**Mandatory Requirement:**

A mandatory component of these drawings is the GE Healthcare Preinstallation manual.

**Preinstallation documents** for GE Healthcare products can be downloaded from:

http://www.gehealthcare.com/company/docs/preinstallation.html

Failure to reference the preinstallation manual will result in unacceptable documentation required for site design and preparation.

## CUSTOMER

These drawings are provided to assist you in preparing the room for installation of equipment acquired from the manufacturer and are not to be used as construction documents. GE Healthcare reserves the right to make changes in the drawings or specifications shown at any time without notice or obligation. GE Healthcare assumes no responsibility for any changes resulting therefrom.

All requirements for the equipment are not noted on this sheet. It is suggested that the drawings be reviewed by qualified professionals who can assist in making decisions regarding radiation protection, ventilation, electrical, sanitary, and other requirements. The equipment may be installed in an existing room if such requirements are met and all required permits are obtained.

- **SITE PROGRESS CHECKLIST**
  - Confirm all equipment orders for each item purchased. Optional or future items are not ordered on these plans.
  - All room dimensions are critical immediately. Check GE Healthcare if changes occur or dimensions are not correct.
  - Contact a designated person or consultant to specify requirements for radiation equipment.
  - Provide a location for the equipment, including power and data connections.
  - Make sure the room is equipped with all necessary supplies.
  - If required, have the building plans reviewed by the architect.
  - All equipment is to be installed in the room as indicated on the electrical plans.
  - Make sure the room is equipped with all necessary supplies.

## FACILITIES COORDINATOR

Facility planning is to be completed in advance of equipment delivery. These drawings are to be reviewed by the architect and structural engineer. All equipment is to be installed in the location specified on the drawings.

- **SITE PROGRESS CHECKLIST**
  - Confirm all construction work has been completed before the equipment is installed.
  - Make sure the room is equipped with all necessary supplies.
  - If required, have the building plans reviewed by the architect.
  - All equipment is to be installed in the room as indicated on the electrical plans.
  - Provide all necessary laboratory supplies.
  - All equipment is to be installed in the room as indicated on the electrical plans.

## CONSTRUCTION COORDINATOR

Power is critical for equipment operation. All power specifications must be met. The equipment manufacturer specifies power requirements for each system. Any deviation from these drawings must be communicated in writing to and reviewed by your local GE Healthcare representative prior to making changes.

- **SITE PROGRESS CHECKLIST**
  - Confirm all construction work has been completed before the equipment is installed.
  - Make sure the room is equipped with all necessary supplies.
  - If required, have the building plans reviewed by the architect.
  - All equipment is to be installed in the room as indicated on the electrical plans.
  - Provide all necessary laboratory supplies.
  - All equipment is to be installed in the room as indicated on the electrical plans.
