Pair with our clinical educators to **customize a training plan** designed by you and your staff

Facilitate continued clinical growth with continued education that **doesn't interrupt your schedule**

Unlimited access to self-serve courses, triage support and the TiP Elevate user community

Long-term education helps you deliver desired outcomes

It can be difficult to fit training into busy schedules, but continuing education for your technologists is often necessary to reach your desired outcomes.

Does your training program optimize your investment to enhance clinical effectiveness and staff performance without disrupting patient care?

As a step-by-step and credits-based clinical training approach, TiP Elevate helps your staff master systems with minimal disruptions and prepares them to optimize their valuable time in order to attain outcomes you define. And because it is designed to fit your team's schedules, skill levels, learning preferences and department needs, it offers complete flexibility in how and what you learn in order to reach your goals.

TiP Elevate provides you with a pool of credits and the flexibility to decide how you spend your credits. You can choose between personalized on-site training, remote training assistance and classroom-style courses at our headquarters. Unlimited access to self-serve courses, webinars and instructor-led triage support is part of every TiP Elevate package. So is TiP Answerline, a direct line of communication for clinical assistance with one of our specialists. You also gain access to our global online community of radiologists, GE Cares User Community, which enables you to connect, learn, share and stay up to date with the latest clinical trends shared by your peers.

Through these educational tools, TiP Elevate helps you optimize system performance, deliver high-quality imaging and provide great patient care so you can meet your clinical goals.
