Women's Health family of products

Voluson SWIFT

Voluson S10 Expert

Voluson Expert 22

Voluson E8, E6

Voluson S8 Touch

Voluson P8

As the demand for medical imaging continues to grow, pre-owned systems help meet an important need for those seeking cost effective imaging solutions. With the GE HealthCare GoldSeal refurbishment program for ultrasound, you can feel confident you are purchasing a quality system at a great value that only the original equipment manufacturer (OEM) can deliver.

With thousands of GoldSeal ultrasound systems in service around the world, you know our reputation. You can trust us to provide quality imaging equipment so that you can provide quality patient care.

Confidence comes standard with every GoldSeal system. It will look like a new machine and it will perform like a new machine. We guarantee it.

GoldSeal pre-owned, refurbished systems offer you a smart use of resources, as well as:

- **Selective process:** Stringent selection standards ensure that only those systems with well-known and acceptable service histories qualify for GoldSeal
- **Quality:** Refurbishing completed by OEM factory-trained technicians who ensure all OEM specifications are met
- **One-year warranty:** Same warranty as on most new systems; service contracts available
- **Service/support:** Online assistance with questions, and local service
- **Up-to-date technology:** Refurbishing includes installation of latest possible software release and original OEM parts
- **Training:** Operation and application training is available, with optional CE Tech training credits

Helping meet your imaging needs at an affordable price

Voluson™ Expert 22

The Voluson Expert 22 is a premium imaging platform that combines extraordinary image quality with our superb volume ultrasound technology. The Voluson Expert 22 is for clinical trailblazers who want to continue to set new limits in women's healthcare. Our powerful and adaptive Lyric Architecture combined with unmatched probe technology and progressive imaging tools will help find answers to complex cases earlier. The classic, modern design with AI features supports efficient workflow, increasing satisfaction and daily activities. All this combined with support excellence in service, education, and security.

Voluson E10

The Voluson E10 ultrasound system is designed for the leading-edge women's health practice where complex cases are the rule, not the exception. This advanced imaging platform that combines extraordinary image quality with our innovative diagnostic tools and superb volume ultrasound technology. This new platform has the ability to run the first commercially available curved matrix array transducer designed specifically for women's health exams.

Voluson E8

The Voluson E8 is a premium ultrasound system for your women's healthcare needs, including Obstetrics, Gynecology, Maternal Fetal Medicine and Assisted Reproductive Medicine. Innovations in image quality, automation, transducer technology, and image analysis help give you the extraordinary vision you need to help improve patient care. And the Voluson E8 offers advanced fetal cardiac innovations to help bring innovative care in the first and second trimester.

Voluson S10 Expert

The Voluson S10 Expert helps provide you more of what you need with advanced imaging capabilities, opening new pathways to clinical growth. With the powerful Voluson Core Architecture and access to expert clinical tools, this ultrasound system is as forward thinking as your practice. Combined with proven innovation and true investment value, the Voluson S10 Expert will keep your practice at the forefront of women's health and empower you to provide the best imaging for the care of your patients.

Voluson E6

The Voluson E6 is a powerful system that offers an excellent mix of capabilities for effective and efficient care. This includes extraordinary 2D image quality, outstanding 3D/4D imaging, automation advances, intuitive workflow tools, and a smart ergonomic design. Entry level to the Voluson Expert Series, the Voluson E6 helps give you flexibility, ease of use, and the speed and reliability to manage a robust range of routine obstetric and gynecological exams.

Voluson S8 with Touch Panel

The Voluson S8 with Touch Panel helps you obtain critical answers with clarity and speed to help streamline imaging procedures. Reduce time spent on image acquisition, analysis, and reporting with this vital device's sleek ergonomic design, built-in automation and sophisticated software tools. Spend more time with your patients and your staff, building trust and practice growth.

Voluson P8 Series

The Voluson P8 Series is a cost effective way to join the Voluson family and bring the benefits of high performance ultrasound to your patients. Delivering confident, efficient care across a range of applications including obstetrics and gynecology to labor and delivery, the Voluson Performance Series is well suited for practice growth and demanding patients, operating affordably and reliably for years to come.

Voluson SWIFT

The Voluson SWIFT is designed for simplicity, efficiency and to adapt to its user. It provides exceptional imaging and a broad range of features across a wide variety of applications. Clinically focused software packages for obstetrics, gynecology, reproductive medicine and labor and delivery help to optimize the system for each clinical setting.
