Peter J. Arduini

President and Chief Executive Officer

Peter J. Arduini is President and Chief Executive Officer (CEO) of GE HealthCare, a trusted partner and \$19.7 billion leading global healthcare solutions provider, innovating medical technology, pharmaceutical diagnostics, and integrated, cloud-first AI-enabled solutions, services and data analytics. At GE HealthCare, Peter leads an organization of approximately 53,000 colleagues dedicated to providing integrated solutions, services and data analytics that make hospitals more efficient, clinicians more effective, therapies more precise, and patients healthier and happier.

Peter led GE HealthCare's spin-off from GE in January 2023, among the largest in med-tech history. Under Peter's leadership, the company's growth strategy focused on AI and precision care delivered robust financial results, beating analysts' expectations in its first full year as a standalone company.

Early in his career, Peter spent 15 years with GE HealthCare in a variety of senior leadership roles for domestic and global businesses, including general manager for the global Imaging business. Peter returned to GE HealthCare in 2022 after nearly 16 years in roles of increasing responsibility at other companies.

Peter was president and CEO of Integra LifeSciences from 2012 - 2022, a medical device company specializing in skin regeneration, neurosurgery, reconstructive and general surgery. He joined Integra in 2010 as president and chief operating officer.

Before joining Integra, Peter was corporate vice president and president of Medication Delivery, Baxter Healthcare. He was responsible for a \$4.8 billion global division of Baxter focused on inpatient pharmaceuticals and devices. He began his career in sales and marketing at Procter and Gamble before his first tour at GE HealthCare.

There's no single tool, technology, or solution, but there is one goal: improve clinical outcomes.

Peter serves on several boards, including GE HealthCare, the Advanced Medical Technology Association (AdvaMed) as Chair of the Board, the Bristol-Myers Squibb Company, and the National Italian American Foundation.
