

GE Healthcare

Maternal-Infant Care Clinical Education Institute

One Trusted Source for Your Education Needs

Today's dynamic and challenging healthcare environment demands that you keep mother and infant safety and risk management a priority. GE Healthcare's education offerings assist healthcare professionals in supporting the specialized needs of patients and families across the entire maternal-infant care continuum.

Our offerings include a wide range of training and education programs to help you maximize your investment in users of critical medical devices, especially fetal monitors, incubators, warmers and phototherapy equipment. Continuing education programs can enhance clinical outcomes and help alleviate other important issues, including staff turnover.

A Deep and Broad Offering

At GE Healthcare, our Maternal-Infant Care Education offerings are flexible and customizable, offered at your facility, in your region or online. Our programs help your staff stay on top of the latest technologies and therapies, to deliver better care, increase patient safety, and ultimately reduce costs.

Do you require specialized training? We can design specific training programs to meet your needs. Also, many of our clinical programs provide nursing contact hours awarded by the California Board of Nursing.

Industry Leading Educators

GE Healthcare ensures that experienced professionals who can adapt training to various learning styles teach our courses. Our Maternal Infant Care Clinical Specialist educators are registered nurses or advanced practice nurses, with more than 10 years of experience in the Newborn, NICU and Labor and Delivery disciplines.

Education and training are provided utilizing a variety of clinical skills tools including as applicable; skills checklists, participant guides, clinical product guidelines, cleaning guidelines, CD/DVD's, and additional clinical reference support tools.

Products include: Corometrics® fetal monitors, fetal telemetry, Giraffe® OmniBed®, Giraffe Incubator, Giraffe Warmer, Giraffe Shuttle, T-Piece resuscitation, Panda® Warmer, UPS, Giraffe Spot PT Lite, BiliSoft® Phototherapy, Infant Warmer Systems, Care Plus® Incubator, Dash®, Solar® and CARESCAPE® monitors for neonatal clinical use.

Clinical Product Education

Our experienced Clinical Specialists guide your staff through proper and effective use of patient equipment and accessories as part of installation or in advanced training options.

Different training options allow for new product basic, Go-Live and advanced clinical education. You can choose the education program that fits your hospital protocols and practice philosophy. Programs include:

At your facility	Basic Clinical Training (Basic and Go-Live)	Clinical Specialist at your facility providing hands-on interactive product clinical staff education with the option for added Go-Live clinical product bedside support. Designed to give clinicians the knowledge to become proficient in using GE systems in Newborn, NICU and Labor and Delivery.
	Master or Super User Training	This onsite training includes advanced clinical training along with extended product training. In addition, these resource clinicians will receive the skills necessary to teach the clinical training skills to new staff members.
	Follow-up or Refresher Training	Hands-on clinical support and additional basic clinical training as needed at the patient bedside. This ensures a smooth transition with repeat equipment purchases, or additional training required after initial installation of the product.
	GiraffeCare Advanced Clinical Training (SpecialCare and ExpertCare)	Advanced onsite education seminars provided by a Clinical Specialist team. These seminars provide unique solutions of the Giraffe® products to create a developmentally and family supportive environment for improved clinical outcomes and simplified care management. Contact hours provided.
In your region	Clinical Connections	Advanced evidence-based education provided by Clinical Specialists off site. This one day course is designed to build on clinical experience and knowledge of the Giraffe and Panda products. Designed for bedside clinicians and educators both experienced and new to nursing. Contact hours provided.
On-line	Online Clinical Training	Interactive, self-paced Web application designed to give clinicians primary proficiencies in system use. The student will receive the skills necessary to teach the Clinical training course to new staff members.
	Clinical Webinar Online and Global	Global online advanced clinical web-based education provided by clinical experts from around the world. These programs provide clinicians with evidence-based research and clinical practice to enhance and standardize care. Supports new as well as seasoned staff, mitigating risks driven by staff turnover. Contact hours available.

Nursing Library of Online Education

Improving patient outcomes. Lowering hospital costs. Retaining your best staff. All of this requires your facility to employ the most current, proven clinical best practices. But nurses often don't have the time to take off-site classes or attend conferences. With the Nursing Library of Online Education from GE Healthcare, nurses can gain the benefit of vital, current information through case-based examples that address real-world challenges, issues and solutions they can apply immediately, without leaving home.

Receive continuing education credit to help meet education requirements for certification and licensure, while learning at your own pace. The Nursing Library of Online Education is available as a one-year subscription to the GE Healthcare Learning System, providing unlimited access for all of the healthcare professionals at your facility. New courses are added regularly. Visit www.gehealthcare.com/NursingLibrary or call 1-877-438-4788 to see the list of courses or for more information.

Electronic Fetal Monitoring Course: Reducing risk through enhanced communication

The Electronic Fetal Monitoring Education Program emphasizes the importance of accurate, consistent communication and interpretation of FHR patterns. This Web-based education course promotes the use of a standardized FHR terminology, helping minimize miscommunication between clinicians while improving patient outcomes. The program reviews actual clinical case scenarios, reviewing and reinforcing NICHD definitions for visual interpretation of FHR patterns.

Developed by nationally recognized fetal monitoring experts Frank Miller, M.D., FACOG and David Miller, M.D., FACOG, this highly interactive, web-based program educates clinicians on the interpretation of FHR patterns using NICHD definitions.

Call 1-877-438-4788 to see how you can educate your entire OB staff or visit our website for additional information and course demos www.gehealthcare.com/fhr.
