

Connect staff with remote collaboration and scan assistance

nCommand™ Lite by IONIC Health

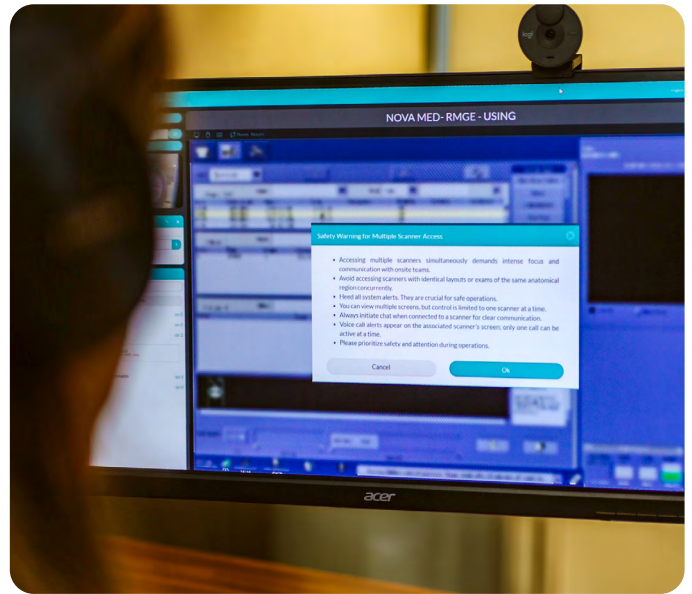

Empower your radiology staff to focus on patient care when they can access the support they need through remote collaboration and scan assistance. FDA-cleared and CE-Marked under MDR requirements, nCommand Lite by IONIC Health is exclusively distributed by GE HealthCare. It provides real-time scanning support with remote access to multiple scanners and locations.

Vendor-agnostic and capable of supporting MRI, CT and PET/CT scanning, nCommand Lite can connect your staff remotely to share expertise and best practices as well as support staff training.

Instantly plug in experts when and where they're needed

nCommand Lite enhances collaboration and leverages expertise from anywhere. With nCommand Lite, you can:

- Counter resource scarcity across sites by connecting remote experts with on-site technologists.
- Enhance collaboration, streamline staffing and optimize device utilization.
- Enable real-time support and scan assistance for complex exams to help reduce rescans.
- Standardize protocols with remote editing and remotely replicate across your fleet.
- Connect staff remotely to aid on-boarding and training.
- Build staff competence and confidence through remote guidance.
- Support quality and consistency across your imaging operations.

Easily connect your radiology staff through remote accessibility
