iCenter*
Help Improve Your Operational Performance
Introducing iCenter

Keeping track of a **large number of assets** may become a challenge and a source of concern for the leadership team who wonder where all the assets they’ve purchased are and how they are utilized.

**Number of Devices**

62% **INCREASE**

We can help.

GE Healthcare Services can help you achieve greater visibility of current performance and translate that into actionable insights. With iCenter, we can help improve asset utilization and help drive productivity.

iCenter, a secure cloud-based asset maintenance and management software application provides data and analytics on asset status, location, maintenance history, utilization, and planning.

The new iCenter platform reflects input from our customers around the world. The result? A robust and scalable application which helps support our customers in accomplishing their operational and financial goals.

iCenter is included with your service agreement and offers features and value for maintenance, planning and performance initiatives.

To learn more about iCenter, contact your GE Healthcare sales or service representative or visit: [www.gehealthcare.com/iCenter](http://www.gehealthcare.com/iCenter)

---

1. Track metrics and deliver data and analytics on status, location, maintenance history, utilization and performance against benchmarks
2. Give the 360° operational overview for comprehensive service model optimization
3. Track all the asset data and help enable compliance for audits
4. Monitor patient and exam volume trends on GE CT and MR systems which help to make better decisions about relocating, upgrading and staffing
5. Facilitate request for service and avoid potential phone call delays
6. Help to increase staff productivity and to optimize patient flow by getting a better understanding of service in progress and asset status
7. Provide planning reports to help make sound decisions about how to allocate the capital budget
8. Ensure availability of information to help drive business decisions and strategy
9. Help to optimize asset installed base in a cost effective way without compromising level of care and quality
