

Speed up your diagnosis

Seno Iris™

Get ready for a new way to make the most efficient use of essential new breast imaging technologies – the new Seno Iris workstation from GE Healthcare.

With Seno Iris, you'll be able to:

- **Read your images in one uniform display.** Review images from nearly any digital mammography, breast tomosynthesis or computed radiography system, regardless of manufacturer.
- **Quickly and easily explore your GE 3D images.** Tap into a full suite of advanced reading and workflow tools.
- **Simplify your day.** Minimize clicks and repetitive tasks using the streamlined interface with customizable personal settings.
- **Upgrade your existing reading workstation** hardware with the software-only option.

Efficient Insight. Empowered Diagnosis.

Seno Iris is built to handle data-intensive digital breast tomosynthesis images with ease. So you can take full advantage of this technology to put patients on the right path of care.
