

HALO Bassinest swivel sleeper Hospital Series

Safe sleep made easier™

The HALO Bassinest® swivel sleeper Hospital Series introduces a whole new level of care that safely brings newborns closer than ever to their caregivers. Its innovative design with 360° pivot enhances your postpartum rooming-in practices and helps mothers nurture and bond with their babies, all while enabling safe sleep practices.

Peace of mind. It's built right into the design.

Offering a design to help support safe sleep from day one, the HALO Bassinest is more than just convenient. It's designed with safety in mind—for families and care professionals alike. Its thoughtful design with dual pivot allows mom to position her baby in just the right place for safe access to her baby—helping make breastfeeding, sleeping, and bonding seamless.

Closer care

Newborns need a loving touch. Early bonding is critical to both parents' and infant's health, growth, and development¹. HALO Bassinest offers a new way to enable a baby-friendly, family-centered care model while supporting bonding and breastfeeding.

The HALO Bassinest is designed to enable safe sleep practices and bonding:

- Clear bedside walls provide visibility, so mom can rest but still keep eye contact with her baby—which is key to bonding.
- A rotational arm, 360° swivel, and tuck-under design all allow mom to bring her baby close, while the infant remains on a separate sleeping surface. This is particularly helpful for fatigued moms who want to stay close to their baby but need a break from skin-to-skin contact.
- Mom can adjust the bassinest and baby to the position that is intuitive and natural to her.
- Bassinest bed can be brought directly above mom's lap, helping to enable safe placement of the baby into the bassinest after breastfeeding.
