## Enabling you to improve clinician and patient satisfaction.

GE Healthcare invites you to see first-hand how we're able to provide insight into enterprise-wide IT investments, resources, and clinical processes to help reduce variation in productivity, reduce IT costs, and optimize efficiency.

Learn how Edison, GE Healthcare's intelligence offering comprised of applications and smart devices built using the Edison platform, can make your new and existing systems smarter, enabling you to make better decisions faster.

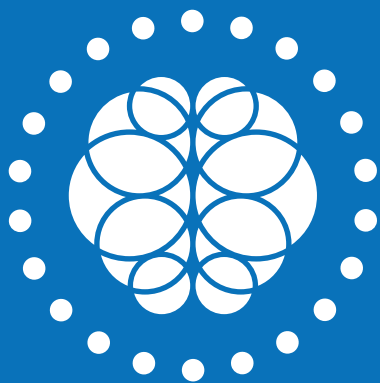

### See a live demo of Edison intelligent applications including:

- Centricity™ Clinical Archive Analytics, the world's #1 VNA solution
- MUSE™ ECG Insights
- Carestation™ Insights Analytics
- Centricity™ Universal Viewer

### Get hands-on with smart devices powered by Edison including:

- Optima\* XR240amx mobile x-ray system
- Voluson™ E10 with SonoCNS fetal ultrasound monitor
- LOGIQ™ E10 Ultrasound

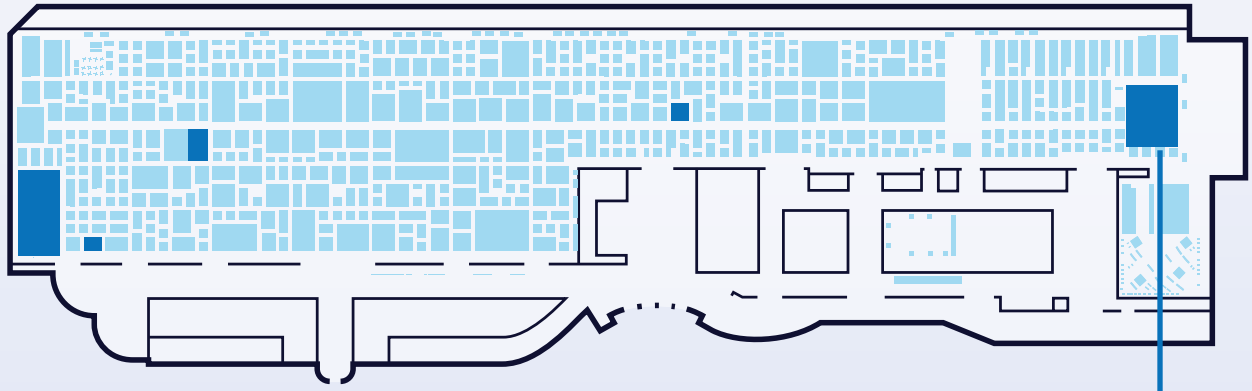

Whatever your needs, we invite you to speak with one of our product experts.

# Edison

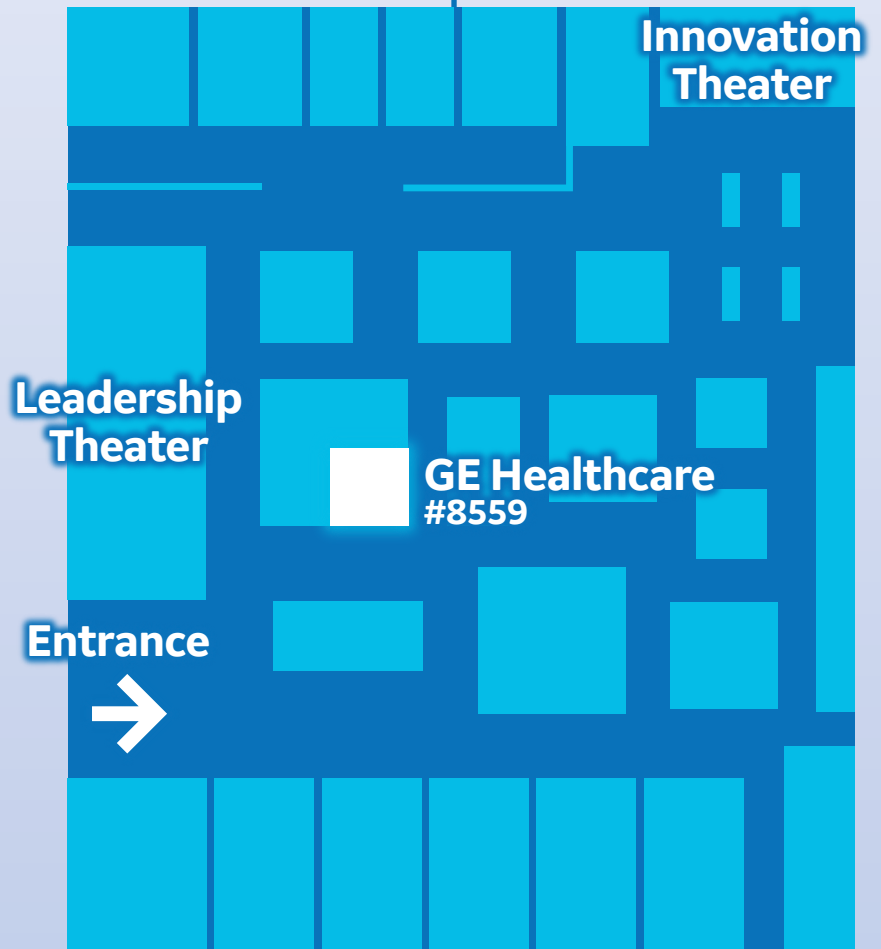

**NEW**

- Centricity Clinical Archive Analytics
- Mural
- Imaging Protocol Manager

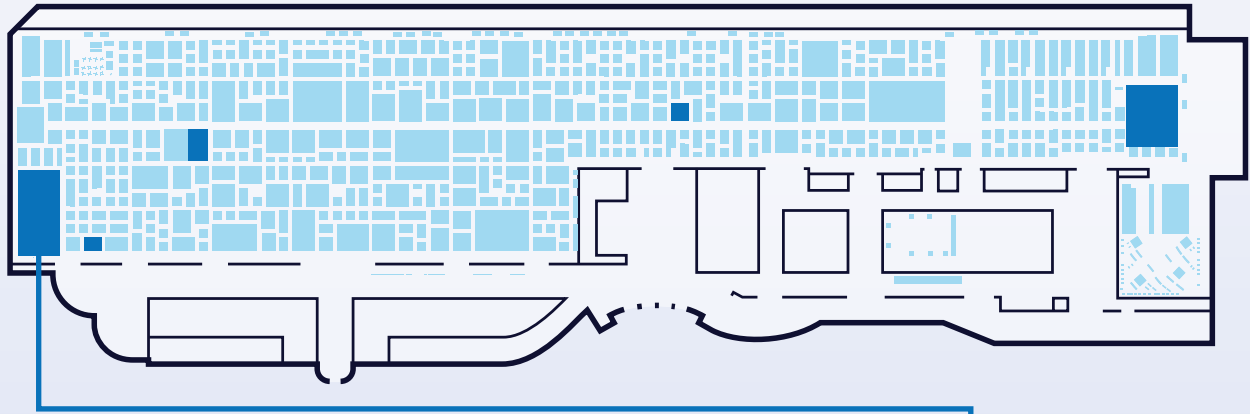

## Intelligent Health Pavilion #8559

Visit GE Healthcare in this technology centric educational pavilion serving as a “show within a show.” GE Healthcare equipment will be displayed throughout the pavilion, showcasing the various solutions that help improve patient outcomes and caregiver experiences through various solution pathways. Join a guided room tour to see GE Healthcare solutions in real life settings.

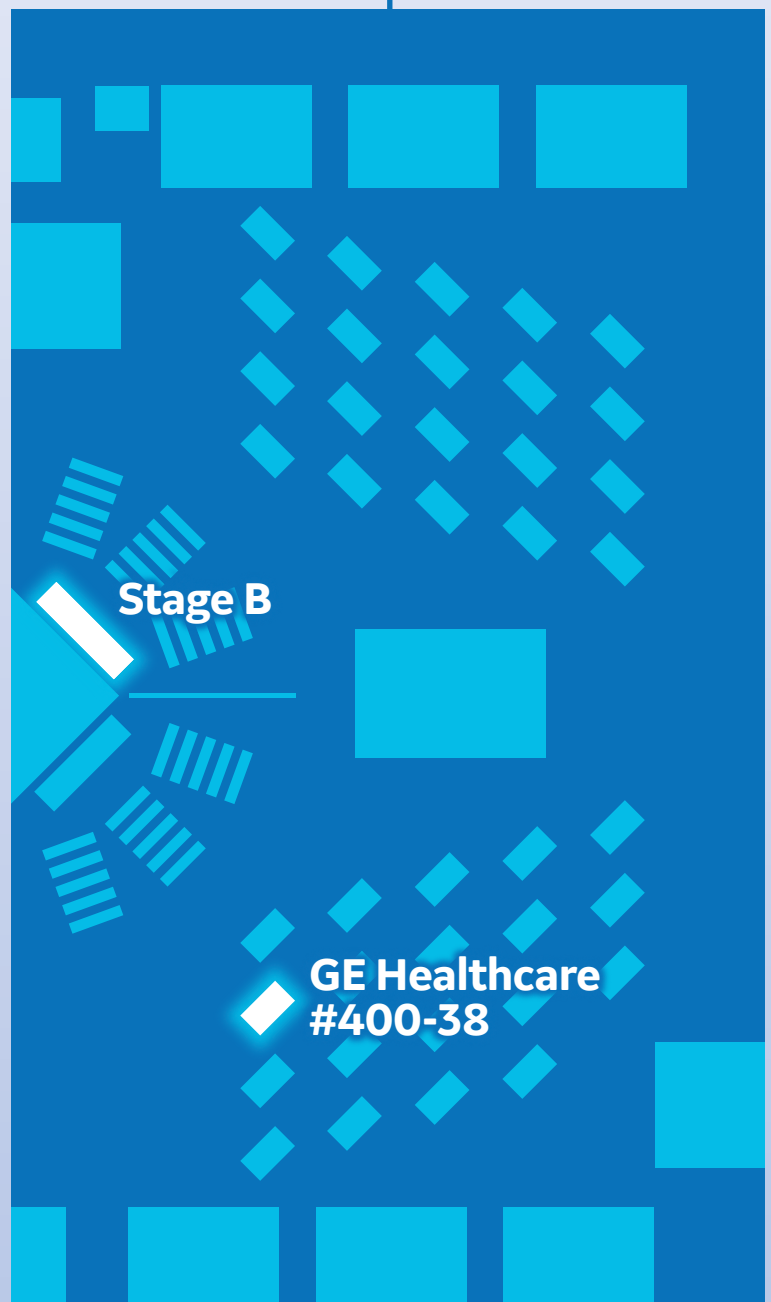

GE Healthcare

## Cybersecurity Command Pavilion

### Kiosk #400-38

Visit GE Healthcare to find out how we establish a safe, effective and manageable security program. This integrated approach comprises elements of people, process and technology and is designed to be adaptable to the changing marketplace. The program is being created to react to evolving multi-pronged threats, while continuing to provide the clinician with needed information for the treatment of patients.
