

Life Systems Services, On-site Repair Parts

Creating Point-of-Care solutions that meet your needs

Anesthesia equipment downtime can cost your hospital thousands of dollars. You need equipment service that is all about faster response and resolution times. Help improve productivity and increase your anesthesia system availability.

Streamline your repair process with on-site replacement parts

When system availability is at stake, waiting for replacement parts can seem like an eternity – especially when downtime equates to significant income loss from idle operating rooms. With GE Healthcare's On-site Parts Inventory, you don't have to wait for parts. We provide a customized spare parts kit at your facility, ready for use by you or a GE Healthcare field engineer.

Immediate access to repair parts inventory

GE Healthcare builds a customized spare parts kit for each location based on your specific anesthesia system configuration and business needs. Kits should be placed in a secure location at your site. If your agreement also includes repair parts coverage, we'll send you any spares you consume in order to replenish your stock. All at a fixed flat fee.

Benefits

- Help increase system availability with instant access to spare parts.
- Spare parts kits are tailored to your specific requirements.
- Protects against increases in the price of parts over the life of the contracts.
- Focus on your clinical practice instead of your spare parts inventory.
- Preserve capital and manage your budget and cash flow.

GE Healthcare - Confidence you can count on

Our on-site spare parts offering makes it easy for you to source and secure genuine GE Healthcare parts – without the potential for alternate source substitution or out-of-stock issues that could arise with a third-party provider.

Based on our extensive repair history and deep knowledge of machine components we know which spares are critical for maintaining high equipment uptime, and they are included in your kit. Please call your service representative to learn more.

Life Systems Services Value Promise

Fast service response time — With over 180 local Field Service Engineers, we ensure fast response times and local service.

High technical competency — Our engineers average 12 years service experience and remain up-to-date on new equipment and technology.

Full parts coverage — We only use GE parts. No substitutions. Our full parts coverage option maximizes equipment performance with predictable life cycle costs.

Clinical and technical education — Excellent support and training helps customers provide better patient care.

A team of professionals who care — When surveyed, 95% of Life Systems Services customers would recommend GE Healthcare service to a colleague.

At GE Healthcare Clinical Systems Services, we help you get to the point of care.

Every day 15 million patients around the world are touched by what we do.

Because of this, we know that every interaction counts, and that your reputation is your single biggest asset.

And at GE Healthcare, we thrive on transforming essential services into extraordinary outcomes for your people, processes and products.
