Imaging through the eyes of a child

When young patients feel anxious, they often have difficulty lying still during imaging procedures, which can affect the completion of the scan.

With the Adventure Series program, we can engage children to help improve their coping skills and reduce anxiety levels, leading to much better cooperation during the procedure.

This, in turn, may reduce the need for sedation, increase the chances of a successful scan and help reduce the need to rescan the child or reschedule the appointment.

Now children can experience a thrilling adventure while they get their exam!

Put children first with the GE Adventure Series, an experience designed to make imaging more inviting for pediatric patients. Through themed imaging rooms, GE Healthcare leverages captivating characters, lush visuals, and hands-on activities to enhance the imaging experience for the children, their families and the hospital staff.

“I realized that we needed to help children have less anxiety when experiencing an imaging scan and decrease their need for sedation. Our goal in creating Adventure Series was to harness the power of children’s imaginations for the better so they could feel less worried for the entire scan experience.”

– Doug Dietz, GE Adventure Series Designer

“Watching my daughter come out of sedation after her scan was awful. I wish we could have avoided that.”

– Parent of a young child who needed a CT scan

*Statement based on anecdotal information gathered from facilities who have utilized the Adventure Series product at their facilities. Substantive clinical data not available.
The big impact for Children’s Hospital has been for patient sedation rates, down to less than 1 every 2 months. “We have one of our MIBG patients that we do quite routinely and had to be sedated previously. Now he thinks he is going on a boat ride. He gets right up on the table and lies there and falls asleep now. For this particular patient, we have been able to do his whole scan, including the CT, without sedation” adds Ms. Talley. “We are the envy of radiology, everyone wants what we have.”

– Katie Talley, Children’s Hospital OU Medical Center

“The biggest change has been decreasing anxiety levels to the point where children are excited to go to the exam room and get their imaging scan.”

– Kathleen Kaspin, R.T., M.S., Children’s Hospital of Pittsburgh UPMC

“The success of the Adventure Series program really speaks for itself. Almost half of the facilities install multiple rooms immediately and 30% of our facilities have chosen to add more after the initial adventure is installed.”

– Tom Parpart, GE Adventure Series Manager

†† Sedation rate results may vary. Not every hospital will see a decrease in sedation rates, particularly to this level, but three customers have reported a decrease in the level of sedation rates occurring at their facility when utilizing the Adventure Series. Many factors beyond the use of Adventure Series can impact whether a reduction of sedation rates will occur at your facility.
Stand out in the crowd
Advertise and promote your Adventure Series to families and referring physicians in your area with our marketing tool kit of promotional materials.

A sample of a few of the ads you will find in the marketing tool kit.

Patient pamphlet
Create the experience
The GE Adventure Series provides the setting for a great story to help ease the patient through the scan procedure. As part of the product offering we include the Explorer’s Handbook. On this CD, you’ll find a set of tools for you to use to guide your young patients on a wide array of adventures, which may help you get the scan you need. For example, in the Field Guides, we have provided some tips and suggestions on how to create a narrative that can enrich the experience and may help ease patient anxiety. We encourage you to take a moment to explore the room from a child’s perspective and create roles that you both can play.

Your imagination is the final component. With it, the possibilities could be endless.

The Adventure Series Explorer’s Handbook includes the artwork for:

Field Guides that offer tips and tricks for creating the adventure stories to help patients feel more comfortable during the scan.

Coloring Books that engage young patient’s creativity while educating them on what to expect from the scan procedure.

Start your own adventure today
There is a story ready to be written. It’s the story of your facility taking steps to become a leader in child-friendly imaging. And GE Healthcare is here to help you get started. We’ll show you how you may use Adventure Series themes to enhance the imaging experience for patients, families, and your hospital staff as well.

GE Adventure Series – Customized Rooms

The GE Healthcare Design team will work with a small group of your hospital staff to create a custom layout and select themed graphics from the existing catalogs, or at times, create new appliques that fit the space and flow of each room.
In today’s crowded markets, standing out and creating a unique patient experience can be a key to success. While Adventure Series provides a range of creative options to choose from, GE Healthcare understands that some discerning facilities desire something even more unique.

For those of you seeking a product experience custom tailored to you and your facility, we are pleased to offer you the ability to customize your Adventure Series room. GE Healthcare will work with you through the custom design process to create the experience you envision.

Adventure Series can be customized for the following spaces:

- Scan rooms
- Hallways
- Waiting rooms
- Uptake rooms
- Cafeterias
- Stress Lab
- Exam rooms
