

ViewPointTM 6 for POC Ultrasound

The smallest things
make the biggest difference.

A second makes a difference.

Time changes everything. No more so than in your Emergency Department where we know that every second counts.

That's why ViewPointTM 6 provides an effective workflow solution for faster ultrasound documentation in emergency situations. ViewPoint 6 supports Encounter-Based Imaging Workflow (EBIW) and enables automated data flow to your hospital information system. But that's not all, ViewPoint 6 has QA documentation available that provides you with the ability to give feedback on exam and report quality to physicians.

Automated workflows with the VenueTM family make a difference.

GE HealthCare has taken POCUS reporting* even further with integrated reporting on the VenueTM family of ultrasound products.

The combination of RFID and patient bracelet barcode scanning plus reporting on the scanner helps to save precious time in emergency situations.

When moments matter, integration makes a difference.

- ✓ The full integration of ViewPoint 6 into your IT infrastructure allows for the more efficient flow of patient information.
- ✓ The patient's report, together with the images from the exam, are sent to ViewPoint 6 and distributed into the hospital IT infrastructure.
- ✓ This means that you no longer need to spend valuable time searching for important patient data or worrying about documenting your exams at the end of your shift.

When the clock is ticking, efficiency makes a difference.

For over 30 years, ViewPoint has relentlessly innovated to deliver the best workflow experience so that you can focus on your time-critical patients.

- ✓ ViewPoint 6 maximizes your efficiency by digitizing workflows, from patient arrival to archiving.
- ✓ It enables simple, fast, and efficient reporting directly on the VenueTM family ultrasound systems or on any mobile device using ViewPoint 6 MobileConnect* and Vscan AirTM.
- ✓ ViewPoint 6 also allows data to be stored digitally for easy access so that users can review exam findings, images, clips, and QA feedback in one place.

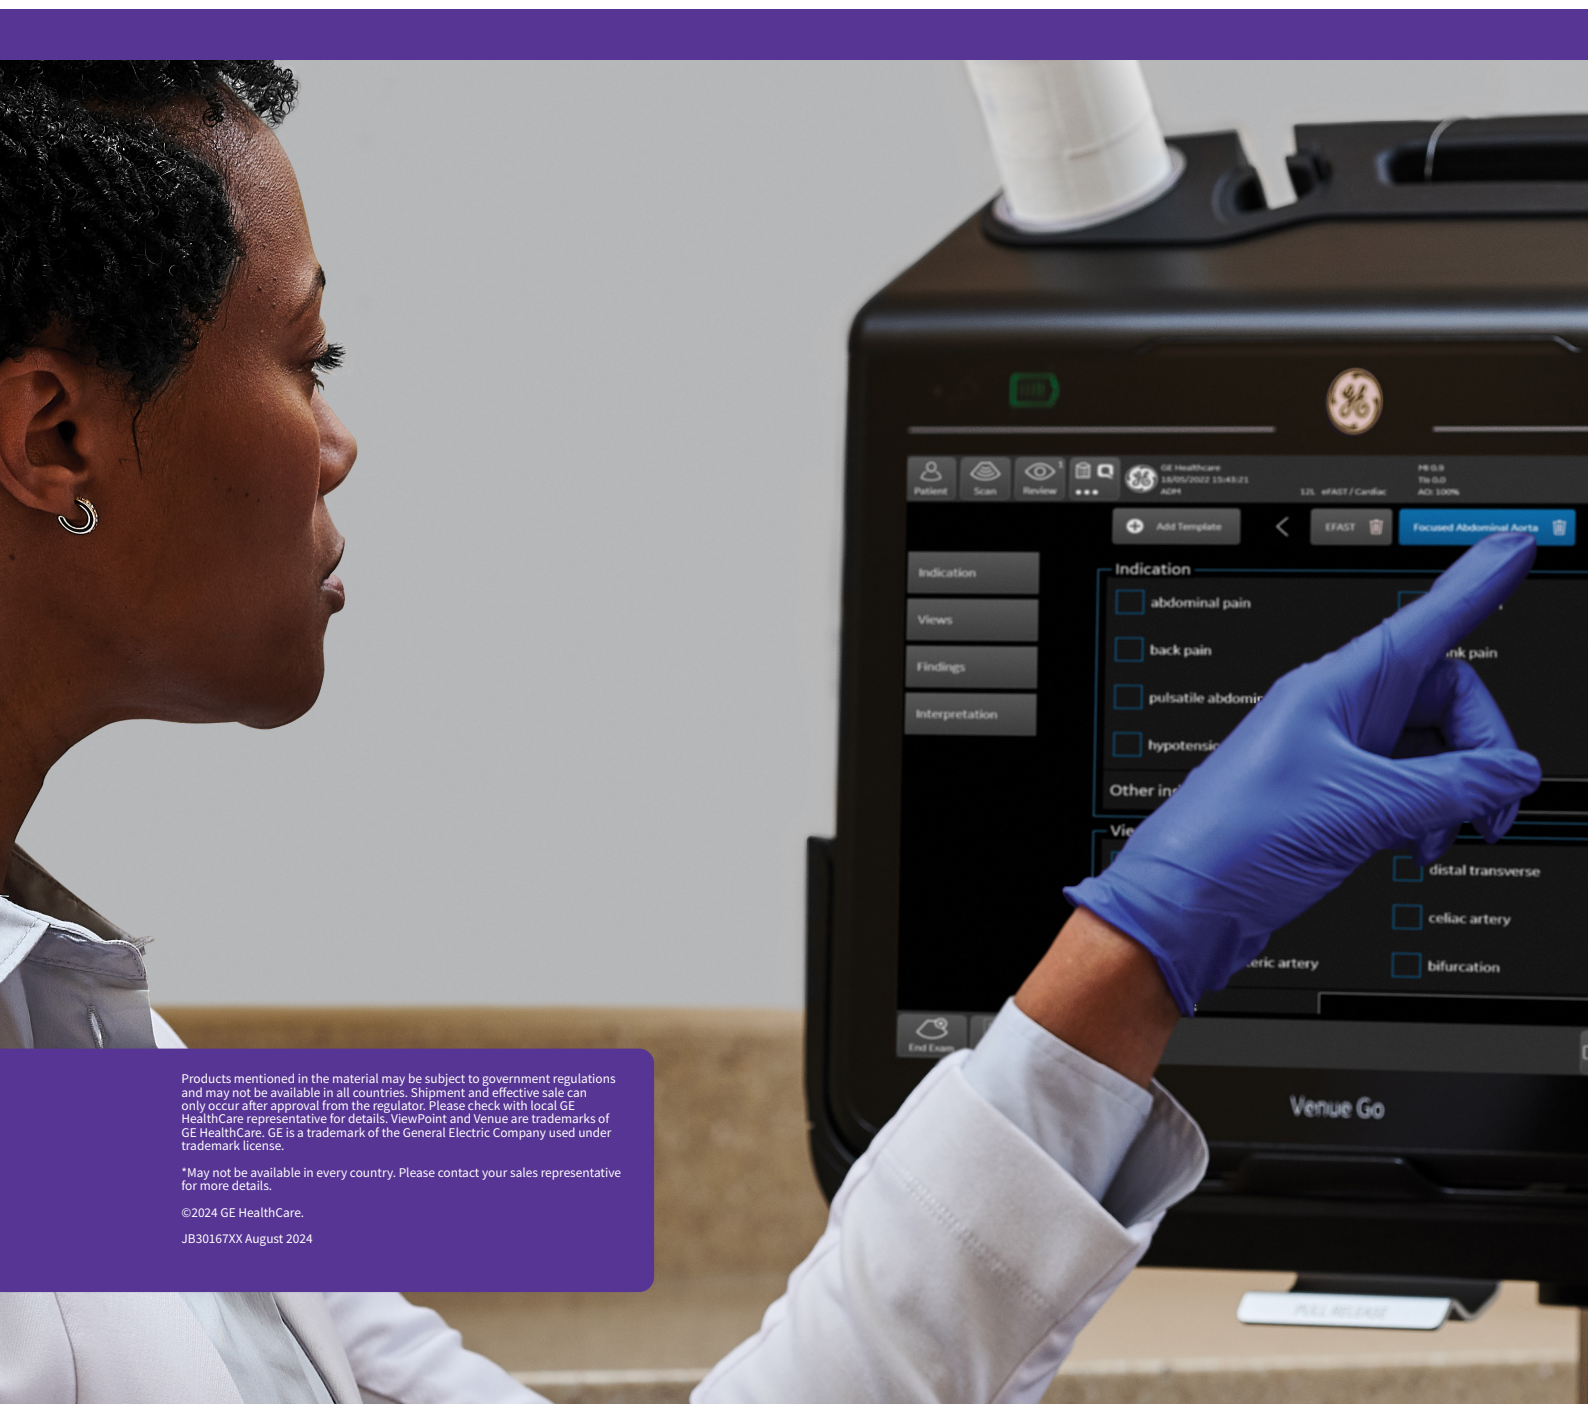

The right solution for your department's individual needs

Regardless of the ultrasound fleet available in your ED department, we have a solution for you. ViewPoint 6 POCUS workflow solutions offer:

- ✓ On-scanner reporting with Venue™ family ultrasound systems.
- ✓ Reporting at the point of care using the browser-based application MobileConnect with Vscan Air™ handheld devices.
- ✓ Options are also available for compatible mixed ultrasound fleets.
- ✓ POCUS-specific configurable templates based on ACEP guidelines are available to deliver structured, easy-to-read reports.

Fewer clicks and increased billing opportunities without extra time

- ✓ With ViewPoint 6 exams are quickly captured and documented in real-time, so records are not lost amid the rapid pace of the ED.
- ✓ Automated transfer of all exam findings from your ultrasound system to ViewPoint 6 to EMR and PACS enables compliant billing and reimbursement.
