardioLab Legacy computers (Intel 60/90)

Dear Prucka CardioLab customer,

As of December 31, 2001, parts support for your Prucka CardioLab – Intel 60MHz and 90MHz computers will no longer be provided. This decision is necessary due to the age of the equipment and spare part availability.

This announcement is part of the end of life notification for this equipment; however, GE Medical Systems is offering our customers an upgrade path to our new platform the Prucka CardioLab 7000 system based on the Windows NT operating system.

We would like to encourage you to speak with your local GE Medical Systems sales representative to learn more about upgrading your current system, so that we may continue to support you at the highest level possible.

GE Medical Systems is also offering two other alternatives for your existing Prucka CardioLab systems, which may be suffering from any technical issues:

1. In service the computer and attempt to repair it if parts are available.
2. Or replace the computer with a newer refurbished model.

If you would like to explore your options further, please feel free to contact your sales person at 800-558-5544.

Sincerely,

Sachin Vadodaria
