GE Equipment Delivery Requirements

These equipment installation drawings indicate the placement and interconnection of the listed equipment components. These drawings are not construction or site preparation drawings. Customer remains ultimately responsible for preparing the site to accommodate the installation and operation of such equipment in compliance with GE Healthcare's written specifications and all applicable federal, state, and/or local requirements.

* REQUIRED REFERENCE *

BrightSpeed Preinstallation Manual
5141177–100

A mandatory component of this drawing set is the GE Healthcare Preinstallation manual. Failure to reference the preinstallation manual will result in incomplete documentation required for site design and preparation.

Preinstallation documents for GE Healthcare products can be accessed on the web at:

** Auxiliary Items**

- **Customer/Contractor Supplied and Installed Items**
  - Room 1
    - Item A
    - Item B
  - Room 2
    - Item C
    - Item D

**General Specifications**

- All items must comply with local electrical codes.
- Equipment must be properly grounded.
- Installation must be completed within two weeks from the date of order.

**Environmental Specifications**

- Equipment should not be exposed to extreme temperatures.
- Humidity levels must be maintained within 40-60%.

**Magnetic Interference Specifications**

- Equipment must be placed at least 5 feet away from any magnetic fields.
- Use of magnetic shielding recommended for all equipment.

CT GANTRY AND TABLE ANCHOR/LEVELING

**Leveling**
- The CT Gantry is to be leveled to the floor level. The leveling pads are to be adjusted to ensure the level is accurate.

**Foundation**
- The foundation is to be checked for any imperfections before installation. The foundation should be free from any cracks or voids.

**Transportation**
- The Gantry is to be transported horizontally using skids for the smooth and safe movement. The skids should be evenly distributed to avoid any imbalance.

**Foundation Location**
- The Gantry and Table should be installed on a concrete foundation. The foundation should be reinforced with rebar and poured concrete.

**Leveling Pads**
- The leveling pads are to be placed under the Gantry and Table to ensure they are level with the floor. The pads should be evenly distributed to reduce the load on any single pad.

**Center of Gravity**
- The Center of Gravity of the Gantry and Table is to be calculated to ensure it is within the specified limits. The calculations should be confirmed by a structural engineer.

**Dimensions**
- The dimensions provided are for reference only. The actual dimensions should be confirmed by reading the detailed drawings provided.
