

LightBurst Digital Detector

Digital detection, remastered

What does one more detector ring give you? A whole lot.

Each row of the LightBurst Digital Detector is designed to add five centimeters to your total field of view, unlocking another layer of capability and performance.

With the option to scale from 15 centimeters of coverage all the way up to 30 centimeters*, you can expect the flexibility needed to decide how best to meet your immediate clinical needs, while also protecting your investment for the future.

* CE marked. 30 cm AFOV configuration is 510(k) pending at U.S. FDA. Not available for sale in the U.S.
