INTRODUCTION

OVERVIEW

This IHE Integration Statement describes the intended conformance of this GE product with the IHE Technical Framework. The IHE Technical Framework defines a subset of the functional components of the healthcare enterprise, called IHE Actors, and specifies their interactions in terms of a set of coordinated, standards-based transactions. These transactions are organized into functional units called Integration Profiles that highlight their capacity to address specific clinical needs.

Users familiar with these concepts can use Integration Statements as an aid to determine what level of integration this product supports with other systems and what clinical and operational benefits such integration might provide.

Other GE Integration Statements as well as further information on IHE may be found on Internet at: ge.com/ihe

IMPORTANT REMARKS

The use of these IHE Integration Statements, **by itself, it is not sufficient to ensure that inter-operation will be successful.** The **user** needs to proceed with caution and ensure that a qualified systems' integration (such as that provided by GE's IT Professional Services) address at least four issues:

- **Integration** - The integration of any system into an integrated department or enterprise requires an analysis of the applications requirements. The design of a solution that integrates GE systems with non-GE systems is the **user's** responsibility and should not be underestimated. Special care should be exercised in defining the expected workflow, the special conditions, and the clinical practice to be supported to ensure a safe and effective operation.
- **Validation** - Testing the complete range of possible interactions between any GE system and non-GE system, before the integration is declared operational, should not be overlooked. Therefore, the **user** should ensure that any non-GE provider accepts full responsibility for all validation required for their connection with GE systems. This includes the accuracy of the data once it has crossed the interface and the stability of the data for the intended applications. Such a validation is required before any clinical use (diagnosis and/or treatment) is performed.
- **Future Evolution** - GE understands that the IHE Technical Framework and the underlying communication standards will evolve to meet the user's growing requirements. GE is actively involved in the development of the IHE Technical Framework and the underlying standards. Such evolutions may require changes to already installed systems. **In addition, GE reserves the right to discontinue or make changes to product features including those reflected by this IHE Integration Statement.** The **user** should ensure that any non-GE system that connects with GE systems also plans for the future evolution of IHE. Failure to do so will likely result in the loss of function and/or connectivity as the IHE Integration profiles evolve and GE Products are enhanced to support these changes.

IHE INTEGRATION STATEMENT

General Electric - IHE Integration Statement		Date
		23 July 2018
Vendor	Product Name	Version
GE Healthcare	Centricity Enterprise Archive	V4.0
This product implements all transactions required in the IHE Technical Framework to support the IHE Integration Profiles, Actors and Options listed below:		
Integration Profiles Implemented	Actors Implemented	Options Implemented
Access to Radiology Information (ARI)	Image Archive / Image Manager	None
	Report Repository	None
Audit Trail and Node Authentication (ATNA)	Secure Application	Radiology Audit Trail
Cardiology Evidence Documents (ED-CARD)	Image Archive / Image Manager	None
Consistent Presentation of Images (CPI)	Image Archive / Image Manager	None
Consistent Time (CT)	Time Client	None
Cross-Community Access for Imaging (XCA-I)	Imaging Document Source	None
Cross-Enterprise Document Sharing (XDS.b)	Document Repository	None
	Document Source	None
Cross-Enterprise Document Sharing for Imaging (XDS-I.b)	Document Repository	None
	Imaging Document Source	Set of DICOM Instances
CT/MR Perfusion Imaging with Contrast (PERF)	Image Archive / Image Manager	None
Enterprise User Authentication (EUA)	Client Authentication Agent	None
Evidence Documents (ED)	Image Archive / Image Manager	None
Image Fusion (FUS)	Image Archive / Image Manager	None
Key Image Notes (KIN)	Image Archive / Image Manager	None
Mammography Image (MAMMO)	Image Archive / Image Manager	None
MR Diffusion Imaging (DIFF)	Image Archive / Image Manager	None
NM Image (NMI)	Image Archive / Image Manager	None
Patient Identifier Cross-reference (PIX)	Patient Identifier Cross-reference Consumer	None
Radiation Exposure Monitoring (REM)	Image Archive / Image Manager	None
Simple Image and Numeric Report (SINR)	Report Repository	None
Multi-Patient Queries (MPQ)	Document Consumer	None

Imaging Object Change Management (IOCM)	Image Archive / Image Manager	None
	Change Requester	None
Digital Breast Tomosynthesis (DBT)	Image Archive / Image Manager	None
XDS Metadata Update (MU)	Document Administrator	Delete Metadata
Scheduled Workflow.b (SWF.b)	Image Archive / Image Manager	None
	Performed Procedure Step Manager	None
Web-based Image Storage (WIC)	Image Manager	PNG Storage Option
