Apprentice program opportunities

Biomedical Technician Apprentice

As a Biomedical Technician Apprentice, you will respond to service calls under supervision to evaluate, diagnose, perform repairs and planned maintenance on biomedical equipment and drive customer satisfaction through service excellence.

Client Service Technician Apprentice

As a Client Service Technician Apprentice, you will perform various equipment service processes and procedures to drive customer satisfaction and ensure proper functionality of customer diagnostic imaging, Life Care Solutions and biomedical equipment.

Field Engineer Apprentice

As a Field Engineer Apprentice, you will perform various equipment service processes and procedures including troubleshooting issues, implementing repairs and completing preventive maintenance to drive customer satisfaction and ensure proper functionality of diagnostic imaging and Life Care Solutions equipment.

Advantages of the GE HealthCare apprentice program

- 1 **Compensation** and **Benefit** plans are competitive and effective upon start date.
- 2 **Training** curriculum builds skills and competencies required to apply for permanent roles.
- 3 **Mentoring** program strategically partners each apprentice with an experienced field employee.
- 4 **Career Pathing** offers apprentices a line of sight to available opportunities to develop technically and professionally.
- 5 **Networking** opportunities allow apprentices visibility and priority to open roles across the organization.

Program focus

Visit gehealthcare.com/apprentice to learn more.

“My experience in the apprentice program was amazing. I can make a difference in people’s lives, both inside and outside of a healthcare environment, by volunteering in my community, and by being a role model for young women who want to pursue careers in service. All of that has made my job even more fulfilling.”

– Pamela Rivera, Field Engineer

“The apprentice program was a great steppingstone into a great career with GEHC. It allows you to build a working relationship with your mentor and network with amazing colleagues all while receiving hands-on training. I really can’t think of a better way to prepare someone for such a rewarding career!”

– Roger Mares, Field Engineer
