Single Use Anesthesia Breathing Masks

Single Use Anesthesia Breathing Masks from GE Healthcare are tested and verified to function with GE Healthcare anesthesia machines. Anesthesia breathing masks are designed to channel gas mixtures to the patient for non-invasive ventilation via the mouth and nose. The products perform optimally with GE Healthcare anesthesia machine breathing systems when applicable.

FEATURES
- Clear face piece allows visual observation of patient status
- Compatible with all standard breathing systems with 22mm and 15mm connectors where applicable
- Available in sizes from neonatal through large adults
- Single use masks offer pre-filled soft inflatable cushion that can be inflated and deflated to enhance the seal to suit the patient’s anatomical contours.
- Single use masks include color coded hooks to help indicate mask size

Our equipment. Our accessories. Simply compatible.
You can trust GE Healthcare accessories and consumables to keep your clinical devices working efficiently.
- Simplified ordering process
- Fast delivery
- One contact point for expert advice
- Quality support at every step
