

Spire Healthcare

Programme start:
2015

Scope:
11,000+ Imaging,
Ultrasound and
Biomed assets across
39 sites

Customer Needs

- Reduce equipment maintenance costs, with no reduction in service
- Deliver consistent approach to maintenance across all assets
- Improve overall compliance with the organisation's medical device management policy
- Create visibility on inventory and service costs across all sites
- Support organisation's approach to equipment replacement

Solutions implemented

- Maintenance of imaging, ultrasound & biomedical assets
- Standardised approach, providing single point of contact with dedicated resources
- Implementation of AssetPlus™ CMMS system ensuring compliance
- Comprehensive audits of various modes of equipment and recommendations for consolidation and replacement
- Technology planning to support long-term capital acquisitions

Outcomes Achieved

- Provided much better visibility of costs and removed the unpredictable repair cost element.
- It allowed us to see much more clearly what was on contract and remove unnecessary equipment as well as review volumes between hospitals.
- Harmonized approach to maintenance
- Improved quality & transparency of clinical asset inventory data
- Improved compliance meeting specific requirements

Contract extended in 2020
