

# Ultrasound resources and support

**GE HealthCare provides resources and virtual support for your ultrasound systems. It allows users to optimize ultrasound system capacity, deliver efficiency, and enhance patient satisfaction.**

With a focus on the outcomes you want to achieve, we package our support tools in a variety of formats to meet your needs. This enables optimal system learning, utilization, and adjustments on your terms.

**Comprehensive quick guides, system user manuals and interactive workflow reviews:**  
Easily accessible to maximize system confidence and utilization.

**The Applications hotline:**  
Connect live with GE HealthCare Clinical Applications Specialists for system and technology operations inquiries.
