

GE HealthCare

Ultrasound training to meet your needs

Flexible and outcome-focused, GE HealthCare's training portfolio allows department leaders to help foster staff engagement, deliver efficiency, and enhance patient satisfaction.

GE HealthCare Ultrasound's onsite and remote instructor-led training options help to optimize image quality and workflow.

Our collaborative and customized approach to training optimizes every aspect of learning to help improve workforce effectiveness, asset utilization, and patient flow.

In-person training: Our tailored applications training is designed to meet the unique needs of your department, ensuring your team gains the skills and knowledge to succeed.

Interactive remote training: Our live applications training is designed to fit your schedule and location. Convenient and effective training to drive success.
