

ViewPoint™ 6 MobileConnect

Ultrasound reporting made simple, convenient, and efficient

Introducing ViewPoint 6 MobileConnect¹

Designed with Emergency Departments in mind, ViewPoint 6 MobileConnect prioritizes fast, standardized ultrasound reporting so you can move more smoothly from one patient to the next.

ViewPoint 6 MobileConnect is a browser-based application that allows you to effortlessly document ultrasound exams performed using a Vscan Air™ handheld device or any other ultrasound system. This enables you to quickly capture required exam documentation in real-time using your smartphone or tablet while you're still with the patient.

Your expertise, coupled with ViewPoint 6 MobileConnect, means you'll have everything needed to maximize your efficiency and increase the quality of documented exams, all while providing high-quality care to patients.

More time on ED ultrasound reporting means less time to spend on patient care.
When time is short, exams may go undocumented.

Your staff faces daily challenges, including:

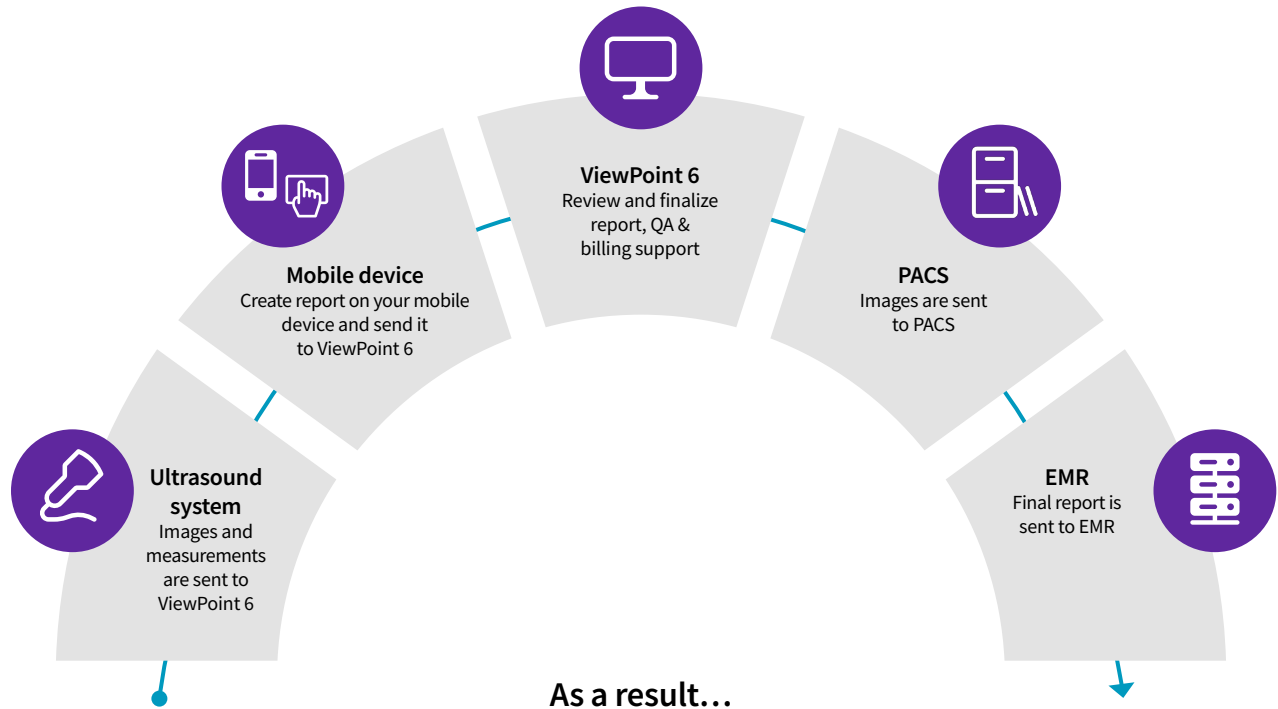

- ✓ Demanding schedules and busy shifts that leave no time to document exam findings properly
- ✓ Basic reporting that is rarely tied to a specific form or template across the department
- ✓ Lack of standard templates to document positive or negative exam findings, including abnormalities and pathology
- ✓ Insufficient reporting compliance leads to phantom scans, resulting in missed reimbursement
- ✓ Lack of integrations among ultrasound scanners, EMR, and PACS systems

ViewPoint 6 MobileConnect offers:

- Effortless ultrasound report creation with a few clicks; exams are then available in ViewPoint 6 for review and storage
- Templates for common Point of Care ultrasound exams, in compliance with ACEP guidelines
- Quick Report configuration to document positive or negative exams findings with a click of a button
- Automated workflows that enable exam results to be captured and accessible for QA
- Transfers all exam findings to ViewPoint 6 (that sends records to the PACS and EMR systems for archiving, ensuring adherence to proper medical procedures)

Simplified workflows – Capture data. Reduce friction.

Ultrasound reporting in a multi-vendor environment with ViewPoint 6 MobileConnect:
Clear documentation and more consistent reimbursement capture without extra time

More consistent exam
documentation

More exam claims
submitted and reimbursed

More
productivity

More staff
satisfaction

Let our expertise and decades of ultrasound innovation inform your choice on what you should expect in your ED's workflow. Contact your GE HealthCare sales representative for details.
