Products: Mac-Lab IT/XT/XTi, CardioLab IT/XT/XTi,
SpecialsLab and ComboLab IT/XT/XTi
Recording Systems, Centricity Cardiology Data
Management Systems

Version: 6.9.6 Release 2

Subject: Security Information

Date: 18 March 2020

Summary

The following information is provided to GE Healthcare Technologies customers in regards to known technical security vulnerabilities associated with Mac-Lab® Hemodynamic, CardioLab® Electrophysiology, SpecialsLab and ComboLab IT Recording Systems for Cath Lab, EP Lab and other interventional labs as well as the Centricity® Cardiology Data Management Systems.

Security Patch Base Configuration

The security patch base configuration of the Mac-Lab IT/XT/XTi and CardioLab IT/XT/XTi product at release is listed within the MLCL Base Configuration under the Hemodynamic, Electrophysiology and Cardiovascular Information Technologies section of the http://www3.gehealthcare.com/en/Support/Invasive_Cardiology_Product_Security website.

Process

The following actions are taken whenever Microsoft/OEMs releases new security patches:

- The Invasive Cardiology Engineering Team performs a security analysis process for supported Mac-Lab IT/XT/XTi, CardioLab IT/XT/XTi, GE Client Review and INW Server hardware/software.
- If a vulnerability meets Mac-Lab IT/XT/XTi and CardioLab IT/XT/XTi validation criteria, the vulnerability is communicated through the GEHC Product Security Database and Invasive Cardiology Security Website within Three weeks of the patch release.

GE Healthcare

- Upon validation of the Mac-Lab IT/XT/XTi and CardioLab IT/XT/XTi vulnerability, the GEHC Product Security Database and Invasive Cardiology Security Website and affected Mac-Lab IT/XT/XTi and CardioLab IT/XT/XTi Security Patch Installation Instructions are updated.

The Mac-Lab IT/XT/XTi and CardioLab IT/XT/XTi vulnerability validation criteria are as follows: Any vulnerability that allows malware to alter or deny Mac-Lab IT/XT/XTi and CardioLab IT/XT/XTi functionality and/or infect and propagate through normal system use.

Customers are responsible to stay informed with Microsoft vulnerability notifications and to visit the Invasive Cardiology websites to understand the Mac-Lab IT/XT/XTi and CardioLab IT/XT/XTi impact. Once a security patch is validated, customers are responsible for the installation of security patches. All Mac-Lab IT/XT/XTi and CardioLab IT/XT/XTi Security Patch Installation Instructions are available on the Invasive Cardiology Security Website below the Validated Patches table.

Vulnerabilities exposed after the Mac-Lab IT/XT/XTi and CardioLab IT/XT/XTi product release which do not meet the criteria to be validated are not listed within the GEHC Product Security Database and Invasive Cardiology Security Website. These vulnerabilities are deemed to be non-critical and/or outside normal clinical workflow of the Mac-Lab IT/XT/XTi, CardioLab IT/XT/XTi and Centricity INW systems and will not be validated. Unlisted patches should not be installed on the products in order to eliminate malfunction and breakdown risks.

Installation of the Security Patches on MLCL systems

Requirements:

- Updates may be applied at any time other than while the Mac-Lab IT/XT/XTi, CardioLab IT/XT/XTi or SpecialsLab application is open.
- Updates must be re-applied if the system is re-imaged.
- Updates apply to both networked and standalone systems.
- Best practice is to update all applicable MLCL systems at the site.

This document applies to 6.9.6R2 only. Please verify that you are running 6.9.6 using the following procedure before proceeding:

1. Launch the Mac-Lab CardioLab application.
2. Select **Help > About Mac-Lab** (or **CardioLab**, as applicable).
3. Verify the version number is **6.9.6 Release 2**.

GE Healthcare

4. Click **Close**.
5. Close the application.

Recommendation: Use Internet Explorer (IE) for Catalog download. If you are using the cart feature to download patches, to see the cart it requires opening another tab or new window for <http://catalog.update.microsoft.com>

How to Log On to Acquisition and Review Systems

When starting up an Mac-Lab, CardioLab or SpecialsLab Acquisition or Review system, an auto-logon sequence starts and automatically logs on to the operating system. To install a security patch, the user must be logged on as **mlcltechuser**.

NOTE: Password information is contained within the Security Guide Manual. Otherwise, contact the system administrator or GE Technical Support for current password information.

1. Power on the Acquisition system.
2. The system boots up to the **Custom Shell** screen.
3. Press **Ctrl + Action + Del**.
4. Click **Logoff**. On Windows XP, click **Logoff** again.
5. Click **OK**.
6. Immediately hold down the **Shift** key until the login window is displayed.
7. Log on to the operating system locally as **mlcltechuser**.
8. Log on to the **Custom Shell** locally as **mlcltechuser**.

How to Log On to the Centricity Cardiology INW Server

Password information is contained within the Security Guide Manual. Otherwise, contact the system administrator or GE Technical Support for current password information. Logon to the INW Server as **administrator**

How to Log On to MLCL Software Only Systems

Since Software Only systems are supported by the customer, the system needs to be logged into with an **administrator** account.

CVE-2019-1181/1182 | Remote Desktop Services Remote Code Execution Vulnerability

We are in the process of qualifying the patch that addresses this vulnerability however, we recommend as a mitigation, that the RDS/Terminal Service is disabled on all ML/CL systems. Refer to the instructions below on disabling the service.

Disable Remote Desktop Services on Windows 7

On Windows 7, do the following to disable Remote Desktop Services:

1. Right-click on **Computer** and select **Properties**
2. On the **System** window, click **Remote settings**
3. Uncheck the following option if it is checked:
Allow Remote Assistance connections to this computer
4. Select the following option if it is not already selected:
Don't allow connections to this computer
5. Click **OK** to close the **System Properties** window
6. Click **Start > Control Panel > Administrative Tools > Services**
7. Double-click on the entry for **Remote Desktop Services**
8. Set the **Startup type** to **Disabled**
9. Click **OK** to close the **Remote Desktop Services Properties** window
10. Reboot the system

Disable Remote Desktop Services on Windows 2008 R2

On Windows Server 2008 R2, do the following to disable Remote Desktop Services:

1. Right-click on **Computer** and select **Properties**

GE Healthcare

2. On the **System** window, click **Remote settings**
3. Uncheck the following option if it is checked:
Allow Remote Assistance connections to this computer
4. Select the following option if it is not already selected:
Don't allow connections to this computer
5. Click **OK** to close the **System Properties** window
6. Click **Start > Administrative Tools > Services**
7. Double-click on the entry for **Remote Desktop Services**
8. Set the **Startup type** to **Disabled**
9. Click **OK** to close the **Remote Desktop Services Properties** window
10. Reboot the system

How to Install Printer Firmware

The system which will apply the firmware to the printer should be provided by the customer.

NOTE: Mac-Lab CardioLab system should not be used to download and/or apply the Printer Firmware.

- Follow the download link in the table
- Select the appropriate printer
- Select English and the applicable MLCL operating system
- Select English and under the Firmware category select the applicable Firmware Update Utility and Click Download
- Launch the firmware installer and follow the instructions to complete the firmware update

OPTIONAL – Removal of Authenticated Users from Share on INW server

Pre-requisites:

1. Authenticated Users on INW systems must be removed only on INW servers.
2. Authenticated Users on INW systems must be removed only on **Studies** directory located in **D:\GEData\Studies** path.
3. The following MLCL systems Groups should be added to the **Permissions** of **D:\GEData\Studies** directory:
 - a. **MLCLAdmGrp**
 - b. **MLCLSystemGrp**
 - c. **MLCLUsrGrp**
 - d. **SYSTEM (Member Server only)**

Steps to remove Authenticated user

1. On the INW Server, run Windows Explorer.
2. Browse to **D:\GEData**.
3. Right-click on the **Studies** directory and select **Properties**.
4. Select the **Sharing** tab.
5. Click the **Advanced Sharing** button.
6. Click the **Permissions** button.
7. In the **Group or user names** list, select **Authenticated Users** and click **Remove**.
8. Click **Add**.
9. Enter the following group names and then click **OK**: **MLCLAdmGrp**; **MLCLSystemGrp**; **MLCLUsrGrp**.
10. In a Member Server environment *only*, do the following:
 - a. Click **Add**.
 - b. Click **Locations**, select the name of the INW Server in the **Location** tree, and click **OK**.

- c. Enter the name **SYSTEM** and then click **OK**.
11. Select the group **MLCLAdmGrp** and, in the **Allow** column, check the **Change** box.
12. Select the group **MLCLSystemGrp** and, in the **Allow** column, check the **Change** box.
13. Select the group **MLCLUsrGrp** and, in the **Allow** column, check the **Change** box.
14. In a Member Server environment *only*, do the following:
 - a. Select the group **SYSTEM** and, in the **Allow** column, check the **Change** box.
15. Click **OK** to close the **Permissions** window.
16. Click **OK** to close the **Advanced Sharing** window.
17. Click **Close** to close the **Properties** window.
18. Reboot the server when there are no cases in progress.

OPTIONAL - Remote Desktop Services Remote Code Execution Vulnerability

We recommend that the RDS is disabled on all ML/CL systems if not in use. Refer to the instructions below on disabling the service.

Disable Remote Desktop Services on Windows 7

On Windows 7, do the following to disable Remote Desktop Services:

1. Right-click on **Computer** and select **Properties**
2. On the **System** window, click **Remote settings**
3. Uncheck the following option if it is checked:
Allow Remote Assistance connections to this computer
4. Select the following option if it is not already selected:
Don't allow connections to this computer
5. Click **OK** to close the **System Properties** window
6. Click **Start > Control Panel > Administrative Tools > Services**

7. Double-click on the entry for **Remote Desktop Services**
8. Set the **Startup type** to **Disabled**
9. Click **OK** to close the **Remote Desktop Services Properties** window
10. Reboot the system

Disable Remote Desktop Services on Windows 2008 R2

On Windows Server 2008 R2, do the following to disable Remote Desktop Services:

1. Right-click on **Computer** and select **Properties**
2. On the **System** window, click **Remote settings**
3. Uncheck the following option if it is checked:
Allow Remote Assistance connections to this computer
4. Select the following option if it is not already selected:
Don't allow connections to this computer
5. Click **OK** to close the **System Properties** window
6. Click **Start > Administrative Tools > Services**
7. Double-click on the entry for **Remote Desktop Services**
8. Set the **Startup type** to **Disabled**
9. Click **OK** to close the **Remote Desktop Services Properties** window
10. Reboot the system

Patch Links

The patches displayed below are qualified on an independent basis and can be installed on a one-by-one basis, although it is recommended that all qualified patches are installed. There are dependencies within the qualified patch list. In the table below, it is recommended the patches are installed in order from top to bottom to ensure all pre-requisites are met for all patches. On occasion the patch dependencies require system reboots which are identified in the table below.

NOTE: Due to site configurations, system patch set, qualified patches which have been installed previously or patch dependencies, some patches could fail to install due to the functionality is already installed. The Microsoft patch installer will alert you to this issue. If this occurs, please continue with the next patch installation.

Alternate Patch locations: In early 2016 Microsoft announced that some patches would no longer be available on the Microsoft Download Center <https://blogs.technet.microsoft.com/msrc/2016/04/29/changes-to-security-update-links/>. Therefore, some of the links provided below may not work. Microsoft may move/remove these links at any time without notice. However, if the links do not work, there are two alternate methods for downloading patches. The first is the Microsoft Catalog <http://catalog.update.microsoft.com>. Most fixes not on Microsoft Download Center will be available from the Microsoft Catalog. If a fix is not available from the Microsoft Catalog, Microsoft has monthly ISO files of the security updates available at <https://support.microsoft.com/en-us/kb/913086>. To use the ISOs, determine the month of the patch, download the applicable ISO and extract the patch. If after exhausting all three methods, you are still unable to obtain a patch, please contact GE Technical Support for further assistance.

6.9.6 Installation Paths

There are multiple installation paths depending on the version of 6.9.6 installed and any previous patches which have been installed. The following information will help guide you through correct installation path

Determine which version of 6.9.6 you are running. This can be done from the Mac Lab/Cardio Lab application. Go to Help/About and you will see the Release number. The release number combined with the installation scenario will determine the correct path.

Note: The section MLCL Optional Security Updates can be applied after all other patches/updates have been applied. The optional updates provide additional security but are not required. You may apply some of the optional patches but chose to bypass others. For example, you may want to disable some of the vulnerable protocols by you may not want to address Weak Hashing due to cost and complexity of certificate management. This will not cause problems. However, **all other updates are strongly recommended.**

GE Healthcare

Some updates are documented as **superseded**. These are left in the document for completeness but can be skipped.
The following sample scenarios are provided for reference.

- (1) New Setup/Reimage a machine for disaster recovery.
 - (a) For 6.9.6 R2 Apply the updates from the following sections
 - (i) MLCL v6.9.6 R2
 - (ii) MLCL V6.9.6 2017 Patch Updates 1
 - (iii) MLCL V6.9.6 2017 Patch Updates 2
 - (iv) All subsequent patch updates
- (2) The machine was setup and initially patched but no subsequent updates have been applied.
 - (a) For 6.9.6 R2 Apply the updates from the following sections
 - (i) Verify that all patches from section **MLCL v6.9.6 R2** have been applied. Install any unapplied patches
 - (ii) MLCL V6.9.6 2017 Patch Updates 1
 - (iii) MLCL V6.9.6 2017 Patch Updates 2
 - (iv) All subsequent patch updates
- (3) The machine was setup and all previous patches have been applied
 - (a) For 6.9.6 R2 Apply the updates from the following sections
 - (i) MLCL V6.9.6 2019 Patch Updates 8 (This assumes that all previous updates have been applied periodically)
 - (ii) All subsequent patch updates

MLCL V6.9.6 2017 Patch Updates 1

The following patches bring the MLCL system to a more recent patch level and address several security vulnerabilities. The following guidelines apply:

- 1) The above patches are required patches for 6.9.6 and must be applied first.
- 2) It is expected that some patches listed will already be on the system.
- 3) Pay attention to the Notes section for special handling instructions
- 4) Patches must be applied in order except where indicated.
- 5) Reboots are only required where indicated. If a Patch requests a reboot at another point, the system can be rebooted but it is not required.

MLCL V6.9.6 2018 Patch Updates 4

The following patches bring the MLCL system to a more recent patch level and address several security vulnerabilities. The following guidelines apply:

- 1) The above patches are required patches for 6.9.6 and must be applied first.
- 2) Pay attention to the Notes section for special handling instructions
- 3) Patches must be applied in order except where indicated.
- 4) Reboots are only required where indicated. If a Patch requests a reboot at another point, the system can be rebooted but it is not required.

Refer to the above links for the following previously qualified patches KB2862330, KB2957189, KB2992611, KB4022719, KB2979596 and KB3045311.

NOTE: KB2979596 should be applied first before KB3045311

These patches were previously qualified but not listed. Please apply these patch to the virtual review system other systems do not require these patches to be installed separately. In case you receive a message like "Not applicable to the computer" ignore, that is an indication that the patch already exist on the system.

Follow these steps to make the following registry changes to remediate June and September monthly rollup vulnerabilities.

MLCL V6.9.6 2019 Patch Updates 7

The following patches bring the MLCL system to a more recent patch level and address several security vulnerabilities. The following guidelines apply:

- 1) The above patches are required patches for 6.9.6 and must be applied first.
- 2) Pay attention to the Notes section for special handling instructions
- 3) Patches must be applied in order except where indicated.
- 4) Reboots are only required where indicated. If a Patch requests a reboot at another point, the system can be rebooted but it is not required.

MLCL v6.9.6 Optional Security Updates

The following optional updates may be applied to further enhance the security profile of the MLCL systems. These updates should be evaluated on a site-by-site basis in accordance with local IT policy. The configuration changes in this section are compatible with MLCL product functionality but may introduce site specific IT impact as a result of disabling of legacy SSL protocols, prohibiting remote desktop usage and requiring certificate generation and maintenance.

Password Policy: Minimum Password Length may be changed above the 14 characters limit to meet security requirements. Refer to **Password** section of the Security Guide for further details about changing passwords.

Optionally Remove Abode Reader on INW Server

We recommend that abode reader be uninstalled on the INW Server. On the server Adobe reader is only used to review INW operator manual. The manual is available in printed format and through online manual portal.

Further MLCL Systems Security Recommendations

We strongly recommend following these recommendations:

- Change default password to stronger, more secure and unique for each user account
- Disable RDP in for each system using the following steps:
 - My Computer>Properties>Remote settings>Remote
 - Check “Don’t allow connections to this computer”.
 - Click ok and reboot.

GE Healthcare

- If Insite functionality is not used on the system then turn off the VNC service using the following steps:
 - Click on Start button
 - Click on Control Panel
 - Click on Administrative Tools
 - Double click Services
 - Right Click TightVNC Server and select Properties
 - Under Startup type select Disabled from the dropdown
 - Click on Apply and Ok

We also recommend following these general recommendations and the recommendations listed in MLCL Security guide

- Enhanced physical security
- Network firewalls
- Demilitarized Zones and perimeter defenses for site network
- Intrusion detection systems - network intrusion protection system
- Virtual Private Networks
- Network traffic analysis
- Log analysis
