CARESCAPE Enterprise Access

An exceptional DAS solution

Reliable. Secure. Flexible.

HOSPITAL

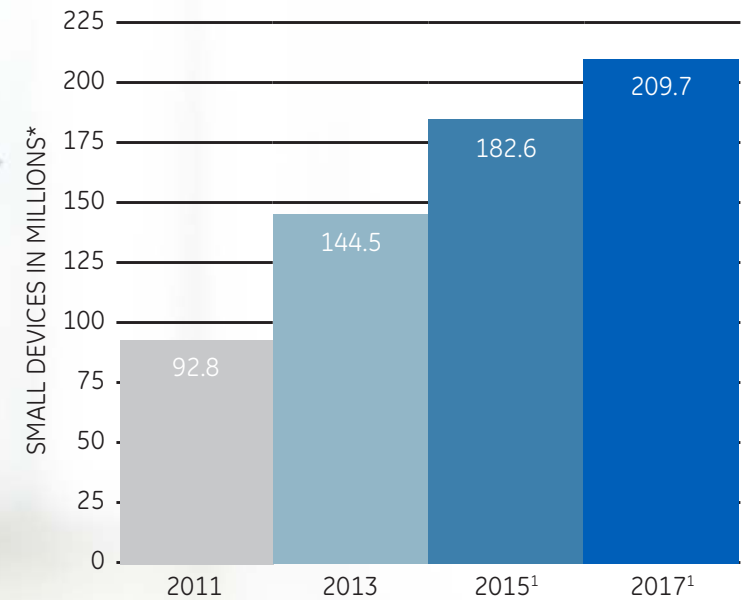

Use of smart devices keeps growing. Can your network handle it?

High-quality patient care depends on fast, reliable communications, increasingly through smart phones and other wireless devices.

You need to provide a comprehensive communications network that offers uninterrupted coverage for all departments, clinicians, patients and their families, regardless of what device they're using or where they are located within the hospital.

Reliability, flexibility and security are of the utmost importance. You want your new system to require minimal maintenance and remain scalable and vendor neutral so it can continue to meet your enterprise's growing needs. And you need this solution to fit within your budget.

CARESCAPE Enterprise Access

An exceptional DAS solution.

CARESCAPE™ Enterprise Access is a distributed antenna system (DAS) that brings cutting-edge communication infrastructure to your hospital. Our DAS solution coordinates the seamless integration of cellular communication networks, medical telemetry, public safety and other networks to better harness and distribute clinical information. Reliable cellular coverage is important for doctors and clinical staff and for patients and their families too.

With nearly a decade in the DAS business installing and servicing strictly hospitals, GE offers:

- Expertise in providing a vendor-neutral, scalable solution that can support ApexPro™ telemetry devices
- Seamless onboarding of wireless providers
- Funding options to accommodate virtually any budget
- Optimized uptime and quality service

*Figures as of January 2015

Scalable system that can easily onboard any carrier.

We know hospitals. Your clinicians, patients and their families are increasingly relying on wireless technologies to communicate with each other. Your clinicians rely on it to access clinical intelligence across and beyond the boundaries of the hospital. Your patients and their families rely on it for their communication needs. Patient and clinician satisfaction and high-quality patient care depend on it.

At GE Healthcare, we develop comprehensive DAS solutions, install them, maintain them and manage the carrier relationships during on-boarding. Our robust systems can support your WMTS, voice, data, telemetry and public safety radio services and, more importantly, smart phone service.

Plus it is scalable and modular to support added coverage areas or new services as your requirements change over time. Our 'wire it once' approach reduces costs and minimizes disruptions.

Trustworthy, reliable and easy to manage.

Keeping your CARESCAPE Enterprise Access system performing at its peak with maximum uptime is critical. Our exclusive remote Systems Manager software actively monitors your infrastructure and alerts you to performance issues. The system can be fully managed by your IT staff, or GE's Remote Operations Center can service your system for you.

And to make sure that your DAS is always performing optimally, we continually update our service support packages and provide ongoing training to our field engineers and technical specialists.

Financial resources constrained? No worries.

By leveraging your existing network and the different funding options GE offers, the purchase and installation of the CARESCAPE Enterprise Access system can be surprisingly affordable.

Our experts will partner with you to ensure that the solution your hospital needs works within your budget.

Enjoy cutting-edge DAS technology that is reliable, secure and flexible.

CARESCAPE Enterprise Access supports:

Mobile

- Smart devices
- Multiple wireless systems at different frequencies: 800, 900, 1800 and 1900 MHz cellular and PCS services
- Multiple wireless providers on a single system

Public Safety

- 700 and 800 MHz public safety frequencies
- Two-way radio

WMTS Telemetry

- ApexPro CH and ApexPro FH Telemetry systems
- Field coverage redundancy should an antenna and antenna field fail

Does your hospital have the secure, reliable network clinicians, patients and their families demand?

The CARESCAPE Enterprise Access solution delivers.

GE Healthcare provides transformational medical technologies and services that are shaping a new age of patient care.

Our broad expertise in medical imaging and information technologies, medical diagnostics, patient monitoring systems, drug discovery, biopharmaceutical manufacturing technologies, performance improvement and performance solutions services help our customers to deliver better care to more people around the world at a lower cost.

In addition, we partner with healthcare leaders, striving to leverage the global policy change necessary to implement a successful shift to sustainable healthcare systems.
