

Flyrcado is removing barriers to access cardiac PET

Flyrcado is opening the door to cardiac PET for more imaging centers, enabling sites of care to:

Remove the need for costly generators, freeing your site from the complexities of on-site tracer production, maintenance, and associated staff training

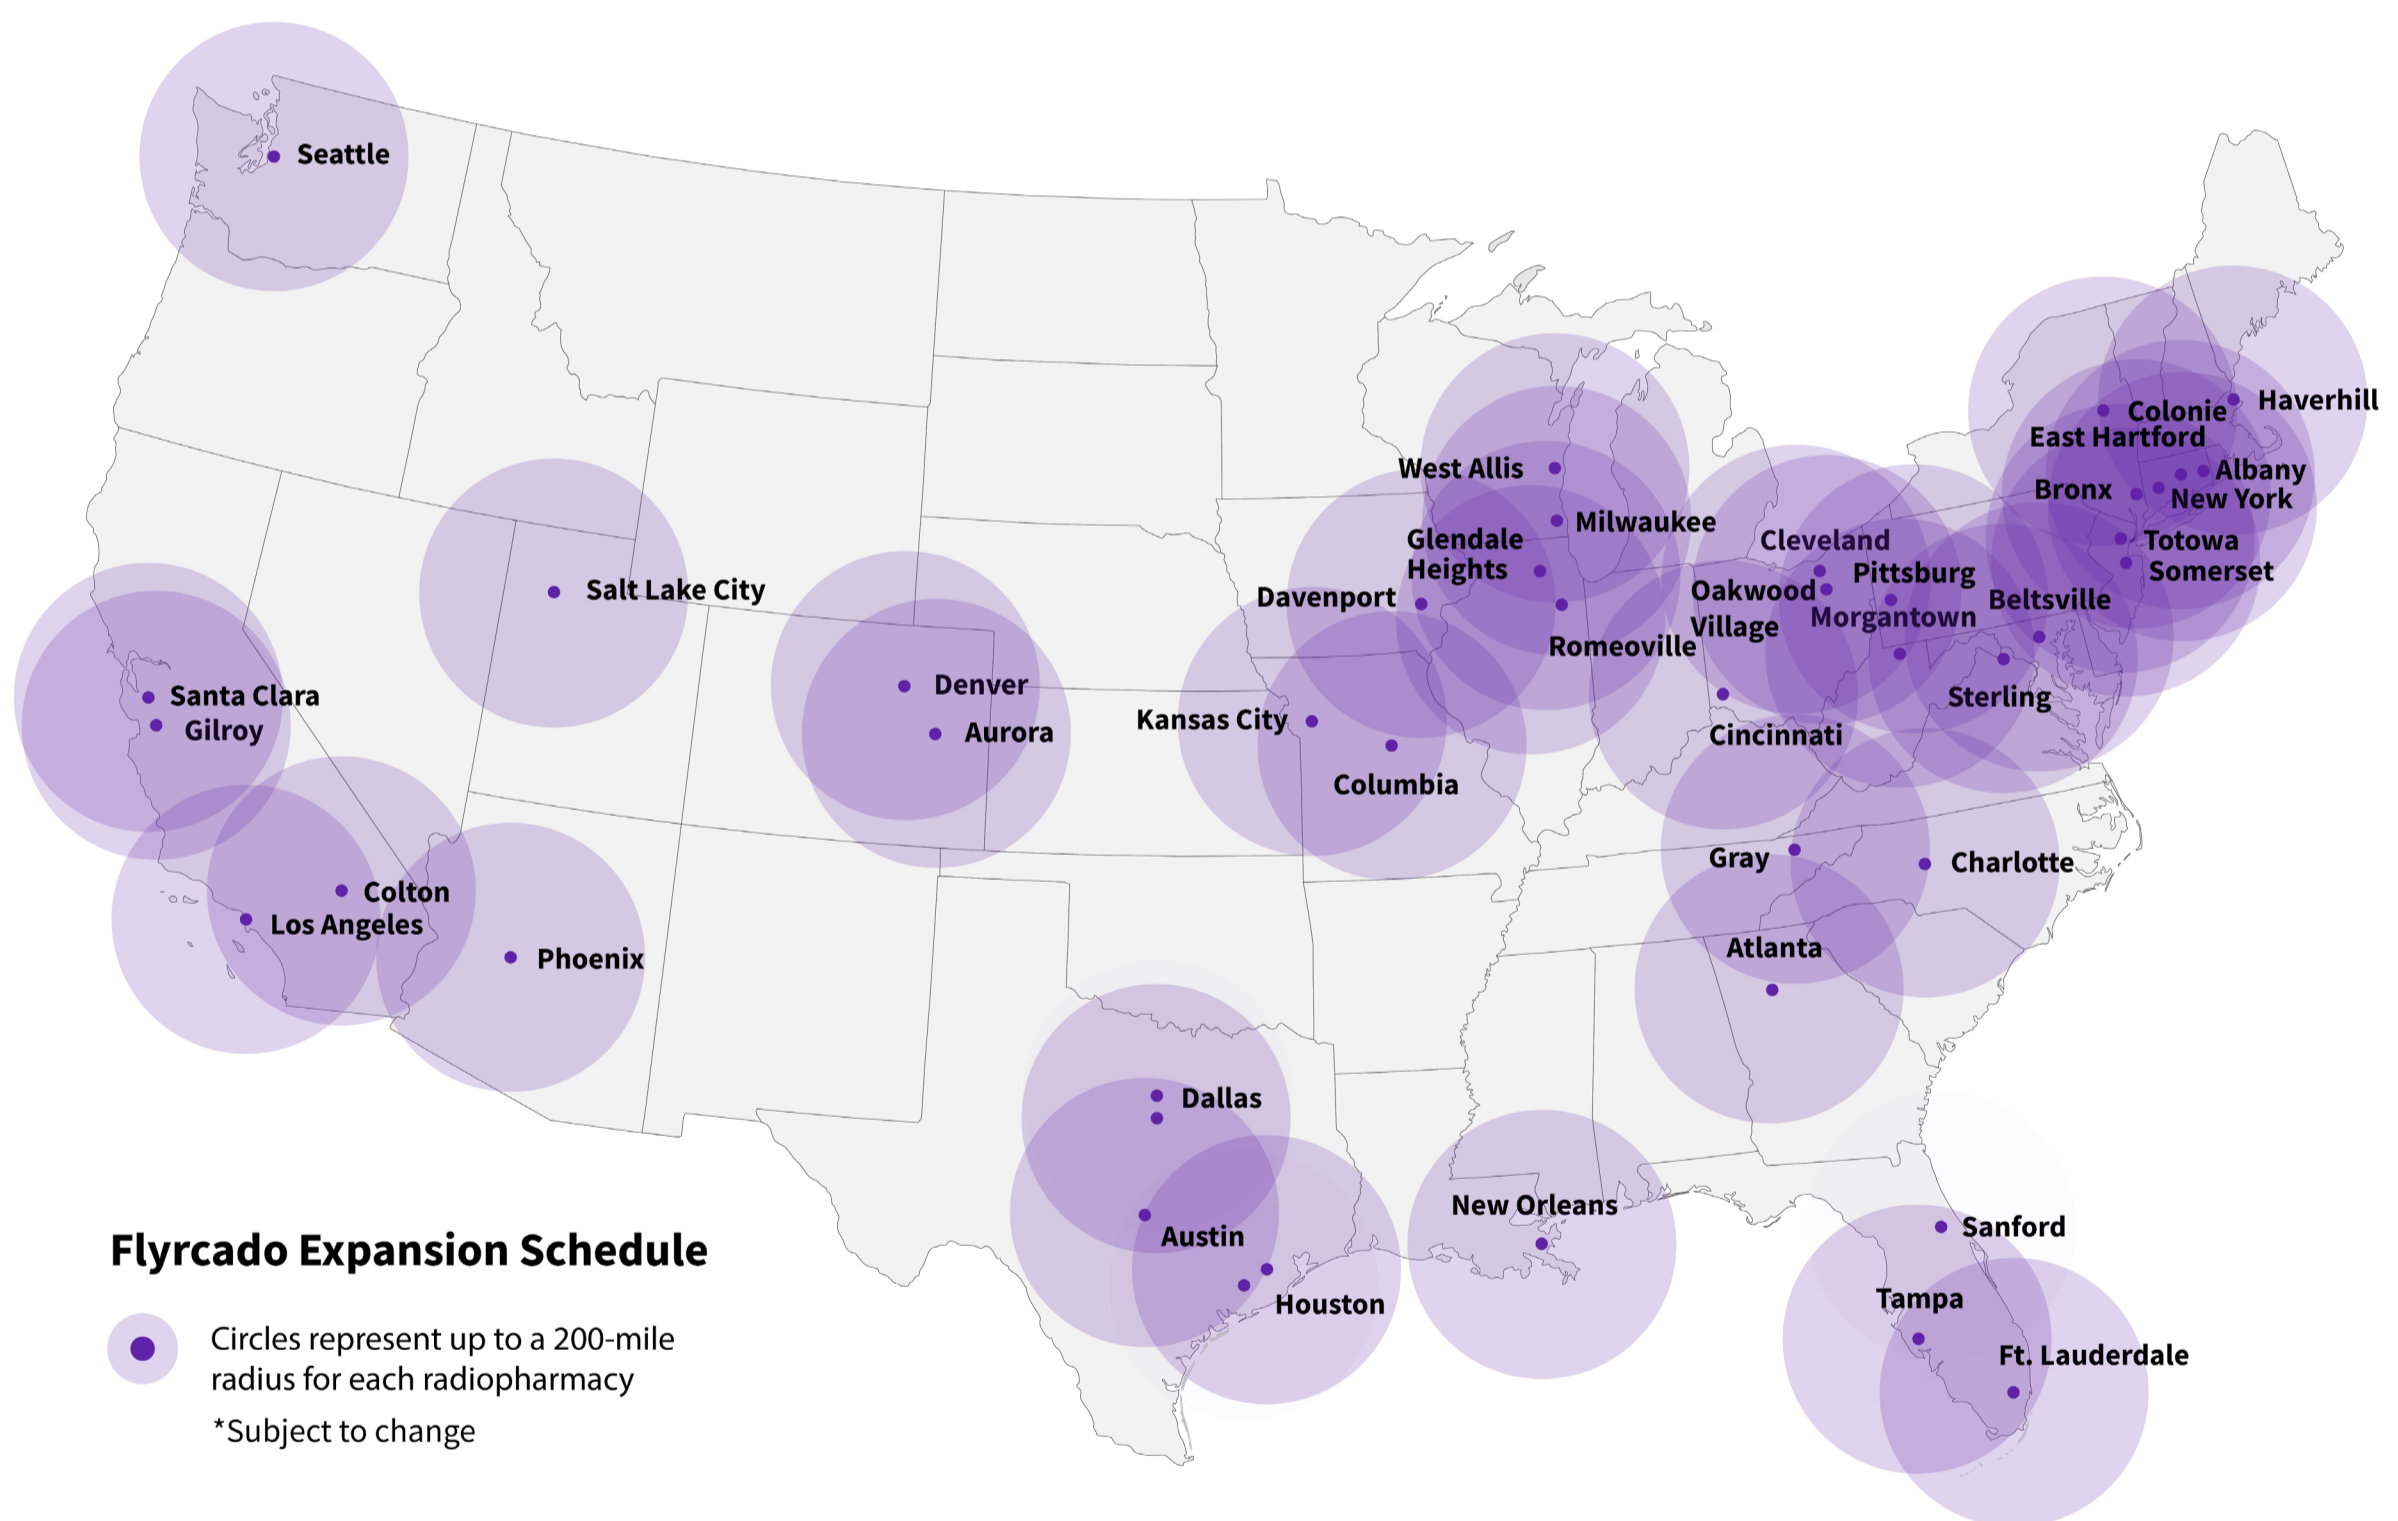

Get the doses you need when you need them— on-demand unit dose delivery is available up to five days a week-no patient volume minimums required

Potentially bring cardiac PET imaging closer to home for more patients

Find Flyrcado in your region

Flyrcado is manufactured through GEHC's expanding contract manufacturing (CMO) partner network. For imaging centers, Flyrcado is available in ready-to-administer unit doses delivered up to 5 days/week.
