

# Venue Fit™ Ultrasound System

Made for your Point of Care

Simple. Fast. Precise.

# For your Point of Care

A small but efficient point of care ultrasound system, Venue Fit is a simple, fast and precise partner for your point of care. Designed to fit your practice, fit your space and fit your needs, the streamlined—yet powerful—Venue Fit features the smallest footprint in the Venue™ family while still maintaining the features you've come to expect. Designed to handle the busywork so you can focus on your patients, the Venue Fit is ready when and where you are.

## Easy to reach probes

Smart cable management puts probes safely up top and cables out of the way and off the floor

## Customized for your needs

Configurable cart to keep two active probes accessible and in good condition

## Long-lasting power

Batteries can provide scan times of up to one hour

## At your side

Unit detaches from adjustable cart and allows for use on table top or standard VESA® connection

## Small and powerful

Without losing features, the smallest footprint in the Venue family

## Reliable support

Venue Fit is backed by a multi-year warranty<sup>3</sup>

## Easy to clean

Smooth and seamless surface supports infection control efforts

## Advanced transducers designed specifically for your Point of Care

Powered by cSound™, our durable ultrasound transducers provide exceptional image quality with feature designs that help enhance ease of use, ergonomics and patient comfort. From critical care, perioperative, and MSK to pediatrics and NICU, our transducers are available in a broad range of types that are designed to meet the needs of your specialty.

# Let's simplify the complex

Venue Fit ultrasound systems are built specifically for Point of Care medicine across the facility. By streamlining workflow, they help users of different departments and experience levels confidently conduct patient exams.

## AI-enabled tools support your confident decision-making

AI-resources based on synthesized data and proprietary algorithms simplify manual processes such as measuring and finding B-lines, helping ensure consistency from user to user.

## Documentation tools streamline exams

Protocol management and easy documentation tools help users conquer busywork by readily providing the information they need, reducing the need to manually type findings.

## Broad probe portfolio for exceptional image quality

Venue Fit features a wide variety of linear, curved, and cardiac transducers that are designed for a multitude of specialties and interchangeable\* across systems.

## A common platform ensures a consistent experience

All systems are built on one platform with the same interface to ensure familiarity and simplify training across your facility.

## Built-in teaching assistance facilitates learning

**Scribble** assists training with a touch-operated pointer and free-drawing capabilities that can also be visible on an external monitor or shared screen. The **MSK Tool Kit** provides reference images to guide novice users in scanning the correct anatomy and makes documentation easy.

## Touch, pinch, swipe

No buttons. No knobs. A familiar touch screen with a simple, clear and intuitive interface works even with gloves or screen covers.

# Helping you work smarter, not harder, with AI-proven tools

Helping drive consistency from user to user (whether one is an ultrasound novice or expert), Venue Fit features AI-enabled resources that help clinicians work smarter and more efficiently. Utilizing proprietary algorithms, we synthesize data from numerous patients to ensure accurate calculations for clinical confidence.

## cNerve

During the scouting phase, use cNerve to identify the nerve landmark and see it highlighted on the image. Helps detect and track the nerve in 99% of cases while scanning or reviewing a stored clip.<sup>2</sup>

# Simplify your workflow

Everyone is looking to eliminate busywork at the Point of Care, and that's what Venue Fit systems do. Easy documentation and protocol management tools reduce keystrokes, facilitate exam comparison, and streamline image organization for efficient review.

Scribble

## Scribble

Assists training with a touch-operated pointer and free-drawing capabilities.

Measurement Feature

## Catheter to Vessel Ratio

Supports you in selecting the appropriate sized catheter based on vessel diameter.

Real-time documentation

## Lung Diagram

A single view diagram of anatomical lung segments with one click image storing. Enables calculation of an overall Lung Ultrasound Score to help response to therapy.

Real-time documentation

## Renal Diagram

Simplifies hydronephrosis documentation and follow-up. Minimizes typing with labeling tools.

Real-time documentation

## eFAST Diagram

Allows users to assess and document patient status, from internal bleeding to pneumothorax, with up to an 80% reduction in keystrokes.<sup>1</sup>

MSK Tool Kit

## MSK Tool Kit

**Shoulder Diagram** simplifies shoulder exam documentation and follow-up by fast-tracking image labeling and image storage. Also facilitates patient therapy response by giving you the whole picture over treatment time.

**Reference image** provides anatomy markups to assist novice users in scanning the correct anatomy.

**Bilateral mode** helps you to view the opposite side of the same zone for comparison.

# Made for your Point of Care

Inspired by the needs of Point of Care physicians, Venue Fit supports a wide range of environments.

## Critical Care

AI-enabled tools, an intuitive interface, a compact footprint, and large screens optimize Venue Fit for your quick decision-making and bedside interventional procedures

[Learn more](#) →

## Emergency Medicine

A straightforward design, AI-enabled Auto Tools and nimble maneuvering help emergency room physicians quickly triage patients and determine care pathways.

[Learn more](#) →

## Musculoskeletal

Clear and effective tools help MSK practitioners assess tendons, muscles and joints and manage patient progress during a course of treatment.

[Learn more](#) →

## NICU & Pediatrics

The Venue Fit AI-enabled tools for pediatrics<sup>^</sup> enables fast and confident diagnostic scans without ionizing radiation for evaluation of the tiniest patients.

[Learn more](#) →

## Perioperative Anesthesia

Simple, fast and precise tools support your clinical decision making so you can provide the best clinical outcomes for your perioperative patients.

[Learn more](#) →

## Regional Anesthesia

Excellent image quality along with the tools needed to view the nerve, guide the needle, and ensure proper solution delivery, helping you provide the best clinical outcomes for your patients.

# Designed for security

SonoDefense is GE HealthCare’s multi-layer strategic approach to cybersecurity and patient data privacy for ultrasound, and designed to:

- Keep the ultrasound machine safe and functional in the face of cyberthreats
- Protect patient data on the machine from unauthorized access
- Enable you to successfully implement HIPAA and security policies, while still managing productive daily workflows

### Defense-in-depth strategy

SonoDefense is designed for maximum security protection with a defense-in-depth strategy that incorporates security controls deployed in multiple layers. This approach enhances security by protecting the system against any particular attack using several independent methods.

## About GE HealthCare

GE HealthCare is a leading global medical technology, pharmaceutical diagnostics, and digital solutions innovator, dedicated to providing integrated solutions, services, and data analytics to make hospitals more efficient, clinicians more effective, therapies more precise, and patients healthier and happier. Serving patients and providers for more than 100 years, GE HealthCare is advancing personalized, connected, and compassionate care, while simplifying the patient's journey across the care pathway. Together our Imaging, Ultrasound, Patient Care Solutions, and Pharmaceutical Diagnostics businesses help improve patient care from prevention and screening, to diagnosis, treatment, therapy, and monitoring. We are an \$18 billion business with 51,000 employees working to create a world where healthcare has no limits.
