Centricity™ Perinatal Web module enables near real time analysis of the fetal monitor strip via the Web. This technology allows quick access to the fetal strip via a tablet from virtually anywhere—when and where you need it. You can view the strip, record a comment, and review annotations, whether inside or outside of the hospital. The module helps you increase your efficiency and optimize communication between caregivers, ultimately helping you to make faster, more informed decisions to enhance patient care.

**COMPATIBILITY**
- Browser: Safari® & Chrome™
- Device: Compatible on smartphone devices with screen dimensions of 3.5 in. (568 x 320 pixels), or tablets with a 7 or 10 inch screen or larger (see release notes for specific details on technical requirements)
- HTML5

**BENEFITS**
- Quickly and easily access fetal strip via your tablet from virtually anywhere
- Access information to make timely decisions, whether inside or outside of the hospital
- Optimize communication between caregivers
- Optimize your efficiency and ability to make decisions

---

1 Where the Internet is available
Centricity Perinatal Web module

- When Patient Details page opens it displays the patient's most current data

Centricity Perinatal does not replace clinical observation and evaluation of the patient at regular intervals, by a qualified care provider, who will make diagnoses and decide on treatments or interventions. Features of the Centricity Perinatal system are intended to support clinical decision making and should be used in combination with other clinical inputs, such as real time patient observation and information contained within other systems or recording tools. Not intended to be used as a primary monitoring device.
