

GE HealthCare

# Ultrasound education to meet your needs

**Flexible and outcome-focused, GE HealthCare ultrasound education portfolio empowers users with the tools to help enhance their expertise and increase their clinical experience on their ultrasound system and technologies.**

GE HealthCare's ultrasound onsite and virtual instructor-led education options help users optimize image quality and workflow for women's health, cardiovascular and general imaging ultrasound. Our collaborative and customized approach to education optimizes every aspect of learning to help improve user confidence, asset utilization and patient flow.

Instructor-led, in person education offerings utilize a balanced learning-style approach to enhance comprehension and skill.

*\*Individual and departmental tuitions available*

Virtual education offerings focus on system and technology optimization and utilization with reduced schedule impacts, providing convenient and quality education.

*\*Individual and departmental tuitions available*
