

# Venue™ Family Ultrasound Systems†

Made for Perioperative Anesthesia

†Venue Family, as referenced herein, includes Venue, Venue Go, and Venue Fit™ systems

# Simple. Fast. Precise.

## We're helping you keep patients safe and comfortable in the OR

As a perioperative anesthesiologist, you're focused on performing patient assessments while ensuring patient comfort. We've designed Venue Family ultrasound systems to help you make clinical decisions with confidence and decrease the risk of complications. Venue Family systems allow you to:

- Visualize the nerves and surrounding anatomy quickly and clearly with AI technology
- Enable your fast assessment of endotracheal tube placement, cardiac function, pulmonary function, and aspiration risk
- See needles and guide them exactly where they need to be using advanced needle recognition tools
- Create visual documentation automatically

Whether you're looking for an adaptable model that goes from cart to table to wall, or a console system with a large screen, there is a versatile, robust, easy-to-use Venue Family system made for you.

# Work smarter not harder with AI-enabled tools

Venue Family ultrasound systems are designed to simplify the complex—helping clinicians increase exam efficiency for perioperative patients. Leveraging data and proprietary algorithms, AI-based clinical tools help users of all experience levels confidently make clinical decisions.

## Real-time EF

Enables continuous calculation of real-time ejection fraction without having to conduct an ECG. Capture instant, precise results—within +/- 10 points of experts in 86% of cases.<sup>1</sup>

## Shock toolkit

Facilitates shock evaluation by focusing on key organs linked to patient status: the heart, lungs, and inferior vena cava.

### Associated rapid assessments:

- Auto IVC**  
 Measure IVC collapsibility or distensibility accurately and automatically. **Equivalent to an expert user's ability 87% of the time<sup>2</sup>**
- Auto VTI**  
 The VTI trending function helps clinicians quickly visualize the trend so the next course of action can be determined. **Experience up to 82% time savings<sup>3</sup>**
- Auto B-Lines**  
 Calculate overall lung score in one step. You can also use it with Lung Sweep to highlight B-lines and display the frame with the most B-lines per rib space. **As highly reliable as visual counting<sup>4</sup>**

## cNerve

During the scouting phase, use cNerve to identify the nerve landmark and see it highlighted on the image. **Helps detect and track the nerve in 99% of cases while scanning or reviewing a stored clip<sup>5</sup>**

# Think and act quickly with advanced capabilities

Venue Family systems feature a broad array of tools you can use to help improve patient comfort, increase productivity and throughput, and decrease the risk of complications. Built-in learning helps inexperienced users get up to speed fast, helping elevate department expertise and consistency. Needle-precision guidance helps users easily differentiate between the needle and anatomy to help guide the needle exactly where it needs to be.

## Select the right catheter with catheter to vessel ratio

Supports you in selecting the appropriate sized catheter based on vessel diameter.

## See the entire lung with Lung Sweep

Provides a dynamic, panoramic view of the entire lung.

## Visualize blood flow with Color Flow

Provides a real-time, two-dimensional, cross-sectional view of blood flow.

# Keep moving with an intelligent workflow

The Venue Family systems handle the busywork with protocol management and easy documentation features to provide a visual overview—reducing keystrokes by up to 80%<sup>3</sup> and empowering you to make fast assessments.

## Easy and fast exam documentation

### Lung diagram

Single-view diagram of anatomical lung segments with one-click image storing that automatically calculates the Lung Ultrasound Score (LUSS).

### eFAST diagram

Assess and document patient status, from internal bleeding to pneumothorax.

### Renal diagram

Provides easy follow-up for patients with suspected hydronephrosis.

## See more, faster

### Virtual Convex

Provides a wider field of view so you can visualize larger anatomy structures in a single scan and aims to enhance image quality on linear probes.

### Simple Screen

Remove the clutter and see only what you need to see. This feature allows you to see up to a 39%<sup>4</sup> larger ultrasound image and view only the icons you want.

## Assist training with Scribble

Fast-track training by leveraging a touch-operated pointer and free-drawing capabilities, visible on an external monitor or shared screen.

# Scan with confidence

Now there's a built-in tool to help you capture diagnostic-quality cardiac ultrasound images. Thanks to Caption Guidance™ AI-driven software, even new ultrasound users can capture cardiac images successfully.

## 1 Prescriptive Guidance

See real-time, turn-by-turn guidance that prompts your movements to properly position your probe for the view you want to capture.

## 2 Quality Meter

Watch the meter rise as the image improves and gets closer to diagnostic-quality.

## 3 Save Best Clip

At the touch of a button, Save Best Clip will select the best available image loop from the continuous recording for each view.

## 4 AutoCapture

For cases where you can reach the quality threshold, AutoCapture will automatically save your clip, hands-free. No need to press record to capture your images.

### Guiding you to acquire quality cardiac ultrasound images

Real-time, turn-by-turn on-screen guidance prompts your probe movements to help capture a diagnostic-quality image.

### Scan your way

Customizable scanning protocols allow you the flexibility to select key cardiac views – up to 10. While scanning, you can easily skip to the view you desire.

# See what you need to see

Experience clear images on a range of patients, from adult to pediatric, with the latest probes and transducers for the Venue Family. With our button probes, you can perform procedures while controlling multiple parameters from the probe without breaking the sterile field. Needle procedures that once required two people can now be done with one.

## Linear

### L4-20t-RS

Supports high-frequency imaging of superficial structures while also being able to penetrate deeper anatomy without compromising imaging quality. With four configurable buttons.

### L4-12t-RS

Two-button programmable transducer for peripheral vascular, nerve blocks, and needle guidance. With four configurable buttons.

### L10-22-RS

A high-frequency linear array.

### 9L-RS

A linear array specifically designed for vascular access.

### 12L-RS

An excellent linear transducer for peripheral vascular, small parts, nerves, and pediatric medicine.

### L8-18i-RS

Specially designed and utilized for applications like peripheral vascular, small parts, nerve blocks, and needle guidance.

## Curved (convex)

### C1-5-RS

Supporting imaging of mid to deep structures.

## Phased

### M5Sc-RS\*

Probe for abdominal, pediatrics, and cardiac imaging applications. Available on Venue only.

### 3Sc-RS\*

Transducer for adult cardiac, abdomen, pediatric, renal, and adult transcranial applications.

## TEE probe

### 6Tc-RS

Specially designed and utilized for adult cardiac applications.

# Made for your Point of Care

From bedside to tight spaces, our systems can go from cart to table to wall to accommodate procedural environments.

## Easy to reach probes

Smart cable management puts probes safely up top and cables out of the way and off the floor

## Easy to clean

Smooth and seamless surface supports infection control efforts

## Reliable support

The Venue Family is backed by a multi-year warranty<sup>3</sup>

## Long operation

Batteries can provide active scan times of up to four hours

## Robust

A durable screen, bumpers and multi-purpose handles protect against bumps, bangs, and slashes

## Easy to move

Sleek footprint and big wheels for nimble maneuvering.

# 3 systems. 1 shared platform.

Wherever you perform procedures, there is a Venue system designed to meet your needs. Learn more about the members of the Venue Family with this side-by-side comparison.

## About GE HealthCare

GE HealthCare is a leading global medical technology, pharmaceutical diagnostics, and digital solutions innovator, dedicated to providing integrated solutions, services, and data analytics to make hospitals more efficient, clinicians more effective, therapies more precise, and patients healthier and happier. Serving patients and providers for more than 100 years, GE HealthCare is advancing personalized, connected, and compassionate care, while simplifying the patient's journey across the care pathway. Together our Imaging, Ultrasound, Patient Care Solutions, and Pharmaceutical Diagnostics businesses help improve patient care from prevention and screening, to diagnosis, treatment, therapy, and monitoring. We are an \$18 billion business with 51,000 employees working to create a world where healthcare has no limits.
