SonoSim® 365 for GE Healthcare

Learn ultrasonography from the comfort of your own home, anytime, anywhere.

SonoSim® 365 for GE Healthcare is a portable, virtual ultrasound training experience that covers everything from the basics of scanning to hands-on simulations of real-world patient cases, demonstrating a broad spectrum of normal and pathologic conditions. From SonoSim, Inc., a global leader in ultrasound education and training, it provides an effective training solution to the difficult and complex nature of ultrasound education. SonoSim® 365 for GE Healthcare offers convenient ultrasound education through integrated didactic instruction, hands-on training, and knowledge assessment.

More than 170 hours of AMA PRA Category I Credits™ are offered in the full suite of the SonoSim® Ultrasound Training Solution across 57 modules.

What’s included:

SonoSim 365® for GE Healthcare comes with a SonoSim® Probe, a SonoSim® Drive, five SonoSim® Modules of your choosing, and a one-year warranty through SonoSim® Care. Upon installation of the software, users can immediately access online SonoSim® Courses and begin performing hands-on scanning using their personal computer. SonoSim® 365 for GE Healthcare is licensed to a single user who is eligible to obtain CME Credit where applicable.

SonoSim’s Integrated Training Solution

Didactics

- SonoSim® Courses are delivered online in an interactive multimedia format using still and dynamic ultrasound imagery, audio narration, computer graphic imagery, and animation
- SonoSim® Courses are developed by leading experts in ultrasonography and medical education

Hands-on Training

- Cases obtained from real patients allow for an on-demand, authentic scanning experience
- Learn to use the exact probe movements expert sonographers used to scan the original patients
- The SonoSimulator® replicates the exact tactile experience of using an actual ultrasound probe to scan a real patient

Knowledge Assessment

- Users answer in-module and end-of-module knowledge assessment questions
- In-module questions are accompanied by direct question-answer feedback, while end-of-module questions are automatically scored with real-time results provided to users
- Images can be saved, annotated, and archived for performance review
