## **REVISION HISTORY**

| <b>REV</b> | <b>DATE</b> | <b>REASON FOR CHANGE</b>             |
|------------|-------------|--------------------------------------|
| 1          | June 2009   | Initial release for InnovaDXR 1.1.7  |
| 2          | July 2009   | Updated with changes in the template |
| 3          | May 2010    | Updated for Innova3DXR 1.2.8         |

**THIS PAGE LEFT INTENTIONALLY BLANK**

## CONFORMANCE STATEMENT OVERVIEW

Innova3DXR 1.2 is a tool that is installed on the same hardware platform as the base application, **Advantage Workstation**. This base application is a Networked Medical Imaging Console dedicated to Examination Review and Diagnosis. The workstation uses DICOM services to import acquisition images for possible further analysis or processing, and to export images and radiotherapy data to other vendors.

Innova3DXR 1.2 does not have an intrinsic DICOM Network feature. It does not directly invoke the DICOM Server AE.

Table 0.1 provides an overview of the SOP Classes supported by Innova3DXR 1.2.

**Table 0.1 – SUPPORTED SOP CLASSES**

| SOP Classes         | Parsed Input | Generated Output |
|---------------------|--------------|------------------|
| <b>Transfer</b>     |              |                  |
| X-Ray Image Storage | Yes          | No               |
| CT Image Storage    | No           | Yes              |
| GE Private 3D Model | No           | Yes              |

## 1. INTRODUCTION

### 1.1 OVERVIEW

This DICOM Conformance Statement is divided into Sections as described below:

**Section 1 (Introduction)**, which describes the overall structure, intent, and references for this Conformance Statement

**Section 2 (Network Conformance Statement)**, which specifies the GEMS equipment compliance to the DICOM requirements for the implementation of Networking features.

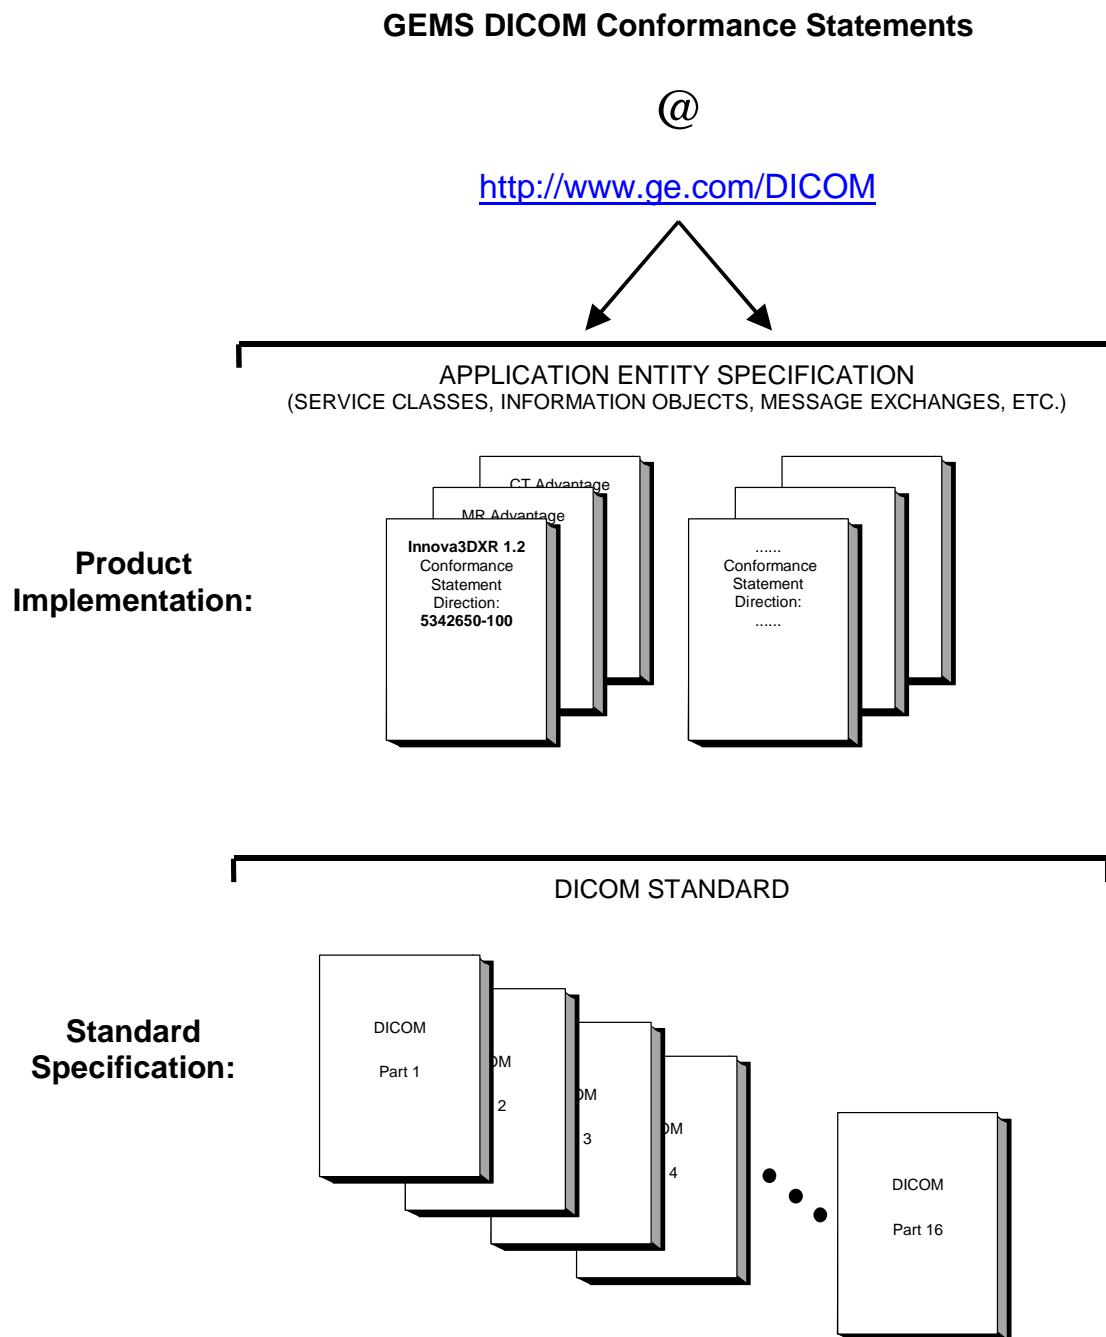

**Section 3 (X-Ray Image Information Object Implementation)**, which specifies the GEMS equipment compliance to DICOM requirements for the implementation of a X-Ray Image Information Object.

**Section 4 (3D Model GE private Information Object Implementation)**, which specifies the GEMS equipment compliance to DICOM requirements for the implementation of a 3D Model GE zprivate Information Object.

**Section 5 (3D XACT Model Information Object Implementation)**, which specifies the GEMS equipment compliance to DICOM requirements for the implementation of a **3D XACT Model Object**.

## 1.2 OVERALL DICOM CONFORMANCE STATEMENT DOCUMENT STRUCTURE

The Documentation Structure of the GEMS DICOM Conformance Statements is shown in the Illustration below.

This document specifies the DICOM implementation. It is entitled:

*Innova3DXR 1.2  
Conformance Statement for DICOM  
Direction 5342650-100*

This DICOM Conformance Statement documents the DICOM Conformance Statement and Technical Specification required to interoperate with the GEMS network interface.

The GEMS Conformance Statement, contained in this document, also specifies the Lower Layer communications which it supports (e.g., TCP/IP). However, the Technical Specifications are defined in the DICOM Part 8 standard.

For more information regarding DICOM, copies of the Standard may be obtained on the Internet at <http://medical.nema.org>. Comments on the Standard may be addressed to:

DICOM Secretariat  
NEMA  
1300 N. 17<sup>th</sup> Street, Suite 1847  
Rosslyn, VA 22209  
USA  
Phone: +1.703.841.3200

### **1.3 INTENDED AUDIENCE**

The reader of this document is concerned with software design and/or system integration issues. It is assumed that the reader of this document is familiar with the DICOM Standard and with the terminology and concepts which are used in that Standard.

### **1.4 SCOPE AND FIELD OF APPLICATION**

It is the intent of this document to provide an unambiguous specification for GEMS implementations. This specification, called a Conformance Statement, includes a DICOM Conformance Statement and is necessary to ensure proper processing and interpretation of GEMS medical data exchanged using DICOM. The GEMS Conformance Statements are available to the public.

The reader of this DICOM Conformance Statement should be aware that different GEMS devices are capable of using different Information Object Definitions. For example, a GEMS CT Scanner may send images using the CT Information Object, MR Information Object, Secondary Capture Object, etc.

Included in this DICOM Conformance Statement are the Module Definitions, which define all data elements, used by this GEMS implementation. If the user encounters unspecified private data elements while parsing a GEMS Data Set, the user is well advised to ignore those data elements (per the DICOM standard). Unspecified private data element information is subject to change without notice. If, however, the device is acting as a "full fidelity storage device", it should retain and re-transmit all of the private data elements, which are sent by GEMS devices.

### **1.5 IMPORTANT REMARKS**

The use of these DICOM Conformance Statements, in conjunction with the DICOM Standards, is intended to facilitate communication with GE imaging equipment. However,

by itself, it is not sufficient to ensure that inter-operation will be successful. The user (or user's agent) needs to proceed with caution and address at least four issues:

- **Integration** - The integration of any device into an overall system of interconnected devices goes beyond the scope of standards (DICOM v3.0), and of this introduction and associated DICOM Conformance Statements when interoperability with non-GE equipment is desired. The responsibility to analyze the applications requirements and to design a solution that integrates GE imaging equipment with non-GE systems is the **user's** responsibility and should not be underestimated. The **user** is strongly advised to ensure that such an integration analysis is correctly performed.
- **Validation** - Testing the complete range of possible interactions between any GE device and non-GE devices, before the connection is declared operational, should not be overlooked. Therefore, the **user** should ensure that any non-GE provider accepts full responsibility for all validation required for their connection with GE devices. This includes the accuracy of the image data once it has crossed the interface between the GE imaging equipment and the non-GE device and the stability of the image data for the intended applications.  
Such a validation is required before any clinical use (diagnosis and/or treatment) is performed. It applies when images acquired on GE imaging equipment are processed/displayed on a non-GE device, as well as when images acquired on non-GE equipment is processed/displayed on a GE console or workstation.
- **Future Evolution** - GE understands that the DICOM Standard will evolve to meet the user's growing requirements. GE is actively involved in the development of the DICOM Standard. DICOM will incorporate new features and technologies and GE may follow the evolution of the Standard. The GEMS protocol is based on DICOM as specified in each DICOM Conformance Statement. Evolution of the Standard may require changes to devices, which have implemented DICOM. **In addition, GE reserves the right to discontinue or make changes to the support of communications features (on its products) described by these DICOM Conformance Statements.** The **user** should ensure that any non-GE provider, which connects with GE devices, also plans for the future evolution of the DICOM Standard. Failures to do so will likely result in the loss of function and/or connectivity as the DICOM Standard changes and GE Products are enhanced to support these changes.
- **Interaction** - It is the sole responsibility of the **non-GE provider** to ensure that communication with the interfaced equipment does not cause degradation of GE imaging equipment performance and/or function.

## 1.6 REFERENCES

NEMA PS3      Digital Imaging and Communications in Medicine (DICOM) Standard, available free at <http://medical.nema.org/>

## 1.7 DEFINITIONS

Informal definitions are provided for the following terms used in this Conformance Statement. The DICOM Standard is the authoritative source for formal definitions of these terms.

**Abstract Syntax** – the information agreed to be exchanged between applications, generally equivalent to a Service/Object Pair (SOP) Class. Examples: Verification SOP Class, Modality Worklist Information Model Find SOP Class and Computed Radiography Image Storage SOP Class.

**Application Entity (AE)** – an end point of a DICOM information exchange, including the DICOM network or media interface software; i.e., the software that sends or receives DICOM information objects or messages. A single device may have multiple Application Entities.

**Application Entity Title** – the externally known name of an *Application Entity*, used to identify a DICOM application to other DICOM applications on the network.

**Application Context** – the specification of the type of communication used between *Application Entities*. Example: DICOM network protocol.

**Association** – a network communication channel set up between *Application Entities*.

**Attribute** – a unit of information in an object definition; a data element identified by a *tag*. The information may be a complex data structure (Sequence), itself composed of lower level data elements. Examples: Patient ID (0010,0020), Accession Number (0008,0050), Photometric Interpretation (0028,0004), Procedure Code Sequence (0008,1032).

**Information Object Definition (IOD)** – the specified set of *Attributes* that comprise a type of data object; does not represent a specific instance of the data object, but rather a class of similar data objects that have the same properties. The *Attributes* may be specified as Mandatory (Type 1), Required but possibly unknown (Type 2), or Optional (Type 3), and there may be conditions associated with the use of an Attribute (Types 1C and 2C). Examples: MR Image IOD, CT Image IOD, Print Job IOD.

**Joint Photographic Experts Group (JPEG)** – a set of standardized image compression techniques, available for use by DICOM applications.

**Media Application Profile** – the specification of DICOM information objects and encoding exchanged on removable media (e.g., CDs)

**Module** – a set of *Attributes* within an *Information Object Definition* that are logically related to each other. Example: Patient Module includes Patient Name, Patient ID, Patient Birth Date, and Patient Sex.

**Negotiation** – first phase of *Association* establishment that allows *Application Entities* to agree on the types of data to be exchanged and how that data will be encoded.

**Presentation Context** – the set of DICOM network services used over an *Association*, as negotiated between *Application Entities*; includes *Abstract Syntaxes* and *Transfer Syntaxes*.

**Protocol Data Unit (PDU)** – a packet (piece) of a DICOM message sent across the network. Devices must specify the maximum size packet they can receive for DICOM messages.

**Security Profile** – a set of mechanisms, such as encryption, user authentication, or digital signatures, used by an *Application Entity* to ensure confidentiality, integrity, and/or availability of exchanged DICOM data

**Service Class Provider (SCP)** – role of an *Application Entity* that provides a DICOM network service; typically, a server that performs operations requested by another *Application Entity* (*Service Class User*). Examples: Picture Archiving and Communication System (image storage SCP, and image query/retrieve SCP), Radiology Information System (Modality Worklist SCP).

**Service Class User (SCU)** – role of an *Application Entity* that uses a DICOM network service; typically, a client. Examples: imaging modality (image storage SCU, and modality worklist SCU), imaging workstation (image query/retrieve SCU)

**Service/Object Pair (SOP) Class** – the specification of the network or media transfer (service) of a particular type of data (object); the fundamental unit of DICOM interoperability specification. Examples: Ultrasound Image Storage Service, Basic Grayscale Print Management.

**Service/Object Pair (SOP) Instance** – an information object; a specific occurrence of information exchanged in a *SOP Class*. Examples: a specific x-ray image.

**Tag** – a 32-bit identifier for a data element, represented as a pair of four digit hexadecimal numbers, the “group” and the “element”. If the “group” number is odd, the tag is for a private (manufacturer-specific) data element. Examples: (0010,0020) [Patient ID], (07FE,0010) [Pixel Data], (0019,0210) [private data element]

**Transfer Syntax** – the encoding used for exchange of DICOM information objects and messages. Examples: JPEG compressed (images), little-endian explicit value representation.

**Unique Identifier (UID)** – a globally unique “dotted decimal” string that identifies a specific object or a class of objects; an ISO-8824 Object Identifier. Examples: Study Instance UID, SOP Class UID, SOP Instance UID.

**Value Representation (VR)** – the format type of an individual DICOM data element, such as text, an integer, a person’s name, or a code. DICOM information objects can be transmitted with either explicit identification of the type of each data element (Explicit VR), or without explicit identification (Implicit VR); with Implicit VR, the receiving application must use a DICOM data dictionary to look up the format of each data element.

## 1.8 SYMBOLS AND ABBREVIATIONS

|        |   |

| XA     | X-ray Angiography                               |

## 2. NETWORK CONFORMANCE STATEMENT

### 2.1 INTRODUCTION

This section of the DICOM Conformance Statement specifies the Innova3DXR 1.2 compliance to DICOM requirements for Networking features.

Innova3DXR 1.2 is a tool that is installed on the same hardware platform as the base application, **Advantage Workstation**. This base application is a Networked Medical Imaging Console dedicated to Examination Review and Diagnosis. The workstation uses DICOM services to import acquisition images for possible further analysis or processing, and to export images and radiotherapy data to other vendors.

Innova3DXR 1.2 does not have an intrinsic DICOM Network feature. It does not directly invoke the DICOM Server AE. For some detailed information on DICOM features of Advantage Windows, refer to the respective Conformance Statement - *Advantage Workstation where Innova3DXR 1.2 application is running*.

The application parses the following DICOM objects:

| SOP Class Name      | SOP Class UID                |
|---------------------|------------------------------|
| X-Ray Image Storage | 1.2.840.10008.5.1.4.1.1.12.1 |

Innova3DXR 1.2 application parses 3D Innova sequences acquired using Innova 3D and Innova 3D CT protocols.

The application creates the following DICOM objects:

| SOP Class Name      | SOP Class UID             |
|---------------------|---------------------------|
| GE Private 3D Model | 1.2.840.113619.4.26       |
| CT Image Storage    | 1.2.840.10008.5.1.4.1.1.2 |

SOP Class “CT Image Storage” is used to create 3D XACT output, which is a CT Image Storage DICOM object extended with private elements as described in Section 5, 3D XACT MODEL information OBJECT IMPLEMENTATION.

### 2.2 IMPLEMENTATION MODEL

#### 2.2.1 APPLICATION DATA FLOW DIAGRAM

Refer to the respective Conformance Statement - *Advantage Workstation where Innova3DXR 1.2 application is running*.

#### 2.2.2 PRESENTATION CONTEXT TABLE

Refer to the respective Conformance Statement - *Advantage Workstation where Innova3DXR 1.2 application is running*.

### **2.2.3 REAL-WORLD ACTIVITIES**

The user should select X-Ray image (XA) acquired with Innova 3D, 3DCT or 3D Sub protocol, then start application from AW application. Start the reconstruction algorithm by pressing ‘Start’. After user request the 3D Model SOP Instance is created and saved into Advantage Windows database.

The **goal of this document** is to give a detailed description of:

- the 3D MODEL DICOM IOD

Note that the format of this section strictly follows the format defined in DICOM Standard PS 3.2 (Conformance). Please refer to that part of the standard while reading this section.

### **2.2.4 SOP INSTANCE UID, SERIES INSTANCE UID**

Implementation UID assigned to Innova3DXR 1.2 is: **1.2.840.113619.6.205**

An UID generated by a product has 2 parts : <root>.<suffix>.

*For a GE product* root is 1.2.840.113619 where

- 1 identifies ISO
- 2 identifies the ISO member body branch
- 840 identifies the country code
- 113619 identifies GEMS as a specific organization.

For a Series, Instances created in GE suffix is 2.Imp.id  
where

- Imp identifies a specific implementation and is registered within GE
- id is a number or a substring (i.j or i.j.l...) defined by the implementation. In our implementation it means get UID from Advantage Windows (Conformance Statement - *Advantage Workstation Conformance Statement for DICOM.*)

So Innova3DXR 1.2 will generate UIDs for instances that looks like:  
**1.2.840.113619.2.205**

### **3. X-RAY ANGIOGRAPHY (XA) INFORMATION OBJECT IMPLEMENTATION**

#### **3.1 INTRODUCTION**

This section specifies the requirements for the DICOM X-Ray Image IOD when being used as input to Innova3DXR 1.2

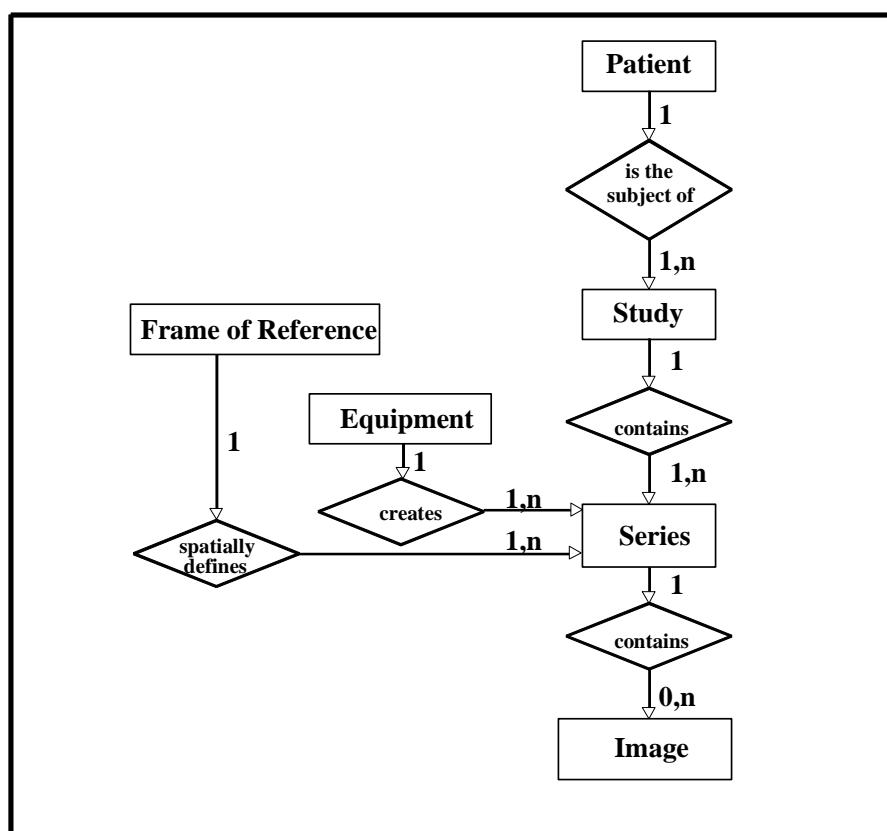

#### **3.2 X-RAY IMAGE IOD IMPLEMENTATION**

This section defines how X-Ray Image attributes are used within the implementation, and whether these attributes are mandatory or optional for the correct operation of Innova3DXR 1.2

#### **3.3 X-RAY IMAGE IOD ENTITY-RELATIONSHIP MODEL**

##### **ILLUSTRATION 3-1**

##### **X-RAY IMAGE ENTITY RELATIONSHIP DIAGRAM**

The Entity-Relationship diagram for the X-Ray Image interoperability schema is shown in ILLUSTRATION 3-1. In this figure, the following diagrammatic convention is established to represent the information organization:

- each entity is represented by a rectangular box
- each relationship is represented by a diamond shaped box.
- the fact that a relationship exists between two entities is depicted by lines connecting the corresponding entity boxes to the relationship boxes.

The relationships are fully defined with the maximum number of possible entities in the relationship shown. See DICOM Part 3 Section 5.1.2 for an explanation of the entity-relationship notation.

### 3.4 ENTITIES DESCRIPTION

Refer to DICOM Standard Part 3 (Information Object Definitions) for a description of each of the entities contained within the X-Ray Image information object.

### 3.5 INNOVA3DXR 1.2 MAPPING OF DICOM ENTITIES

DICOM entities map to the Innova3DXR 1.2 entities in the following manner:

**TABLE 3-1**  
**INNOVA3DXR 1.2 MAPPING OF DICOM ENTITIES**

| <b>DICOM</b>     | <b>Innova3DXR 1.2</b>                    |
|------------------|--|
| Patient Entity   | Patient Entity (Advantage Workstation)   |
| Study Entity     | Exam Entity (Advantage Workstation)      |
| Series Entity    | Series Entity (Advantage Workstation)    |
| Equipment Entity | Equipment Entity (Advantage Workstation) |
| Image Entity     | Image Entity (Advantage Workstation)     |

### 3.6 IOD MODULE TABLE

The X-Ray Information Object Definitions comprise the modules of the following tables, plus Standard Extended and Private attributes. Which attributes will be described in the following section

**TABLE 3-2**  
XA IMAGE IOD MODULES

| Entity Name | Module Name       | Usage   | Comments        | Reference |
|-------------|-------------------|---|-----------------|-----------|
| Patient     | Patient           | Mandatory   | Required        | 3.7.2.1   |
| Study       | General Study     | Mandatory   | Required        | 3.7.3.1   |
|             | Patient Study     | User Option   | Used if present | 3.7.3.2   |
| Series      | General Series    | Mandatory   | Required        | 3.7.4.1   |
| Equipment   | General Equipment | Mandatory   | Required        | 3.7.5.1   |
| Image       | General Image     | Mandatory   | Required        | 3.7.6.1   |
|             | Image Pixel       | Mandatory   | Required        | 3.7.6.2   |
|             | Contrast/Bolus    | C - Required if contrast media was used in this Image | Used if present | 3.7.6.3   |
|             | Multi-frame       | C - Required if pixel data is Multi-Frame Cine data   | Required        | 3.7.6.4   |
|             | X-Ray Image       | Mandatory   | Required        | 3.7.6.5   |
|             | X-Ray Acquisition | Mandatory   | Required        | 3.7.6.6   |
|             | X-Ray Collimator  | User Option   | Used if present | 3.7.6.7   |
|             | X-Ray Table       | C - Required if Image is created with table motion    | Used if present | 3.7.6.8   |
|             | XA Positioner     | Mandatory   | Required        | 3.7.6.9   |
|             | SOP Common        | Mandatory   | Required        | 3.7.6.10  |
|             | Cine              | C - Required if pixel data is Multi-Frame Cine data   | Used if present | 3.7.6.11  |

### 3.7 INFORMATION MODULE DEFINITIONS

Please refer to DICOM v3.0 Standard Part 3 (Information Object Definitions) for a description of each of the entities and modules contained within the XA Information Object.

The following modules are included to convey Enumerated Values, Defined Terms, and Optional Attributes supported. Type 1 & Type 2 Attributes are also included for completeness and to define what values they may take and where these values are obtained. It should be noted that they are the same ones as defined in the DICOM v3.0 Standard Part 3 (Information Object Definitions).

#### 3.7.1 COMMON INFORMATION MODULE DEFINITIONS

Please refer to DICOM Part 3 (Information Object Definitions) for a description of each of the entities, modules, and attributes contained within the XA Information Objects.

#### 3.7.2 PATIENT ENTITY

##### 3.7.2.1 PATIENT MODULE

**TABLE 3-3**  
PATIENT MODULE ATTRIBUTES

| Attribute Name               | Tag         | Type | Attribute Description  |
|------------------------------|-------------|------|--|
| Patient's Name               | (0010,0010) | 2    | Required with any value  |
| Patient ID                   | (0010,0020) | 2    | Required with any value  |
| Patient's Birth Date         | (0010,0030) | 2    | Required with any value (including no value, zero length data element) |
| Patient's Sex                | (0010,0040) | 2    | Required with any value (including no value, zero length data element) |
| Referenced Patient Sequence  | (0008,1120) | 3    | Copied to derived instances without change                             |
| >Referenced SOP Class UID    | (0008,1150) | 1C   | Copied to derived instances without change                             |
| >Referenced SOP Instance UID | (0008,1155) | 1C   | Copied to derived instances without change                             |

#### 3.7.3 STUDY ENTITY

##### 3.7.3.1 GENERAL STUDY MODULE

**TABLE 3-4**  
GENERAL STUDY MODULE ATTRIBUTES

| Attribute Name             | Tag         | Type | Attribute Description  |
|----------------------------|-------------|------|--|
| Study Instance UID         | (0020,000D) | 1    | Required with any not null value                                       |
| Study Date                 | (0008,0020) | 2    | Required with any value (including no value, zero length data element) |
| Study Time                 | (0008,0030) | 2    | Required with any value (including no value, zero length data element) |
| Referring Physician's Name | (0008,0090) | 2    | Required with any value (including no value, zero length data element) |

|                                    |             |    |  |
|------------------------------------|-------------|----|--|
| Study ID                           | (0020,0010) | 2  | Required with any value (including no value, zero length data element) |
| Accession Number                   | (0008,0050) | 2  | Required with any value (including no value, zero length data element) |
| Study Description                  | (0008,1030) | 3  | Copied to derived instances without change                             |
| Procedure Code Sequence            | (0008,1032) | 3  | Copied to derived instances without change                             |
| >Code Value                        | (0008,0100) | 1C | Copied to derived instances without change                             |
| >Coding Scheme Designator          | (0008,0102) | 1C | Copied to derived instances without change                             |
| >Code Meaning                      | (0008,0104) | 1C | Copied to derived instances without change                             |
| Name of Physician(s) Reading Study | (0008,1060) | 3  | Copied to derived instances without change                             |
| Referenced Study Sequence          | (0008,1110) | 3  | Copied to derived instances without change                             |
| >Referenced SOP Class UID          | (0008,1150) | 1C | Copied to derived instances without change                             |
| >Referenced SOP Instance UID       | (0008,1155) | 1C | Copied to derived instances without change                             |

### 3.7.3.2 PATIENT STUDY MODULE

**TABLE 3-5**  
PATIENT STUDY MODULE ATTRIBUTES

| Attribute Name   | Tag         | Type | Attribute Description                      |
|------------------|-------------|------|--|
| Patient's Age    | (0010,1010) | 3    | Copied to derived instances without change |
| Patient's Size   | (0010,1020) | 3    | Copied to derived instances without change |
| Patient's Weight | (0010,1030) | 3    | Copied to derived instances without change |

### 3.7.4 SERIES ENTITY

#### 3.7.4.1 GENERAL SERIES MODULE

**TABLE 3-6**  
GENERAL SERIES MODULE ATTRIBUTES

| Attribute Name                        | Tag         | Type | Attribute Description  |
|---------------------------------------|-------------|------|--|
| Modality                              | (0008,0060) | 1    | Required with any not null value                                       |
| Series Instance UID                   | (0020,000E) | 1    | Required with any not null value                                       |
| Series Number                         | (0020,0011) | 2    | Required with any value (including no value, zero length data element) |
| Performing Physician's Name           | (0008,1050) | 3    | Copied to derived instances without change                             |
| Operators' Name                       | (0008,1070) | 3    | Copied to derived instances without change                             |
| Protocol Name                         | (0018,1030) | 3    | Copied to derived instances without change                             |
| Laterality                            | (0020,0060) | 2C   | Copied to derived instances without change                             |
| Request Attributes Sequence           | (0040,0275) | 3    | Copied to derived instances without change                             |
| >Requested Procedure Description      | (0032,1060) | 3    | Copied to derived instances without change                             |
| >Scheduled Procedure Step Description | (0040,0007) | 3    | Copied to derived instances without change                             |
| >Scheduled Protocol Code Sequence     | (0040,0008) | 3    | Copied to derived instances without change                             |
| >>Code Value                          | (0008,0100) | 1C   | Copied to derived instances without change                             |
| >>Coding Scheme Designator            | (0008,0102) | 1C   | Copied to derived instances without change                             |

| Attribute Name               | Tag         | Type | Attribute Description                      |
|------------------------------|-------------|------|--|
| >>Code Meaning               | (0008,0104) | 1C   | Copied to derived instances without change |
| >Scheduled Procedure Step ID | (0040,0009) | 1C   | Copied to derived instances without change |
| >Requested Procedure ID      | (0040,1001) | 1C   | Copied to derived instances without change |

### 3.7.5 EQUIPMENT ENTITY

#### 3.7.5.1 GENERAL EQUIPMENT MODULE

**TABLE 3-7**  
GENERAL EQUIPMENT MODULE ATTRIBUTES

| Attribute Name          | Tag         | Type | Attribute Description  |
|-------------------------|-------------|------|--|
| Manufacturer            | (0008,0070) | 2    | Required with any value (including no value, zero length data element) |
| Institution Name        | (0008,0080) | 3    | Copied to derived instances without change                             |
| Institution Address     | (0008,0081) | 3    | Copied to derived instances without change                             |
| Manufacturer Model Name | (0008,1090) | 3    | Copied to derived instances without change                             |
| Device Serial Number    | (0018,1000) | 3    | Copied to derived instances without change                             |
| Software Versions       | (0018,1020) | 3    | Copied to derived instances without change                             |

### 3.7.6 IMAGE ENTITY

#### 3.7.6.1 GENERAL IMAGE MODULE

**TABLE 3-8**  
GENERAL IMAGE MODULE ATTRIBUTES

| Attribute Name   | Tag         | Type | Attribute Description  |
|------------------|-------------|------|--|
| Instance Number  | (0020,0013) | 2    | Required with any value (including no value, zero length data element) |
| Image Comments   | (0020,4000) | 3    | Copied to derived instances without change                             |
| Acquisition Date | (0008,0022) | 3    | Copied to derived instances without change                             |
| Acquisition Time | (0008,0032) | 3    | Copied to derived instances without change                             |

#### 3.7.6.2 IMAGE PIXEL MODULE

**TABLE 3-9**  
IMAGE PIXEL MODULE ATTRIBUTES

| Attribute Name             | Tag         | Type | Attribute Description      |
|----------------------------|-------------|------|----------------------------|
| Samples per Pixel          | (0028,0002) | 1    | Not used                   |
| Photometric Interpretation | (0028,0004) | 1    | Not used                   |
| Rows                       | (0028,0010) | 1    | Value shall be 500 to 1000 |
| Columns                    | (0028,0011) | 1    | Value shall be 500 to 1000 |
| Bits Allocated             | (0028,0100) | 1    | Not used                   |
| Bits Stored                | (0028,0101) | 1    | Value shall be 12          |
| High Bit                   | (0028,0102) | 1    | Not used                   |
| Pixel Representation       | (0028,0103) | 1    | Not used                   |
| Pixel Data                 | (7FE0,0010) | 1    | Required with any value    |

#### 3.7.6.3 CONTRAST/BOLUS MODULE

**TABLE 3-10**  
CONTRAST/BOLUS MODULE ATTRIBUTES

| Attribute Name                   | Private Creator | Tag         | VR | VM | Type | Attribute Description                      |
|----------------------------------|-----------------|-------------|----|----|------|--|
| Contrast/Bolus Agent             |                 | (0018,0010) | LO | 1  | 2    | Copied to derived instances without change |
| Auto injection enabled           | GEMS_DL_IMG_01  | (0019,xxA4) | CS | 1  | 3    | Copied to derived instances without change |
| Injection phase                  | GEMS_DL_IMG_01  | (0019,xxA5) | CS | 1  | 3    | Copied to derived instances without change |
| Injection delay                  | GEMS_DL_IMG_01  | (0019,xxA6) | DS | 1  | 3    | Copied to derived instances without change |
| Reference injection frame number | GEMS_DL_IMG_01  | (0019,xxA7) | IS | 1  | 3    | Copied to derived instances without change |
| Contrast/Bolus Start Time        |                 | (0018,1042) | TM | 1  | 3    | Copied to derived instances without change |
| Contrast/Bolus Stop Time         |                 | (0018,1043) | TM | 1  | 3    | Copied to derived instances without change |

|                           |  |             |    |   |   |  |
|---------------------------|--|-------------|----|---|---|--|
| Contrast/Bolus Ingredient |  | (0018,1048) | CS | 1 | 3 | Copied to derived instances without change |
|---------------------------|--|-------------|----|---|---|--|

### 3.7.6.4 MULTI-FRAME MODULE

**TABLE 3-11**  
MULTI-FRAME MODULE ATTRIBUTES

| Attribute Name          | Tag         | Type | Attribute Description  |
|-------------------------|-------------|------|--|
| Number of Frames        | (0028,0008) | 1    | Value shall be higher than<br>0.9*((expected_number_of_frames)-2)<br>Where expected_number_of_frames is stored in<br>(0019,xxCA)<br>The above check is only done if<br>expected_number_of_frames is present. |
| Frame Increment Pointer | (0028,0009) | 1    | Not used   |

### 3.7.6.5 X-RAY IMAGE MODULE

**TABLE 3-12**  
X-RAY IMAGE MODULE ATTRIBUTES

| Attribute Name               | Tag         | Type | Attribute Description |
|------------------------------|-------------|------|-----------------------|
| Pixel Intensity Relationship | (0028,1040) | 1    | Value shall be "SQRT" |

### 3.7.6.6 X-RAY ACQUISITION MODULE

**TABLE 3-13**  
X-RAY ACQUISITION MODULE

| Attribute Name       | Tag         | Type | Attribute Description  |
|----------------------|-------------|------|--|
| KVP                  | (0018,0060) | 2    | Not used   |
| Radiation Setting    | (0018,1155) | 1    | Not used   |
| Imager Pixel Spacing | (0018,1164) | 3    | The first value shall be higher than 0   |
| FOV Shape            | (0018,1147) | 3    | Copied to derived instances without change   |
| FOV Dimension        | (0018,1149) | 3    | Copied to derived instances without change   |
| Intensifier Size     | (0018,1162) | 3    | Copied to derived instances without change   |
| Grid                 | (0018,1166) | 3    | Value shall be one of the following "IN" "NONE"<br>If the value does not match, the application assumes<br>that the attribute is not present |
| Focal Spot           | (0018,1190) | 3    | Value shall be higher than 0<br>If the value does not match, the application assumes<br>that the attribute is not present                    |

### 3.7.6.7 X-RAY COLLIMATOR MODULE

**TABLE 3-14**  
X-RAY COLLIMATOR MODULE

| Attribute Name | Tag | Type | Attribute Description |
|----------------|-----|------|-----------------------|
|----------------|-----|------|-----------------------|

|                                |             |    |   |
|--------------------------------|-------------|----|---|
| Collimator Shape               | (0018,1700) | 1  | Not used  |
| Collimator Left Vertical Edge  | (0018,1702) | 1C | Value shall be between 1-1000<br>If the value does not match, the application assumes that the attribute is not present |
| Collimator Right Vertical Edge | (0018,1704) | 1C | Value shall be between 1-1000<br>If the value does not match, the application assumes that the attribute is not present |
| Collimator Up Horizontal Edge  | (0018,1706) | 1C | Value shall be between 1-1000<br>If the value does not match, the application assumes that the attribute is not present |
| Collimator Low Horizontal Edge | (0018,1708) | 1C | Value shall be between 1-1000<br>If the value does not match, the application assumes that the attribute is not present |

### 3.7.6.8 X-RAY TABLE MODULE

**TABLE 3-15**  
X-RAY TABLE MODULE ATTRIBUTES

| Attribute Name               | Tag         | Type | Attribute Description  |
|------------------------------|-------------|------|--|
| Table Motion                 | (0018,1134) | 2    | Required with any value (including no value, zero length data element) |
| Table Vertical Increment     | (0018,1135) | 2C   | Copied to derived instances without change                             |
| Table Lateral Increment      | (0018,1136) | 2C   | Copied to derived instances without change                             |
| Table Longitudinal Increment | (0018,1137) | 2C   | Copied to derived instances without change                             |
| Table Angle                  | (0018,1138) | 3    | Copied to derived instances without change                             |

### 3.7.6.9 X-RAY POSITIONER MODULE

**TABLE 3-16**  
X-RAY POSITIONER MODULE ATTRIBUTES

| Attribute Name                       | Tag         | Type | Attribute Description  |
|--------------------------------------|-------------|------|--|
| Positioner Primary Angle             | (0018,1510) | 2    | Required with any value (including no value, zero length data element)   |
| Positioner Secondary Angle           | (0018,1511) | 2    | Required with any value (including no value, zero length data element)   |
| Distance Source to Detector          | (0018,1110) | 3    | Value shall be higher than 0<br>If the value does not match, the application assumes that the attribute is not present |
| Distance Source to Patient           | (0018,1111) | 3    | Value shall be higher than 0<br>If the value does not match, the application assumes that the attribute is not present |
| Positioner Motion                    | (0018,1500) | 3    | Copied to derived instances without change   |
| Positioner Primary Angle Increment   | (0018,1520) | 2C   | Copied to derived instances without change   |
| Positioner Secondary Angle Increment | (0018,1521) | 2C   | Copied to derived instances without change   |

### 3.7.6.10 SOP COMMON MODULE

**TABLE 3-17**  
SOP COMMON MODULE ATTRIBUTES (INPUT)

| Attribute Name         | Tag         | Type | Attribute Description                      |
|------------------------|-------------|------|--|
| SOP Class UID          | (0008,0016) | 1    | Required with any not null value.          |
| SOP Instance UID       | (0008,0018) | 1    | Required with any not null value.          |
| Specific Character Set | (0008,0005) | 3    | Copied to derived instances without change |

### 3.7.6.11 CINE MODULE

**TABLE 3-18**  
CINE MODULE ATTRIBUTES

| Attribute Name    | Tag         | Type | Attribute Description                      |
|-------------------|-------------|------|--|
| Frame Time Vector | (0018,1065) | 1C   | Copied to derived instances without change |
| Frame Delay       | (0018,1066) | 3    | Copied to derived instances without change |

### 3.7.7 PRIVATE DATA ATTRIBUTES

#### 3.7.7.1 PRIVATE GROUP DLX\_SERIE\_01

Private Group DLX\_SERIE\_01 is modeled as part of the Image (X-Ray Acquisition, X-Ray Table, X-Ray Positioner) Information Entity.

**TABLE 3-19**  
PRIVATE GROUP DLX\_SERIE\_01 (INPUT)

| Attribute Name              | Tag         | VR | VM | Attribute Description and Use              |
|-----------------------------|-------------|----|----|--|
| Adx Acq Mode                | (0019,xx14) | IS | 1  | Value shall be 140                         |
| Angle value 1               | (0019,xx01) | DS | 1  | Copied to derived instances without change |
| Angle value 2               | (0019,xx02) | DS | 1  | Copied to derived instances without change |
| Angle value 3               | (0019,xx03) | DS | 1  | Copied to derived instances without change |
| IP Address                  | (0019,xx20) | LO | 1  | Copied to derived instances without change |
| Table Vertical Position     | (0019,xx21) | DS | 1  | Copied to derived instances without change |
| Table Longitudinal Position | (0019,xx22) | DS | 1  | Copied to derived instances without change |
| Table Lateral Position      | (0019,xx23) | DS | 1  | Copied to derived instances without change |

### 3.7.7.2 PRIVATE GROUP GEMS\_DL\_IMG\_01

Private Group GEMS\_DL\_IMG\_01 is modeled as part of the Image (X-Ray Acquisition, X-Ray Positioner) Information Entity.

**TABLE 3-20**  
PRIVATE GROUP GEMS\_DL\_IMG\_01

| Attribute Name             | Tag         | VR | VM  | Attribute Description and Use  |
|----------------------------|-------------|----|-----|--|
| Patient Position Per Image | (0019,xxC7) | CS | 1   | Value shall be one of the following<br>"HFS" "HFP" "HFDR" "HFDL" "FFS" "FFP"<br>"FFDR" "FFDL"<br>If the value does not match, the application assumes that the attribute is not present  |
| FOV Dimension Double       | (0019,xx0B) | DS | 1-2 | Value shall be higher than 0   |
| Image Flip                 | (0019,xx95) | CS | 2   | Horizontal flip of the image at acquisition, followed by vertical flip<br>Value shall be one of the following<br>"NO\NO" "YES\NO" "NO\YES" "YES\YES"<br>If the value does not match, the application assumes that the attribute is not present |
| EPT                        | (0019,xxA9) | DS | 1-N | Value shall be higher or equal to 0<br>If the value does not match, the application assumes that the attribute is not present  |
| kVp Actual Vector          | (0019,xxAF) | DS | 1-N | Value shall be higher than 0<br>If the value does not match, the application assumes that the attribute is not present   |
| mAs Actual Vector          | (0019,xxB0) | DS | 1-N | Value shall be higher than 0<br>If the value does not match, the application assumes that the attribute is not present   |

|                                      |             |    |     |  |
|--------------------------------------|-------------|----|-----|--|
| Preselected Pivot Rotation Speed     | (0019,xxC5) | FL | 1   | Value shall be one of the following<br>"10" "20" "40"<br>If the value does not match, the application assumes that the attribute is not present                    |
| ABD Vector                           | (0019,xxB9) | FL | 1-N | Value shall be higher than 0<br>If the value does not match, the application assumes that the attribute is not present   |
| 3D structure of interest             | (0019,xxC8) | CS | 1   | Value shall be one of the following<br>"VASCULAR" "OTHER"<br>If the value does not match, the application assumes that the attribute is not present                |
| 3D Calibration Out of Date Flag      | (0019,xxC9) | CS | 1   | Value shall be one of the following<br>"YES" "NO"<br>If the value does not match, the application assumes that the attribute is not present                        |
| Angle 1 Increment                    | (0019,xx97) | DS | 1-N | Copied to derived instances without change   |
| Angle 2 Increment                    | (0019,xx98) | DS | 1-N | Copied to derived instances without change   |
| Angle 3 Increment                    | (0019,xx99) | DS | 1-N | Copied to derived instances without change   |
| Auto Injection Enabled               | (0019,xxA4) | CS | 1   | Copied to derived instances without change   |
| Injection Phase                      | (0019,xxA5) | CS | 1   | Copied to derived instances without change   |
| Injection Delay                      | (0019,xxA6) | DS | 1   | Copied to derived instances without change   |
| Reference Injection Frame Number     | (0019,xxA7) | IS | 1   | Copied to derived instances without change   |
| Pw Actual Vector                     | (0019,xxC2) | DS | 1-N | Copied to derived instances without change   |
| Spectral Filter Thickness            | (0019,xxC4) | IS | 1   | Value shall be one of the following<br>"0" "100" "200" "300" "600" "900"<br>If the value does not match, the application assumes that the attribute is not present |
| Acquisition Region Detail            | (0019,xxC6) | CS | 1   | Copied to derived instances without change   |
| 3Dspin expected number of frames     | (0019,xxCA) | IS | 1   | Copied to derived instances without change   |
| Detection gain value                 | (0019,xxD4) | FL | 1   | Value shall be higher than 0<br>If the value does not match, the application assumes that the attribute is not present   |
| mR mAs calibration value             | (0019,xxD5) | FL | 1   | Value shall be higher than 0<br>If the value does not match, the application assumes that the attribute is not present   |
| Table rotation angle vector          | (0019,xxC3) | FL | 1-N | Copied to derived instances without change   |
| Table X Position to Isocenter vector | (0019,xxD7) | FL | 1-N | Copied to derived instances without change   |
| Table Y Position to Isocenter vector | (0019,xxD8) | FL | 1-N | Copied to derived instances without change   |
| Table Z Position to Isocenter vector | (0019,xxD9) | FL | 1-N | Copied to derived instances without change   |
| Table Head Tilt Angle vector         | (0019,xxDA) | FL | 1-N | Copied to derived instances without change   |
| Table Cradle Tilt Angle vector       | (0019,xxDB) | FL | 1-N | Copied to derived instances without change   |

**3.7.7.3 PRIVATE GROUP GEMS\_XR3DCAL\_01****TABLE 3-21**

PRIVATE GROUP GEMS\_XR3DCAL\_01

| <b>Attribute Name</b>           | <b>Tag</b>  | <b>VR</b> | <b>VM</b> | <b>Attribute Description and Use</b>   |
|---------------------------------|-------------|-----------|-----------|--|
| 3Dcal image rows                | (0021,xx01) | IS        | 1         | Value shall be higher than 0   |
| 3Dcal image columns             | (0021,xx02) | IS        | 1         | Value shall be higher than 0   |
| 3Dcal acquisition date          | (0021,xx04) | DA        | 1         | Copied to derived instances without change   |
| 3Dcal acquisition time          | (0021,xx05) | TM        | 1         | Copied to derived instances without change   |
| 3Dcal Pivot angle vector        | (0021,xx09) | FL        | 1-N       | Not mandatory  |
| 3Dcal matrix sequence           | (0021,xx0B) | SQ        | 1         | Sequence shall exist   |
| >3Dcal matrix elements          | (0021,xx0C) | LO        | 1-N       | Shall contains value   |
| 3Dcal 3D frame unit size        | (0021,xx0E) | FL        | 1         | Value shall be higher than 0<br>If the value does not match, the application assumes that the attribute is not present |

| 3Dcal image pixel spacing       | (0021,xx15) | FL        | 2         | Value shall be higher than 0   |
| 3Dcal centering mode            | (0021,xx16) | CS        | 1         | Value shall be "RECTIFICATION"   |

## 4. 3D MODEL GE PRIVATE INFORMATION OBJECT IMPLEMENTATION

### 4.1 INTRODUCTION

This section specifies the requirements for the GE Private 3D Model IOD as output of the Innova3DXR 1.2 product.

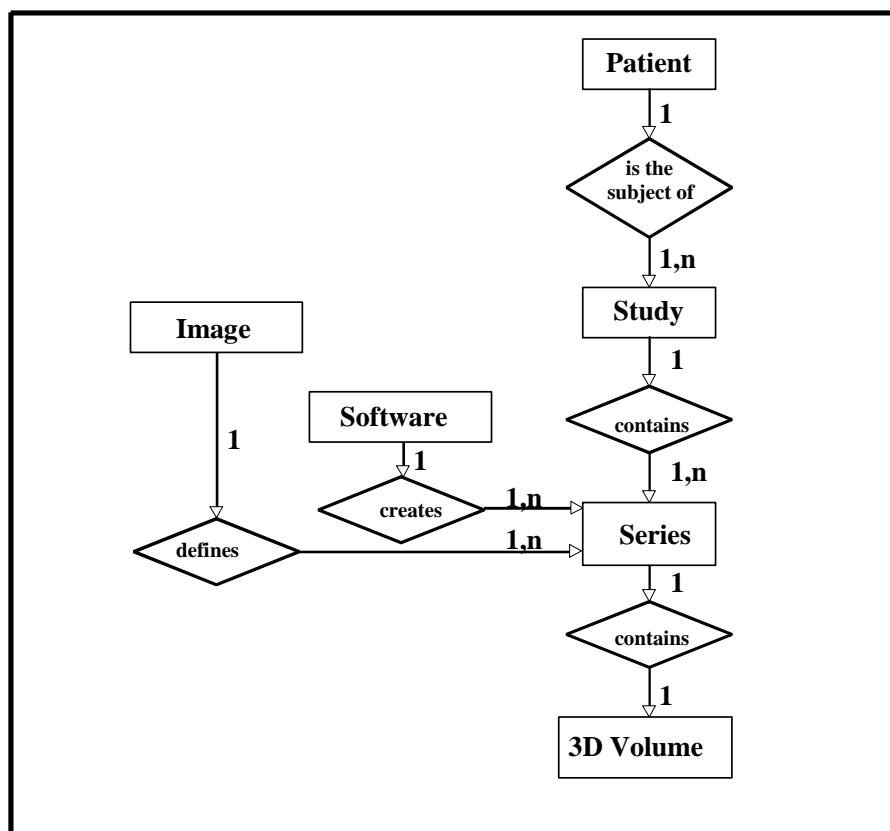

### 4.2 3D MODEL IOD IMPLEMENTATION

This section defines how 3D Model attributes are used within the implementation.

### 4.3 3D MODEL ENTITY-RELATIONSHIP MODEL

#### ILLUSTRATION 4-1

#### 3D MODEL ENTITY RELATIONSHIP DIAGRAM

The Entity-Relationship diagram for the 3D Model interoperability schema is shown in ILLUSTRATION 4-1. In this figure, the following diagrammatic convention is established to represent the information organization:

- each entity is represented by a rectangular box
- each relationship is represented by a diamond shaped box.
- the fact that a relationship exists between two entities is depicted by lines connecting the corresponding entity boxes to the relationship boxes.

The relationships are fully defined with the maximum number of possible entities in the relationship shown. See DICOM Part 3 Section 5.1.2 for an explanation of the entity-relationship notation.

#### 4.4 ENTITIES DESCRIPTION

Refer to DICOM Standard Part 3 (Information Object Definitions) for a description of each of the entities contained within the 3D Model Image information object.

#### 4.5 INNOVA3DXR 1.2 MAPPING OF DICOM ENTITIES

DICOM entities map to the Innova3DXR 1.2 entities in the following manner:

**TABLE 4-1**  
INNOVA3DXR 1.2 MAPPING OF DICOM ENTITIES

| DICOM            | Innova3DXR 1.2                               |
|------------------|--|
| Patient Entity   | Patient Entity (Advantage Workstation)       |
| Study Entity     | Exam Entity (Advantage Workstation)          |
| Series Entity    | Series Entity (Advantage Workstation)        |
| Equipment Entity | Equipment Entity (Advantage Workstation)     |
| Image Entity     | Private Image Entity (Advantage Workstation) |

#### 4.6 IOD MODULE TABLE

The 3D Model Information Object Definitions comprise the modules of the following tables, plus Standard Extended and Private attributes.

**TABLE 4-2**  
XA IMAGE IOD MODULES

| Entity Name      | Module Name                        | Usage       | Reference |
|------------------|------------------------------------|-------------|-----------|
| Patient          | Patient                            | Mandatory   | 4.7.2.1   |
| Study            | General Study                      | Mandatory   | 4.7.3.1   |
|                  | Patient Study                      | User Option | 4.7.3.2   |
| Series           | General Series                     | Mandatory   | 4.7.4.1   |
| Equipment        | General Equipment                  | Mandatory   | 4.7.5.1   |
| Private Image    | General Image                      | Mandatory   | 4.7.6.1   |
|                  | Image Pixel                        | Mandatory   | 4.7.6.2   |
|                  | VOI LUT                            | Mandatory   | 4.7.6.3   |
| Private 3D Model | SOP Common                         | Mandatory   | 4.7.7.1   |
|                  | Common Private Entity              | Mandatory   | 4.7.7.2   |
|                  | Volumic Data                       | Mandatory   | 4.7.7.3   |
|                  | Reconstruction Parameters Sequence | Mandatory   | 4.7.7.4   |

#### 4.7 INFORMATION MODULE DEFINITIONS

Please refer to DICOM v3.0 Standard Part 3 (Information Object Definitions) for a description of each of the entities and modules contained within the 3D Model Information Object.

The following modules are included to convey Enumerated Values, Defined Terms, and Optional Attributes supported. Type 1 & Type 2 Attributes are also included for completeness and to define what values they may take and where these values are obtained. It should be noted that they are the same ones as defined in the DICOM v3.0 Standard Part 3 (Information Object Definitions).

##### 4.7.1 COMMON INFORMATION MODULE DEFINITIONS

Please refer to DICOM Part 3 (Information Object Definitions) for a description of each of the entities, modules, and attributes contained within the 3D Model Information Objects.

##### 4.7.2 PATIENT ENTITY

###### 4.7.2.1 PATIENT MODULE

**TABLE 4-3**  
PATIENT MODULE ATTRIBUTES

| Attribute Name               | Tag         | Type | Attribute Description                           |
|------------------------------|-------------|------|---|
| Patient's Name               | (0010,0010) | 1    | Copied from XA image without change.            |
| Patient ID                   | (0010,0020) | 1    | Copied from XA image without change.            |
| Patient's Birth Date         | (0010,0030) | 2    | Copied from XA image without change.            |
| Patient's Sex                | (0010,0040) | 2    | Copied from XA image without change.            |
| Referenced Patient Sequence  | (0008,1120) | 3    | Sequence is copied from XA image without change |
| >Referenced SOP Class UID    | (0008,1150) | 1C   | Copied from XA image without change             |
| >Referenced SOP Instance UID | (0008,1155) | 1C   | Copied from XA image without change             |

##### 4.7.3 STUDY ENTITY

###### 4.7.3.1 GENERAL STUDY MODULE

**TABLE 4-4**  
GENERAL STUDY MODULE ATTRIBUTES

| Attribute Name             | Tag         | Type | Attribute Description               |
|----------------------------|-------------|------|-------------------------------------|
| Study Instance UID         | (0020,000D) | 1    | Copied from XA image without change |
| Study Date                 | (0008,0020) | 2    | Copied from XA image without change |
| Study Time                 | (0008,0030) | 2    | Copied from XA image without change |
| Referring Physician's Name | (0008,0090) | 2    | Copied from XA image without change |
| Study ID                   | (0020,0010) | 2    | Copied from XA image without change |
| Accession Number           | (0008,0050) | 2    | Copied from XA image without change |
| Study Description          | (0008,1030) | 3    | Copied from XA image without change |
| Procedure Code Sequence    | (0008,1032) | 3    | Copied from XA image without change |

|                                    |             |    |                                     |
|------------------------------------|-------------|----|-------------------------------------|
| >Code Value                        | (0008,0100) | 1C | Copied from XA image without change |
| >Coding Scheme Designator          | (0008,0102) | 1C | Copied from XA image without change |
| >Code Meaning                      | (0008,0104) | 1C | Copied from XA image without change |
| Name of Physician(s) Reading Study | (0008,1060) | 3  | Copied from XA image without change |
| Referenced Study Sequence          | (0008,1110) | 3  | Copied from XA image without change |
| >Referenced SOP Class UID          | (0008,1150) | 1C | Copied from XA image without change |
| >Referenced SOP Instance UID       | (0008,1155) | 1C | Copied from XA image without change |

#### 4.7.3.2 PATIENT STUDY MODULE

**TABLE 4-5**  
PATIENT STUDY MODULE ATTRIBUTES

| Attribute Name   | Tag         | Type | Attribute Description               |
|------------------|-------------|------|-------------------------------------|
| Patient's Age    | (0010,1010) | 3    | Copied from XA image without change |
| Patient's Size   | (0010,1020) | 3    | Copied from XA image without change |
| Patient's Weight | (0010,1030) | 3    | Copied from XA image without change |

#### 4.7.4 SERIES ENTITY

##### 4.7.4.1 GENERAL SERIES MODULE

**TABLE 4-6**  
GENERAL SERIES MODULE ATTRIBUTES

| Attribute Name                        | Tag         | Type | Attribute Description   |
|---------------------------------------|-------------|------|---|
| Modality                              | (0008,0060) | 1    | Value shall be XA   |
| Series Instance UID                   | (0020,000E) | 1    | Unique UID generated  |
| Series Date                           | (0008,0021) | 1    | Date of the creation of the object  |
| Series Time                           | (0008,0031) | 1    | Time of the creation of the object  |
| Series Description                    | (0008,103E) | 1    | Describe the series, and contains references for the source image to help identification in Advantage Windows Browser |
| Series Number                         | (0020,0011) | 2    | Copy of (0020,0013) from original image   |
| Performing Physician's Name           | (0008,1050) | 3    | Copied from XA image without change   |
| Operators' Name                       | (0008,1070) | 3    | Copied from XA image without change   |
| Protocol Name                         | (0018,1030) | 3    | Copied from XA image without change   |
| Patient Position                      | (0018,5100) | 2C   | Copy of (0019,xxC7) from original image   |
| Laterality                            | (0020,0060) | 3    | Copied from XA image without change   |
| Request Attributes Sequence           | (0040,0275) | 3    | Copied from XA image without change   |
| >Requested Procedure Description      | (0032,1060) | 3    | Copied from XA image without change   |
| >Scheduled Procedure Step Description | (0040,0007) | 3    | Copied from XA image without change   |
| >Scheduled Protocol Code Sequence     | (0040,0008) | 3    | Copied from XA image without change   |
| >>Code Value                          | (0008,0100) | 1C   | Copied from XA image without change   |
| >>Coding Scheme Designator            | (0008,0102) | 1C   | Copied from XA image without change   |

|                              |             |    |                                     |
|------------------------------|-------------|----|-------------------------------------|
| >>Code Meaning               | (0008,0104) | 1C | Copied from XA image without change |
| >Scheduled Procedure Step ID | (0040,0009) | 1C | Copied from XA image without change |
| >Requested Procedure ID      | (0040,1001) | 1C | Copied from XA image without change |

#### 4.7.5 EQUIPMENT ENTITY

##### 4.7.5.1 GENERAL EQUIPMENT MODULE

**TABLE 4-7**  
GENERAL EQUIPMENT MODULE ATTRIBUTES

| Attribute Name            | Tag         | Type | Attribute Description                     |
|---------------------------|-------------|------|---|
| Manufacturer              | (0008,0070) | 1    | Value shall be "GE MEDICAL SYSTEMS"       |
| Institution Name          | (0008,0080) | 3    | Copied from XA image without change       |
| Institution Address       | (0008,0081) | 3    | Copied from XA image without change       |
| Station Name              | (0008,1010) | 3    | Station Name of the Advantage Windows     |
| Manufacturer's Model Name | (0008,1090) | 3    | Model Name of the Advantage Windows       |
| Device Serial Number      | (0018,1000) | 3    | Serial Number of the Advantage Windows    |
| Software Version(s)       | (0018,1020) | 3    | Version of the Innova3DXR 1.2 application |
| Date of Last Calibration  | (0018,1200) | 3    | Copy of (0021,xx04) from original image   |
| Time of Last Calibration  | (0018,1201) | 3    | Copy of (0021,xx05) from original image   |

#### 4.7.6 PRIVATE IMAGE ENTITY

##### 4.7.6.1 GENERAL IMAGE MODULE

**TABLE 4-8**  
GENERAL IMAGE MODULE ATTRIBUTES

| Attribute Name               | Tag         | Type | Attribute Description                           |
|------------------------------|-------------|------|---|
| Image Date                   | (0008,0023) | 1    | Date of the creation of the object              |
| Image Time                   | (0008,0033) | 1    | Time of the creation of the object              |
| Source Image Sequence        | (0008,2112) | 1    | Contains reference data for the source sequence |
| >Referenced SOP Class UID    | (0008,1150) | 1    | Copy of (0008,0016) from original image         |
| >Referenced SOP Instance UID | (0008,1155) | 1    | Copy of (0008,0018) from original image         |
| Instance Number              | (0020,0013) | 2    | Copied from XA image without change             |
| Image Comments               | (0020,4000) | 3    | Copied from XA image without change             |

#### 4.7.6.2 IMAGE PIXEL MODULE

**TABLE 4-9**  
IMAGE PIXEL MODULE ATTRIBUTES

| Attribute Name             | Tag         | Type | Attribute Description                                     |
|----------------------------|-------------|------|---|
| Samples per Pixel          | (0028,0002) | 1    | Value shall be 1  |
| Photometric Interpretation | (0028,0004) | 1    | Value shall be "MONOCHROME2"                              |
| Rows                       | (0028,0010) | 1    | Value shall be 256 or 512 depends on user select          |
| Columns                    | (0028,0011) | 1    | Value shall be 256 or 512 depends on user select          |
| Bits Allocated             | (0028,0100) | 1    | Value shall be 16   |
| Bits Stored                | (0028,0101) | 1    | Value shall be 12   |
| High Bit                   | (0028,0102) | 1    | Value shall be 11   |
| Pixel Representation       | (0028,0103) | 1    | Value shall be 0  |
| Pixel Data                 | (7FE0,0010) | 1    | Calculated MIP or Axial slice depending on original image |

#### 4.7.6.3 VOI LUT MODULE

**TABLE 4-10**  
VOI LUT MODULE ATTRIBUTES

| Attribute Name | Tag         | Type | Attribute Description |
|----------------|-------------|------|-----------------------|
| Window Center  | (0028,1050) | 1    | Value shall be 2048   |
| Window Width   | (0028,1051) | 1    | Value shall be 4096   |

#### 4.7.7 PRIVATE 3D MODEL ENTITY

##### 4.7.7.1 SOP COMMON MODULE

**TABLE 4-11**  
SOP COMMON MODULE ATTRIBUTES

| Attribute Name         | Tag         | Type | Attribute Description                |
|------------------------|-------------|------|--------------------------------------|
| SOP Class UID          | (0008,0016) | 1    | Value shall be "1.2.840.113619.4.26" |
| SOP Instance UID       | (0008,0018) | 1    | Unique UID generated.                |
| Specific Character Set | (0008,0005) | 3    | Copied from XA image without change  |

#### 4.7.7.2 COMMON PRIVATE ENTITY MODULE

**TABLE 4-12**  
COMMON PRIVATE ENTITY MODULE ATTRIBUTES

| Attribute Name                | Private Creator   | Tag         | VR | VM | Type | Attribute Description                   |
|-------------------------------|-------------------|-------------|----|----|------|---|
| Private Entity Number         | GEMS_ADWSoft_DPO1 | (0039,xx80) | IS | 1  | 3    | Copy of (0020,0013) from original image |
| Private Entity Date           | GEMS_ADWSoft_DPO1 | (0039,xx85) | DA | 1  | 1    | Same as (0008,0023)                     |
| Private Entity Time           | GEMS_ADWSoft_DPO1 | (0039,xx90) | TM | 1  | 1    | Same as (0008,0033)                     |
| Private Entity Launch Command | GEMS_ADWSoft_DPO1 | (0039,xx95) | LO | 1  | 1    | Value shall be "start_volan"            |
| Private Entity Type           | GEMS_ADWSoft_DPO1 | (0039,xxAA) | CS | 1  | 1    | Value shall be "3DDPO"                  |

#### 4.7.7.3 VOLUMIC DATA MODULE

**TABLE 4-13**  
VOLUMIC DATA MODULE ATTRIBUTES

| Attribute Name                      | Private Creator  | Tag          | VR | V<br>M | Type | Attribute Description                                    |
|-------------------------------------|------------------|--------------|----|--------|------|--|
| Volume Color                        | GEMS_ADWSoft_3D1 | (0047,xx49)  | UL | 3-N    | 1    | Value shall be "255\255\255"                             |
| Volume Voxel Count                  | GEMS_ADWSoft_3D1 | (0047,xx50)  | UL | 1      | 1    | Calculated from user setting                             |
| Volume Segment Count                | GEMS_ADWSoft_3D1 | (0047,xx51)  | UL | 1-N    | 1    | Calculated from user setting                             |
| Volume Slice Size                   | GEMS_ADWSoft_3D1 | (0047,xx53)  | US | 1      | 1    | Calculated from user setting                             |
| Volume Slice Count                  | GEMS_ADWSoft_3D1 | (0047,xx54)  | US | 1      | 1    | Calculated from user setting                             |
| Volume Voxel Ratio                  | GEMS_ADWSoft_3D1 | (0047,xx57)  | DS | 1      | 1    | Value shall be 1.0                                       |
| Volume Voxel Size                   | GEMS_ADWSoft_3D1 | (0047,xx58)  | DS | 1      | 1    | Computed by reconstruction algorithm                     |
| Volume Z Position Size              | GEMS_ADWSoft_3D1 | (0047,xx59)  | SS | 1      | 1    | Calculated from user setting                             |
| Volume Base Line                    | GEMS_ADWSoft_3D1 | (0047,xx60)  | DS | 9      | 1    | Value shall be "0.0\1.0\0.0\0.0\0.0\0.0\1.0\1.0\0.0\0.0" |
| Volume Center Point                 | GEMS_ADWSoft_3D1 | (0047,xx61)  | DS | 3      | 1    | Value shall be "0.0\0.0\0.0"                             |
| Volume Skew Base                    | GEMS_ADWSoft_3D1 | (0047,xx63)  | SL | 1      | 1    | Value shall be 0   |
| Volume Upper Left High Corner RAS   | GEMS_ADWSoft_3D1 | (0047,xxC0)  | DS | 3      | 1    | Computed from algorithm output                           |
| Volume Slice To RAS Rotation Matrix | GEMS_ADWSoft_3D1 | (0047,xxC1)  | DS | 9      | 1    | Computed from algorithm output                           |
| Volume Upper Left High Corner TLOC  | GEMS_ADWSoft_3D1 | (0047,xxC2)  | DS | 1      | 1    | Computed from algorithm output                           |
| Volume Segment List                 | GEMS_ADWSoft_3D1 | (0047,xxD1 ) | OB | 1      | 1    | Computed from algorithm output                           |
| Volume Density List                 | GEMS_ADWSoft_3D1 | (0047,xxD3 ) | OB | 1      | 1    | Computed from algorithm output                           |
| Volume Z Position List              | GEMS_ADWSoft_3D1 | (0047,xxD4 ) | OB | 1      | 1    | Computed from algorithm output                           |
| Volume Original Index List          | GEMS_ADWSoft_3D1 | (0047,xxD5 ) | OB | 1      | 1    | Computed from algorithm output                           |

|  |                  |             |    |     |   |  |
|--|------------------|-------------|----|-----|---|--|

## 5. 3D XACT MODEL INFORMATION OBJECT IMPLEMENTATION

### 5.1 INTRODUCTION

This section specifies the requirements for the DICOM 3D XACT Model IOD as output of the Innova3DXR 1.2 product. 3D XACT Model is an CT Image Storage extended with GE private elements.

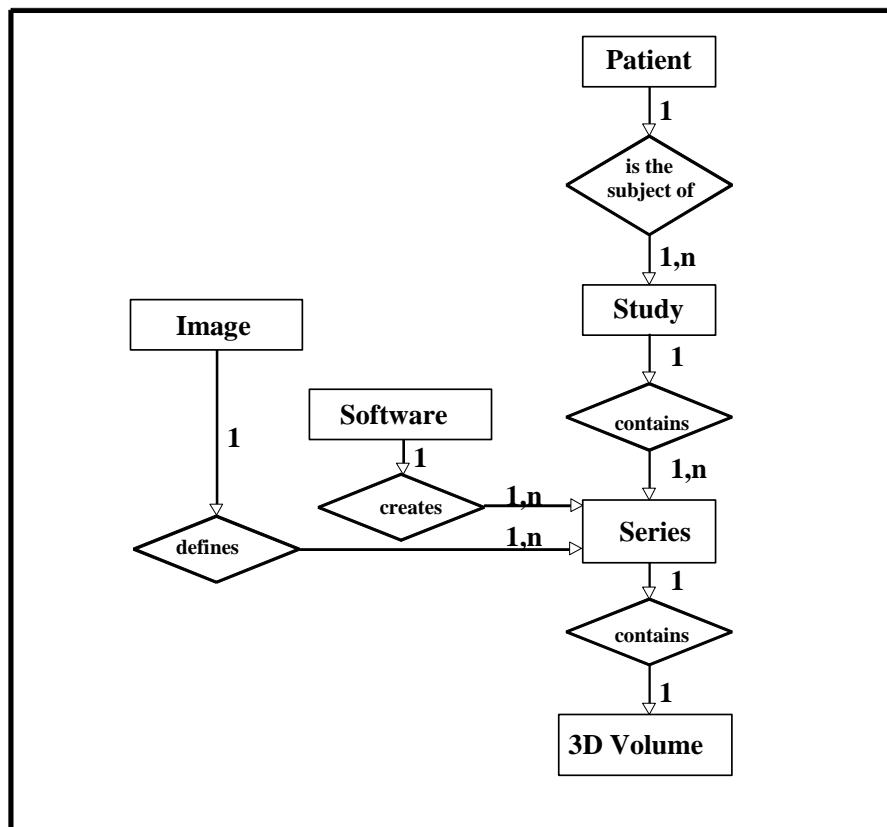

### 5.2 3D XACT MODEL IOD IMPLEMENTATION

This section defines how 3D XACT Model attributes are used within the implementation.

### 5.3 3D XACT MODEL ENTITY-RELATIONSHIP MODEL

ILLUSTRATION 5-1

3D XACT MODEL ENTITY RELATIONSHIP DIAGRAM

The Entity-Relationship diagram for the 3D XACT Model interoperability schema is shown in ILLUSTRATION 4-1. In this figure, the following diagrammatic convention is established to represent the information organization:

- each entity is represented by a rectangular box
- each relationship is represented by a diamond shaped box.
- the fact that a relationship exists between two entities is depicted by lines connecting the corresponding entity boxes to the relationship boxes.

The relationships are fully defined with the maximum number of possible entities in the relationship shown. See DICOM Part 3 Section 5.1.2 for an explanation of the entity-relationship notation.

#### 5.4 ENTITIES DESCRIPTION

Refer to DICOM Standard Part 3 (Information Object Definitions) for a description of each of the entities contained within the 3D XACT Model Image information object.

#### 5.5 INNOVA3DXR 1.2 MAPPING OF DICOM ENTITIES

DICOM entities map to the Innova3DXR 1.2 entities in the following manner:

**TABLE 5-1**  
INNOVA3DXR 1.2 MAPPING OF DICOM ENTITIES

| <b>DICOM</b>     | <b>Innova3DXR 1.2</b>                    |
|------------------|--|
| Patient Entity   | Patient Entity (Advantage Workstation)   |
| Study Entity     | Exam Entity (Advantage Workstation)      |
| Series Entity    | Series Entity (Advantage Workstation)    |
| Equipment Entity | Equipment Entity (Advantage Workstation) |
| Image Entity     | Image Entity (Advantage Workstation)     |

## 5.6 IOD MODULE TABLE

The 3D XACT Model Information Object Definitions comprise the modules of the following tables, plus Standard Extended and Private attributes.

**TABLE 5-2**  
XA IMAGE IOD MODULES

| Entity Name | Module Name                                       | Usage  | Reference |
|-------------|---|--|-----------|
| Patient     | Patient   | Mandatory  | 5.6.2.1   |
| Study       | General Study                                     | Mandatory  | 5.6.3.1   |
|             | Patient Study                                     | User Option  | 5.6.3.2   |
| Series      | General Series                                    | Mandatory  | 5.6.4.1   |
|             | Frame Of Reference                                | User Option  | 5.6.4.2   |
| Equipment   | General Equipment                                 | Mandatory  | 5.6.5.1   |
| Image       | General Image                                     | Mandatory  | 5.6.6.1   |
|             | Image Plane                                       | Mandatory  | 5.6.6.2   |
|             | Image Pixel                                       | Mandatory  | 5.6.6.3   |
|             | Contrast Bolus                                    | Module is not present if no contrast injection in original image | 5.6.6.4   |
|             | VOI lut   | User Option  | 5.6.6.5   |
|             | SOP Common  | Mandatory  | 5.6.6.6   |
|             | CT Image  | Mandatory  | 5.6.6.7   |
|             | X-Ray 3D Angiographic Image Contributing Sources* | User Option  | 5.6.6.8   |
|             | X-Ray 3D Angiographic Acquisition*                | User Option  | 5.6.6.9   |
|             | X-Ray 3D Reconstruction*                          | User Option  | 5.6.6.10  |

\* These modules contain both Standard Extended and Private attributes.

Please refer to DICOM v3.0 Standard Part 3 (Information Object Definitions) for a description of each of the entities and modules contained within the 3D XACT Model Information Object.

The following modules are included to convey Enumerated Values, Defined Terms, and Optional Attributes supported. Type 1 & Type 2 Attributes are also included for completeness and to define what values they may take and where these values are obtained. It should be noted that they are the same ones as defined in the DICOM v3.0 Standard Part 3 (Information Object Definitions).

### **5.6.1 COMMON INFORMATION MODULE DEFINITIONS**

Please refer to DICOM Part 3 (Information Object Definitions) for a description of each of the entities, modules, and attributes contained within the 3D XACT Model Information Objects.

### **5.6.2 PATIENT ENTITY**

#### **5.6.2.1 PATIENT MODULE**

**TABLE 5-3**

PATIENT MODULE ATTRIBUTES

| Attribute Name       | Tag         | Type | Attribute Description               |
|----------------------|-------------|------|-------------------------------------|
| Patient's Name       | (0010,0010) | 2    | Copied from XA image without change |
| Patient ID           | (0010,0020) | 2    | Copied from XA image without change |
| Patient's Birth Date | (0010,0030) | 2    | Copied from XA image without change |
| Patient's Sex        | (0010,0040) | 2    | Copied from XA image without change |

### **5.6.3 STUDY ENTITY**

#### **5.6.3.1 GENERAL STUDY MODULE**

**TABLE 5-4**

GENERAL STUDY MODULE ATTRIBUTES

| Attribute Name                     | Tag         | Type | Attribute Description               |
|------------------------------------|-------------|------|-------------------------------------|
| Study Date                         | (0008,0020) | 2    | Copied from XA image without change |
