## MAVIG LED Lamps

### MAVIG Surgical Lamp LED 3 SC

- Available as a single-color white LED (SC), but always with a multi-faceted lens system to minimize shadiness in the light field
- The LED light technology of the color composition inside the light source features the merging of the different colored LEDs by a computer calculated optical system with a light guide and faceted lens. The result is light composed of bright white or multi-color as it is dispersed homogeneously over the wound/surgical field. The advantages of this LED technology include excellent color rendition, tissue differentiation and shadow reduction with a goal to reduce surgeon eye strain
- Lights from MAVIG provide up to 160,000 Lux for an optimum illumination of the surgical field and at least 40,000 hours of life span

# MAVIG Configuration Guide

## Suspension Overview

### Suspension Configurations Include:

### Electrical Availability

Each standard column can support only one electrified feature (lamp or monitor holder) and one non-electrical (shield).

If your configuration requires more than one electrical feature contact the Accessories & Supplies team who can work with MAVIG on a custom order request.

# MAVIG Configuration Reference

## Create a Customized Solution

Column Length and Bridge Selection depends on the floor to structural ceiling distance (**DistC**) assuming distance between floor and point B (**DistB**) should remain around **210/220 cm**.

The bridge should be hidden on top of the false ceiling i.e. between the structure ceiling and the false ceiling.

Choose the correct column length- and bridge if needed, to achieve this distance.

Do not forget to subtract additional 10 cm (Dist between B and end of column).

## Column Length and Bridge Selection

Recommended Distance from False Ceiling to Point B should be  $\geq 22.8''$  ( 57.9 cm) to allow full range movement of Extension/Spring Arm without interference from the False Ceiling or Gantry.

## Column Length and Bridge Selection

## Selecting the Ceiling Anchorage

### Bridge – Optional

1. Select the appropriate Bridge if required by the room configuration (refer to Column length and bridge selection on page 19)

Three bridge heights available (select one)

- 200 mm – E63611CV
- 500 mm – E63611CW
- 900 mm – E63611CX

Contact GE HealthCare Global Parts to order the bridge.
