

Are your labor and delivery transducers reliable when you need it most?

Corometrics™ Nautilus Nine-Crystal transducers help provide reassurance and support

Available directly from GE Healthcare, Corometrics transducers are available for replacement throughout the life of your Corometrics monitor. The combo transducers, for ultrasound and toco, offer a novel combination of both button and loop connection. The transducers are designed to support minimal repositioning even with patients of varying BMI and gestational age.

Not all transducers or transducer repairs are compatible with your Corometrics monitor. Corometrics Nautilus transducers are the only verified transducers for use with Corometrics 250cx and 170 series monitors.

Includes a 2-year warranty.

Ultrasound transducer button and loop

Part number: 2108346-001

Toco transducer button and loop

Part number: 2108347-001

Abdominal belt

Part number: 2105827-001; 10/Pkg

Part number: 2105919-001; 200/Pkg

- Calling Customer Service at (800) 437-1171, option 2, then 3

Patient Comfort

The flat toco transducer is designed for increased comfort and is watertight for cleanability and in-water use.*

Parameter Excellence

Nine-crystal technology helps achieve a wide focal region for more uniform coverage at greater depths.
