GE HealthCare

Who we are

GE HealthCare is a trusted partner and leading global healthcare solutions provider, innovating medical technology, pharmaceutical diagnostics, and integrated, cloud-first AI-enabled solutions, services and data analytics. We aim to make hospitals and health systems more efficient, clinicians more effective, therapies more precise, and patients healthier and happier. Serving patients and providers for more than 125 years, GE HealthCare is advancing personalized, connected and compassionate care, while simplifying the patient's journey across care pathways.

Our four business units

Imaging: We are a global leader in medical imaging with a comprehensive portfolio of scanning devices, clinical applications, service capabilities, and digital solutions. Our Imaging portfolio spans the care continuum and provides critical tools for clinicians, from initial screening and diagnosis, through therapeutic decision-making and monitoring of patient progression.

- **Milestone:** U.S. Food and Drug Administration (FDA) clearance for state-of-the-art deep learning-based technology that enables magnetic resonance (MR) cardiac imaging within a single heartbeat and can help reduce scan time by up to 83%[a].

Advanced Visualization Solutions: GE HealthCare is a global leader in ultrasound, image guided therapies, and interventional solutions with a broad portfolio that spans the continuum of care, including screening, diagnosis, treatment, and monitoring of certain diseases. Our AVS business is focused on designing solutions that are aligned by specialties or care areas for specific clinical workflows to better serve the unique needs of our customers and improve patient outcomes.

- **Milestone**: Pioneered the first handheld ultrasound in 2010. In 2021, we made it wireless and pocket-sized with crystal clear image quality for whole-body scanning and added intuitive software - all in the palm of clinicians' hands.

Patient Care Solutions: A leading global provider of medical devices, proprietary parameters and consumables, services, and digital solutions that acquire and transform complex clinical data into real-time visualization and clinical decision support to ease the way to more confident patient care and improve patient outcomes.

- **Milestone**: FDA clearance for a first-of-its-kind, wireless monitoring solution aiding early detection of patient deterioration.

Pharmaceutical Diagnostics: GE HealthCare is a leading supplier of contrast and radiopharmaceutical imaging agents to the global radiology and nuclear medicine industries. These agents help clinicians assess patients to enable more precise diagnoses, monitor disease progression, and enable better therapy selection. We distribute products globally that help meet patient and procedural needs across a multitude of modalities.

- **Milestone**: Introduced the first and only FDA-approved PET agent for color imaging of amyloid plaque now being used to aid in the diagnosis of Alzheimer's disease in patients with cognitive decline.

Creating a world where healthcare has no limits

- **We are a $19.7 billion business** with approximately 53,000 colleagues and included in the S&P 500, Nasdaq-100 and Fortune 500
- **We execute on our precision care strategy** at the forefront of care delivery across the patient journey, serving 1B+ patients annually and 5M+ installed base equipment
- **We play a central role in healthcare digitization** with 200+ software apps driving breakthroughs in clinical insights
- **We are a leader in an attractive $90B global healthcare market**[c]
- **We are led by an experienced leadership team** with the right strategic vision, including:
  - Peter J. Arduini - President and Chief Executive Officer
  - James (Jay) Saccaro - Vice President and Chief Financial Officer

Our care pathway approach

Our global teams collaborate to deliver products, services and solutions that touch nearly every part of the patient journey across key disease-specific states like cardiology, neurology and oncology. We are innovating to help clinicians improve patient outcomes and reduce the time from diagnosis to treatment.

Innovation

We are a proven innovator with a history of delivering industry firsts to advance the future of healthcare: first full-body CT, commercialization of MR, handheld ultrasound, first and only iso-osmolar contrast medium, first hospital command center, and topping the FDA's list with the most AI-enabled device authorizations of any medtech company, with 100[b]. We are developing new capabilities for the future, leveraging AI and machine learning to connect healthcare workflows across operations, data silos, and analytics.

Trusted partner

Our portfolio of solutions addresses the biggest challenges facing the healthcare industry today, including helping clinicians provide better outcomes, improve operational efficiencies and enhance productivity. These qualities foster trust, loyalty and partnership with our global customer base in approximately 160 countries.
